Wilfred J. Tremblay, term expires February 1, 1947

Leon H. Powers, term expires February 1, 1946

Veterans' Guidance Counselor

George E. Shalhoup

ANNUAL REPORT

Of Selectmen and Overseers of the Poor

January 1 to December 31, 1946

Your Municipal Officers are pleased to pause at this time in order to give due consideration to the year 1946 just terminated, with an itemized account of their administration of your town affairs, which you will find within the pages of this Annual Town Report.

The year past was subject to considerable anxieties to those who felt responsible in an endeavor to balance the town's finances and maintain the needed town services, especially with the high cost of necessities, also unforeseen demands for needed increases in salaries of municipal employees, necessary for them to meet this same high cost of living.

Sanford was very fortunate through 1946 that all the major local industries, with an upward trend of their businesses, were instrumental in giving steady employment with good remuneration for their labor, enabling their employees to enjoy a stable standard of living.

We are very thankful to every taxpayer in the Town of Sanford for the promptness in the payment of their taxes which is so essential to good governmental functions, also the means of curtailment of costly interest charges for temporary loans in order to meet all current expenses.

Again, the year 1946 did not produce much improvement over the last few years pertaining to the Support of Poor, Aid to Soldiers' Families, Aid to Dependent Children and supplemental help to the 139 cases of Old Age Assistance within the town. The same prevailing cost of living was responsible for the additional costs within those appropriations. We feel that we were fortunate in being able to accommodate all who applied for needed care at our Town Farm, with an average of twenty-six patients throughout the year. The Home was really taxed to capacity, but under the efficient management of Mr. and Mrs. Verson Drowns, the strenuous task was successfully accomplished.

We want to recognize that all the employees of the Municipality of Sanford are worthy of the trust we placed in their appointments and may each and everyone of them know that we extend our most sincere thanks for their constant cooperation. They have helped a good deal in making our work interesting.

Finally may the townspeople who entrusted us with the administration of their municipal affairs, consider that we have endeavored to give to them in return for that trust, honest, conscientious and progressive government to the best of our ability at all times.

Respectfully submitted,

ARTHUR M. CARIGNAN,
MOORE GREENWOOD,
MAURICE J. MAURICE,

Selectmen, Assessors and
Overseers of the Poor.

REPORT OF THE VETERANS' GUIDANCE COUNSELOR

To the Citizens of the Town of Sanford:

In June of 1945, at a special town meeting, you created the office of Veterans' Guidance Counselor. This was the result of recognizing the need that existed then, and still exists, of our returning veterans, for an agency or center where they can receive aid and counsel on the many problems and difficulties which confront them upon their return to civilian living.

These problems and difficulties are by no means minor or trivial to the young men concerned. Their lives were interrupted in too many cases when they were about to achieve their ambitions. In too many instances the sudden transition from peaceful and productive pursuits to destructive war-making was too violent a change in one's personality to overcome, the day he returned to his home and loved ones.

Our returning veterans have problems—and real ones—personal as well as ones of readjustment; such as, jobs and general "catching-up" to their proper positions in the community.

During the years of their war service, a grateful nation provided many benefits for its ex-servicemen—chief of which is the so-called G. I. Bill of Rights with its readjustment and educational programs. Subsequently, other laws were passed, such as the terminal leave provisions for enlisted men. More laws are in the making in the present Congress—more will be in the making in the immediate future concerning veterans and their dependents.

Other real problems to the veteran and his dependents are the ones which concern his recent service and his business with governmental agencies, such as insurance, bond savings, dependency allotments, and numerous others which follow him home upon his discharge.

Your Veterans' Guidance Center is endeavoring to give all possible information and guidance on all these problems and difficulties that beset our veterans and other persons directly concerned.

This aid consists chiefly of having the answers to all the questions that a returning ex-serviceman wonders about. Some of these are: his education under the G. I. Bill, what benefits he is entitled to, being reinstated to his old job, job opportunities in other fields, his government insurance problems, G. I. loans, housing problems and many others too numerous to mention.

Another factor which is quite important to these future leaders of our community is the personal problems in connection with the often times difficult period of readjustment which all of our veterans must go through.

The director of the center is always ready to listen to these problems with sympathetic understanding and try to suggest ways and means to overcome them through the facilities at his disposal. The center has direct access to many government and civilian agencies and other information sources which can be utilized to the advantage of those we are trying to help.

More and more, in recent months, citizens of the community, other than veterans, have availed themselves of the facilities of this center. This is especially true in the case of wives and dependents of veterans and persons still in service, widows of World War I veterans, and other dependent persons who are receiving pensions and other benefits as a result of a veteran's war service.

From the date of the opening of the Center on November 27, 1945, to December 31, 1946, we have serviced the grand total of 7,456 requests for information and guidance by 5,917 persons, detailed as follows:

Requests for information guidance and counseling service	3,377
Forms completed for Vets and other persons	1,772
Letters written for Veterans and other persons in need of this service	787
Telephone inquiries	465
Referred to other agencies for additional service	162
Notarizations	893

I would like to say a word about the yeoman service that Mr. Donald Partridge is doing in behalf of our veterans where their education, both present and future, is concerned. Mr. Partridge's office in the School Department has given and is giving excellent and important guidance in the field of education to our returning ex-servicemen,—guidance that I feel sure will reflect very profitably on the future lives of these concerned.

In conclusion, I wish to express my grateful appreciation for help and services by many of our local citizens, doctors, attorneys, industrialists, merchants, public officials, and others in connection with our work at this center. On many occasions, we have referred veterans who were in need of specialized aid and advice that these people are qualified to render. They have given unstintingly of their time and effort in behalf of our veterans, whenever they were called upon to do so.

Respectfully submitted,

GEORGE E. SHALOUF,
Veterans' Guidance Counselor.

REPORT OF THE BOARD OF ENGINEERS OF SANFORD FIRE DEPARTMENT

January 25, 1947

To the Municipal Officers of the Town of Sanford:

GENTLEMEN:

The Engineers of the Sanford Fire Department submit the following report:

We have enjoyed a successful year during 1945. Although our gross fire losses were higher than the preceding year, it must be considered that the national fire losses exceeded \$500,000,000 in 1946. Although these figures are in all time high the material losses were greatly reduced. With replacement material up 65% and the labor costs at least 50% higher it is easy to see that the material losses by fire were greatly reduced. The national life loss exceeded 10,000 lives. This heavy life loss can be traced directly to the crowded housing conditions. These conditions cause us to sadly report the loss or two lives in our town for 1946.

We have heard requests from nationally famous men asking for building codes to be relaxed to enable more housing to be erected. We are not in agreement with them. It is our desire to see safer construction to better safe guard the lives of our citizens. We feel sure there will be legislation enacted this year along safe construction standards, in public buildings, hotels, and rooming houses.

We are very much concerned about our forest conditions for the coming season. The hazards are at least three times greater than we have ever seen. However, we are pleased to report that we are better equipped to handle these conditions than ever before in history. Through the excellent cooperation of our local oil distributors there are five tank trucks ready for our use in an emergency to transport water to the scene of a fire.

Again we must report the value of the two-way radio equipment. Without this equipment our courage would be greatly reduced.

Also the new resusitator purchased the past year has shown its value by being directly responsible for saving the life of a child after the High Street fire where two other lives were lost.

We are looking forward to the arrival of the new aerial ladder truck which will greatly add to the protection of lives and property in our town.

We are grateful to the excellent cooperation we have received from the Selectmen, the Springvale Fire Department, the Police Department, and the citizens of the town. With this type of cooperation 1947 should be bright and successful.

Respectfully submitted,

CURTIS ALLEN, Chief

CHARLES C. CHADBOURNE, 1st, Asst. Chief

BERNARD N. CHADBOURNE, 2nd Asst. Chief

REPORT OF THE CLERK OF THE SANFORD FIRE DEPARTMENT

January 1, 1947

To the Municipal Officers of the Town of Sanford, Maine:

I hereby submit the following report of the Sanford Fire Department for the year 1946.

The department has responded to 317 calls, 275 stills, 26 bells, 4 house calls and 12 fire drills.

Estimated value of property endangered.....	\$420,650.00
Damage to property endangered	20,040.70
Insurance paid on property	19,340.70
Net loss	700.00
Total feet of hose laid	53,875
Total gallons of chemical used	66
Total feet of ladders raised	2,075
Miles apparatus travelled	1,551.7

Respectfully submitted,

GEORGE F. FERGUSON, Clerk.

PROTECTION OF LIFE AND PROPERTY**REPORT OF THE BOARD OF ENGINEERS OF
SPRINGVALE FIRE DEPARTMENT**

To the Board of Selectmen:

The Board of Engineers of the Springvale Fire Department submit the following report for the year ending December 31, 1946.

We have had a very active year responding to more alarms than ever in the history of the company, 241 alarms, and in spite of the fact we have been able to keep the fire loss down to \$1,425.00 loss, as against a \$9,032.60 fire damage to what we think is a small loss to the number of alarms we have had.

Chief Allen and myself are very grateful to the town in adopting the Building Codes and Fire Ordinances this year. We feel that they will now, and in the future, be a great asset to all, and in the near future we hope to have the underwriters come here and see if they will allow us a lower insurance rate from a Class C. to a Class B., which will be a saving to the taxpayers of this town.

Last year the town voted us an extra permanent man, which enabled us to shorten the working hours from 144 hours to 96 hours a week. We have an efficient group of men at the present time and they keep the Fire Station and equipment in very good condition.

As ever we recommend that all town-owned buildings be equipped with automatic signalling devices, especially the school buildings.

I hope at the time you receive this communication that our new switchboard and whistle will be in the process of being installed.

As Chief of this department I wish to thank the Goodall-Sanford, Inc., for their public service to the community. I have tried to find out how many years they have let us use their whistle, but have not been able to get a correct length of time, so you can see it has been a good many years of essential public service.

We wish to thank Chief Allen and his department for their fine cooperation this last year, as we have a Mutual Aid System that keeps both departments covered at all times.

I wish to thank Chief of Police Meunier and his department for their splendid cooperation in the past year, and to the Board of Selectmen and the Road Commissioner for their help this past year.

Respectfully submitted,

HARRY MARSHALL, Chief
CHARLES A. WINSLOW, Asst.
HAROLD BALDWIN, Asst.

PROTECTION OF LIFE AND PROPERTY**REPORT OF THE CLERK OF THE SPRINGVALE
FIRE DEPARTMENT**

December 31, 1946

To the Municipal Officers of the Town of Sanford, Maine:

I hereby submit the following report of the Springvale Fire Department from January 1, 1946 to December 31, 1946.

The company has responded to 241 alarms, consisting of 225 stills and 16 bells. The company also held 6 drills.

Total value of property endangered	\$287,300.00
Damage to property endangered	9,032.60
Insurance paid on property endangered	7,607.60
Loss	1,425.00
Number feet of hose laid	34,955
Number feet of ladder raised	2,133
Number of miles apparatus travelled	811.3

Respectfully submitted,

CARLTON P. BICKFORD, Clerk.

REPORT OF HEALTH OFFICER FOR 1946

To the Selectmen, Town of Sanford, Maine:

GENTLEMEN:

As Health Officer of Sanford from January 1, 1946 to January 1, 1947, I herewith respectfully submit a report of health activities during the current year.

During the year examination of all children in the public and parochial grade schools was made with the assistance of Miss Laura Tabor, R. N., and where any defects were noted parents were notified of the condition, with a request that they procure medical aid for the child.

In cases of suspected contagious disease children were often referred to the health office by teachers. If the child was found to be affiliated with a contagious disease the parents were notified to secure medical treatment for the child and were instructed to keep the child at home until all danger of infection to others was past.

House calls were made each week to sick patients on welfare, as necessary. Many of these people were aged and receiving Old Age Assistance, whose grants were inadequate to allow for medical expenses. Whenever necessary calls were made to the Town Farm.

Many office calls were made to the welfare office by patients who receive public assistance of one type or another. Treatment and medicines were prescribed for them as indicated. Hospitalization was provided for all patients whose condition was such that it was necessary.

Surgery was performed whenever necessary.

Diphtheria Toxoid and small pox clinics were held each month.

Restaurants, lunch wagons, stores, markets, and barber shops were visited and an inspection was made as to cleanliness and sanitary conditions existing.

In conclusion I wish to express my sincere thanks to the welfare nurses, school nurse, and to all the citizens of the community for the fine cooperation they have given me during the year.

Respectfully submitted,

RALPH S. BELMONT, M. D.,

Health Officer.

NURSING REPORT OF COMMUNITY HEALTH ASSOCIATION, 1946

To the Citizens of Sanford:

The following report has been presented to me by the nursing supervisor.

The appropriation which is received from the Town of Sanford is placed into our general fund for carrying on the work of the association.

A board of directors establishes the policies of the nursing work.

Two nurses are employed and their work is supervised by the school nurse.

All public health programs have for their major aim the reduction of incidence of disease. This has been our policy here in Sanford in planning the program. Bedside nursing care to ill people and organizing and attending clinics and conferences has been the second part of the program.

Visits to ill individuals are made if the doctors order treatments or nursing care. 1,172 home visits were made to patients with acute illnesses. 439 visits to ones with chronic illnesses.

The maternity program consisted of visits to mothers before their babies were born and visits after the babies birth for the purpose of giving nursing care to mothers and babies. 604 visits were made to prospective mothers. This is an increase of about 50 per cent over the previous year. 206 visits to new mothers and 206 visits to new-born babies were given for nursing care.

The health supervision work with well infants and pre-school children continued. Visits of this type in no way replace a doctor's service. 577 home visits were made to mothers of these babies. We urged the mothers to go to their family doctors or clinics for immunization of their babies against contagious disease. Periodic physical examinations are stressed and assistance given in training and development of the babies.

Well baby conferences were held every Thursday afternoon in the vestry of the Congregational Church. 980 visits were made to these conferences by the mothers in our community.

No public health program can be efficient if the reduc-

tion of cases of tuberculosis is not considered. The main object of such a program is to have known contagious cases enter and remain in a sanatorium. At present writing there are six individuals from Sanford in the sanatorium. The second part of a tuberculosis program is one of case-finding and follow-up care to past sanatorium patients. 218 home visits were made in connection with this part of the work. A chest clinic was held here by the State Department of Health and 401 individuals were X-rayed. Reports of these X-rays were sent to the family doctors.

The project of the summer Health Camp gave care to 29 children from Sanford for a seven-week period. This year ends a ten-year period of holding camp. The attitude of families of children attending the camp has changed in regard to self-protection from diseases and a more definite sense of personal responsibility for prevention has been noted. The entire public health program of the community has been made stronger by the practical demonstration of preventive care.

Twenty-nine home visits were made to individuals with venereal disease. These cases were reported to us by the State Department of Health.

Assistance was given the health officer at monthly toxoid clinics. 105 pre-school children had the preventive treatment for diphtheria.

Visits were made to any individual on request. All health supervision work is done free of any charge to the patients. A charge is made for bedside nursing if the family can pay. If not the visit is free. The John Hancock Insurance Company and the Metropolitan Insurance Company pay for certain type visits for their policy holders.

1,202 visits were made free of charge.

Total number of visits made during the year were 3,593.

Respectfully submitted,

ROY F. GOOD, D. M. D.

President.

REPORT OF PARK COMMISSION

Honorable Selectmen:

Your Park Commission considers the fiscal year of 1946 one of the most successful in its history. A general beautification of all physical properties has been duly considered and generally completed. Approximately 25,000 children were ministered to during the past summer at our playgrounds. Fifty-eight trees were planted at necessary points in our town, thereby adding greatly to our civic beauty.

The National Recreation Society saw fit to elect one of our members to a Fellowship with all rights pertaining thereto, also honoring our town by giving our parks and playgrounds second position in the State of Maine from the standpoint of advancement and progress.

Your Park Commission sincerely hopes and desires to further the beautification process of our town during the days to come.

Respectfully submitted,

F. EVERETT NUTTER, Chairman
HARRY STOTT, Secretary
RAYMOND LORD

ANNUAL REPORT

Town Clerk and Tax Collector

January 1 to December 31, 1946

To the Inhabitants of the Town of Sanford:

Your Town Clerk and Tax Collector submits the following report of the year 1946.

REPORT OF VITAL STATISTICS

DEATHS

There were one hundred thirty-nine deaths (139) reported in this office for the year 1946.

This shows an increase of four (4) as compared with the year 1945.

Of this number, seventy (70) were of the male sex and sixty-nine (69) were of the female sex.

Of this number, one hundred two (102) were buried within the town and thirty-seven (37) were taken outside for burial.

In addition, nineteen (19) were brought in for burial.

We have had sixteen (16) stillbirths.

BIRTHS

There were three hundred and sixty-nine (369) births recorded in this office for the year 1946.

This shows an increase of sixty-nine (69) as compared with 1945.

Of this number one hundred and ninety-one (191) were of the male sex and one hundred seventy-eight (178) were of the female sex.

AUDITOR'S REPORT

To the Selectmen of the Town of Sanford:

The records of the Town Treasurer, Selectmen, Superintendent of Schools and the Town Clerk and Tax Collector of the Town of Sanford for the year 1946 have been audited weekly and checked with my records and are, I believe, correct.

The hearty cooperation of each department is very much appreciated.

Respectfully submitted,

MARGARET M. SHAW,

Auditor.

SCHOOL SIGNALS

The "No School Signal" will be sounded only on those occasions when concern for the pupils' welfare makes it imperative.

Local travel conditions are variable, not only in stormy weather, but also in the late fall and early spring. Parents are urged to keep their children at home, even when school is in session, if road conditions in their locality are particularly hazardous.

Signals

4 blasts blown at 6:45—

No School for the High School.

4 blasts blown at 7:45—

No School for the grades for the forenoon session.

4 blasts blown at 11:30—

No School for the grades during the afternoon session.

EDUCATION**REPORT OF THE
SUPERINTENDING SCHOOL COMMITTEE**

Citizens of Sanford:

It is our pleasure to submit to you for your approval the following report for the year 1946.

Almost daily we read of teachers demands for higher salaries in the various towns, cities and communities throughout the length and breadth of the nation. In certain localities teachers have even found it necessary to resort to striking in order to arouse school authorities to act in obtaining for them a proper and adequate salary scale, one commensurate with their needs and the rising costs of living. It is clearly recognized by all who think clearly and intelligently that wherever such a chaotic condition exists the morale of the entire school system of such an unfortunate community is considerably lowered and reaction is bound to follow which is definitely contrary to the immediate and ultimate good of the pupils, teachers and populace.

We can take justifiable pride in the fact that Sanford has avoided such an embarrassing calamity. Better expressed by the editor of the Sanford Tribune in a recent publication is the following testimonial, "That the School Board on recommendation of Superintendent McCarn saw fit to vote a \$200 a year raise WITHOUT A SPECIFIC REQUEST by the teachers is to its credit." To be more specific \$17,000 in cost of living bonuses were voted to teachers of Sanford effective January 1, 1947. Studying the situation carefully and in close harmony with the prevailing spirit of a fair living wage for the teachers the Superintendent and School Committee in the early fall of 1946 took the initiative and quite conclusively demonstrated to the Town Fathers the needs of the teachers and the school system with the resultant substantial increase in the school budget for 1947. The unanimous and wholehearted endorsement of the financially planned program presented by school officials to the Education Committee, the Warrant Committee and the Town Meeting Members should not go unmentioned or unappreciated. All worked zealously and harmoniously for the best interests of our school system. We are certain that such a policy of farsightedness and magnanimity meets with your approval and has likewise won the respect and admiration of neighboring communities and helped promote the cause of education generally.

In the preparation of the budget for 1947 not only were the economic needs of teachers thought of and provided for but the general and specialized education of each and every pupil was studied and analyzed from various points of view. You may be sure that provision has been made insofar as is

EDUCATION

possible with funds available to obtain proper facilities and competent personnel for the education of the boys and girls of Sanford.

All school buildings have been maintained with reasonable care and diligence with regard to their exterior and interior respectability. Essential repairs have been immediately recognized and attended to that the costly results of deterioration through neglect may never become an existing policy. Competent custodians have been placed in charge of our school buildings and have constantly shown a conscientious attitude in caring for school property.

Proper class room conditions for pupils and teachers alike has been a major objective of the School Department for such an atmosphere is always conducive to learning.

There are no overcrowded conditions in our schools. There is an abundance of books, supplies and equipment to insure the progressive and sound educational development of our pupils. There has been no stinting or niggardliness on the part of school officials wherever there was a question of essentials in educational procedure or method.

Adequate and comfortable bus transportation has been secured for approximately 500 youngsters who abide in places remote from their school. Neither have measures of safety been disregarded in their conveyance and pertinent school laws have been strictly enforced.

Since it is a quite evident conclusion that a school system is as good as its administrators and teachers, we can say with assurance and confidence from educational results and improvements noted that those in charge are competent, well trained and efficient. Good school standards are rigidly adhered to and a high level of achievement is the constant and continual objective desired and expected.

It is of course our chief concern and fixed conviction that the real purpose of education is achieved in the harmonious development of the physical, intellectual and moral life of each and every individual pupil who attends our schools. We are thoroughly convinced that there can be no wiser or sounder investment of the taxpayers' money than in such public institutions of learning which is the best means of guaranteeing the present and future preservation of our democratic system of government which constitutes the glory of our nation and the envy of the world.

Everyone in the community of course recognizes the need for a gymnasium if a proper physical education program is to be conducted satisfactorily and effectively. Likewise the need for an auditorium is completely understood by all who are interested in suitable educational development of students. This lack has existed for a considerable period of time; it has been mentioned before in other reports of former years.

EDUCATION

We believe that the time for action in this matter is now close at hand and we are confident that in the almost immediate future some very definite and tangible proposals for the construction and building of such an edifice will be forth coming from those who have assumed or are charged with this responsibility. Obstacles of whatever nature they may be must be met and overcome when the physical health and welfare of our youth are at stake. It is a course which every thoughtful citizen of Sanford will readily respond to and carry through to a successful conclusion.

Your School Committee and the Superintendent of Schools is thoroughly in sympathy with such a movement, namely the construction of a gymnasium and auditorium and will continue to exert all the influence at their command to further the immediate development of such a noble and worthwhile project which is so vitally needed.

We call your attention to the development of the educational program which has been arranged for veterans desiring to complete their high school career. Although modestly begun more than a year ago, a complete reorganization of this schooling for veterans was made this fall under the close supervision and advisement of Superintendent of Schools Robert H. McCarn, who was in frequent consultation and communication with the State Department of Education officials at Augusta and the Veterans' Administration at Togus. This resulted in the establishment of an extensive program of studies for veterans, with an entirely new time schedule separate from the regular day school classes and the careful selection of a director and teaching personnel of high calibre. Management of finances for such a program was satisfactorily arranged by Superintendent McCarn with representatives of the Veterans' Administration at Togus.

Although this program has meant many hours of extra administration work, careful planning, and lengthy deliberations on the part of the Superintendent and Superintending School Committee, without any remuneration to them, it is felt that if this may in some way compensate the veterans who served their country so heroically in the recent war, the extra labor and effort on our part is well justified. Seventy-five or more veterans are at present availing themselves of these opportunities offered. This is considered a large enrollment in a community of this size and probably unequalled in any other locality in the state.

Night School was in session for a period of fourteen weeks on a new schedule this year. There was an enrollment of 225. Notable achievements were made in the various courses completed.

Our vocational training program has been continued and new machinery and equipment procured which has tended

EDUCATION

to make students more receptive and enthusiastic in their specialized work. The Manual Training course was extended this fall to include a class at the Lafayette School.

Recent reliable statistics reveal that twelve million children throughout the nation are enrolled in substandard schools due to overcrowded conditions, inadequate facilities, or poorly qualified teachers and that two million more children are not enrolled in any school whatever, that in some places as low as \$12 per child per year is spent on his education. By way of comparison with our town of Sanford we can feel consoled in the fact that rather ample educational opportunities are at the disposal of those who attend our public schools.

Respectfully submitted,

FRANCIS A. PROULX, Chairman

CARL J. BROGGI

ROSAIRO J. TREMBLAY

EDUCATION

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Citizens of Sanford:

First of all may I say, that the splendid support and continual co-operation which you, the citizens of Sanford, have given to me since I have assumed the office of Superintendent of Schools makes me feel most grateful.

During my short administration thus far, what has been accomplished in the school system of Sanford is in large measure to be attributed to the intelligent and generous attitude of real helpfulness and interest which you have shown at all times in all matters concerning education. **WORKING TOGETHER WE CAN DO MUCH: WORKING ALONE WE CAN DO LITTLE.**

As you are well aware the duties and responsibilities of a Superintendent are many. He must select and organize a competent staff, develop a curriculum or program of studies which will meet present needs and finally, see to it that the schools and their equipment are being properly cared for and maintained. Educational methods must be thoroughly understood and recent findings, revealed through educational research, must be effectively applied to the schools in his system.

Furthermore, it is the prerogative of a progressive Superintendent to advocate a particular educational plan based on sound principles and one which has the support of the community.

The following are some phases of such an educational program which leading educators throughout the country heartily endorse and one which seems reasonable and intelligent. I trust such principles of education will win your favor.

1. Pupils should be trained to live the fullest personal life and be thoroughly exercised in the fundamental processes of learning.

2. As future citizens, pupils must learn through training to become positive members of society.

3. Faith in the "American way of life as embodied in the Constitution of the United States and in our democratic institutions" must be strengthened in them daily. To this end it is generally considered by most modern educators that "our social-studies curriculum at all levels, is in serious need of revision . . . That the problems of local, national and world governments may be more frequently recognized and more intelligently understood and met."

EDUCATION

4. There must be more CHARACTER education in our whole school program.

5. Although much is being done there is need for continuing emphasis upon vocational, industrial and health education.

6. We must encourage the continuation of our Night School program and endeavor still more to expand this adult educational program.

7. Our Veterans' School is exceptionally fine in Sanford and it has merited praise from various sections of the state. It is a very important and wholesome program of high educational value.

8. The advent of atomic power must doubtless have a significant place in our present educational set-up.

9. Finally the realization of these aims, namely the quality of education available to children, depends upon the COMBINED EFFORTS of parents, citizens, teachers, administrators and community leaders. Long-range co-operative planning is the best.

In analyzing the school system of Sanford at the present time, it is generally recognized that our teachers are efficient and progressive. Our salary scale is quite satisfactory and is based upon training and experience.

New instructors hired during the past year for the high school include Daniel Alvino, Charles Towle, Ethel MacNeill and Evelyn Tondreau. In respective order they are teaching, Science, English, Home Economics and French. They are replacing Joseph Yuknis, Mary Samways, Evelyn Knight and Henri Casavant. Lawrence Page was elected as principal, replacing Bertrand Hayward.

In the elementary schools new teachers employed were: Margaret Dow, sub-primary at the Longfellow School; Cora West, 5th grade at the Hamlin School; Roger Dow, 6th grade at the Hamlin School; Muriel Washington, grade 3 at the Lincoln School; Ruth Higgins, grade 3 at the Edison School; Lawrence Arnold, science and physical education at the Emerson School; Edith Corliss returned to the Lafayette School.

Truancy in our school system has been kept at a minimum through the excellent co-operation of our attendance officers and our police department. As a result there has been little juvenile delinquency in Sanford. This is an excellent indication of a good school system.

All requisitions for needed books, supplies and equipment which have been made by principals, supervisors or teachers have been complied with.

Especially worthy of mention are achievements made by pupils in art, music, dramatics, home economics and vocational training courses.

EDUCATION

In spite of existing difficulties our departments in physical education, athletics and health are outstanding. The lack of a gymnasium and auditorium is unfortunate. This is a real handicap in any school system. Our students cannot compete with other schools on a fair basis in either athletics, dramatics, public speaking or other interscholastic contests. Morale of the entire system is considerably weakened and teachers are continually laboring under a particular hardship. Ways and means must soon be found to eliminate such a serious situation already too long neglected. When action is taken in this matter we are certain it will have the unanimous support of the entire community.

Our guidance program is in the process of more expansive development.

Our grade supervisor has made notable progress in eliminating educational deficiencies whenever they exist in our system.

Our enrollment has increased over last year. We have 1,800 students now attending our public schools.

Our system of transportation and conveyance of children is being handled very efficiently.

Our school buildings and grounds are being permanently improved whenever possible. We call your attention to the new outside basketball court in the rear of the High School and the new asphalt walk at the Lafayette School. Work has also been done on the grounds at the Edison and Lincoln Schools. The Hawthorne School has been newly painted on the exterior and interior as well.

I have mentioned only a few of the accomplishments in the past year. More detailed information will be found in the following individual reports of the directors, principals and supervisors.

Suitable housing conditions for teachers has become almost a major problem of the School Department. Several excellent teachers are finding great difficulty in securing proper living quarters in Sanford. To retain a competent and permanent teaching staff is evidently most desirable. Some communities have found it necessary and practical to provide housing facilities for teachers. This might be a feasible solution if no other remedy is forth coming.

In conclusion, let me say that it has been a pleasure to work with the people of Sanford and I wish especially to thank the School Committee, principals, supervisors, teachers and custodians for their loyalty and co-operation.

Respectfully submitted,

ROBERT H. McCARN,

Superintendent of Schools

EDUCATION

SCHOOL NURSING REPORT FOR 1946

To the Superintendent of Schools:

The school nursing program has been carried on this past year with the welfare of the individual child in mind.

One change instituted during the year has been in our health record system. Now, we have a health record giving continuous information about the child from sub-primary grade to senior year in high school. These records have been started for every sub-primary child in the public and parochial schools. They are left in the schools and available to the teachers for information about their children.

At the first of the school year meetings were held with new teachers in the grade schools, acquainting them with the health program.

A change of policy in physical examinations was made. Every child in the sub-primary, fourth, seventh grade and sophomores in high school in the public schools received a thorough physical examination. Also, the sub-primary and freshman high school girls in the parochial schools received such an examination. Referrals to the family doctor as a result of these examinations were as follows:

- 65 advised to have tuberculin test (tests done and 27 found to be positive)
- 10 advised to consult neurologist
- 78 advised to consult because of throat condition
- 36 advised to have heart examination
- 3 advised to have blood pressure re-checked
- 10 advised to have urinalysis
- 3 advised to have corrective posture

These examinations are of value only to the extent to which they are followed and correction secured. The families were notified if further care was needed and a check will be made during the coming year to see if recommendations are carried out.

Each sub-primary child was given a copy of the rules of contagion to bring home so as to acquaint the families with our policy and the state law. Prevention of contagion can be controlled only by a co-operative program of the family and school department.

Audiometer testing for children in the third, fourth, fifth, sixth, seventh, and eighth grades was given. Twenty chil-

EDUCATION

dren were found to have such low hearing that their school work and social adaptation is difficult. I recommend, as I have in previous years, that lip reading be made available for these students.

The program for prevention of tuberculosis has continued. Eighty-six home visits were made to children who have been in the sanatorium and to children whom are contacts of active tuberculosis. At the request of a family physician arrangements were made for the admission of two children to the sanatorium. Eight hundred five students were given the tuberculin patch test and 56 of these had positive tests. These positive reactors had chest x-rays. Four hundred one individuals were x-rayed at the chest clinic sponsored by the State Department of Health.

The Milk Fund sponsored by the Searchlight Club and Springvale Women's Club continued to supply milk to needy children unable to buy their own. This project is appreciated and we are grateful to the two clubs for their assistance. Children able to pay for milk are urged to do so—so as to supply extra needed nourishment in the mid-morning.

First Aid cabinets are kept equipped in all the public school buildings. Fifty-one treatments were given by the nurse for first aid care.

A visiting psychiatrist gave a talk to 40 mothers on behaviour problems and emotional development of the child. Eleven mothers had individual conferences with this psychiatrist. Ten teachers had conferences concerning problems connected with a particular student. Individual conferences were held with seven high school girl students. This psychiatric advice has proven to be of great value. It is my sincere hope that such a service can be increased.

Three hundred thirty-eight sub-primary and first grade children received toxoid for prevention of diphtheria at clinics held in the school buildings.

Also, assistance was given at a vaccination clinic held by the health officer. Fifty-two children were in attendance.

Forty-six children received dental care at dental clinics. Children not attending these clinics are urged to go to their family dentist.

Eye examinations as advised by the State Department were given in the elementary grades. The teachers gave the initial examination and the nurse re-checked ones as asked. Notices were sent home and at the present writing 90 per cent of children advised to visit an eye doctor have done so.

The Women's Board of the hospital and Women's Auxiliary

EDUCATION

and local doctors help our program by caring for removal of tonsils at clinic rates, and children from families unable to make full payment. Seventeen children were cared for at these clinics.

Ten children visited the Crippled Children's Clinic in Portland.

Twenty-nine selected Sanford children were given continuous 7-week care at the Health Camp sponsored by the Community Health Association. Two of these children were post-sanatorium patients, four had heart conditions, five had had rheumatic fever, one had a skin condition, four suffering from malnourishment, and 13 had a primary chest infection. These children are taught how to live in the winter and followed closely during the school year. Attendance at school is increased by this care.

Eight talks were given to various organizations concerning the health program carried on for our children.

Three hundred fifty-eight visits were made to school rooms for consultations with the teachers. Fifty-three home visits were made to ill children and one hundred sixteen home visits for the purpose of health instruction. Two hundred sixty-nine visits by parents and children were made to the nurse's office.

Respectfully submitted,

LAURA E. TABOR, R. N.

EDUCATION

REPORT OF PRINCIPAL OF HIGH SCHOOL

To the Superintendent of Schools:

It is with pleasure that I present to you my first report as principal of Sanford High School.

I have in past years heard reports of the excellence of Sanford's school system and I have found these reports not at all exaggerated. I would doubt if, in our State of Maine, there is a better organized or more forward looking system.

The enrollment of the high school as of October 1 was 585. The usual fall loss has taken place, thirty students having left for various reasons—financial need at home, transfer to other schools, enlistment in the armed forces, etc.

In assuming the principalship, the first requisite was an over-all picture of the education taking place, a determination of the educational philosophy of the past administrators and of the present classroom teachers and the setting up of educational objectives in the light of our own philosophy of education.

The measure of our success as a school depends not simply on the number and accomplishment of the boys and girls we send to college but by the degree to which we develop in Sanford High a program whereby every boy and girl, regardless of type of ability or talent, can profit by the education given. This means not only the finest preparation possible for our college group but as adequate a training for that 80-90 per cent who will not be able to avail themselves of a higher education. We must see that our school continually measures up to our broad aim—preparation for life.

Curriculum

We must continually revise and strengthen our curriculum if we are to keep pace with the rapidly changing world of today, keeping in mind, however, that change for the sake of change alone does not necessarily mean progress. Guidance, so important in a modern school of this size, must be broadened so that all students may feel its effects.

Extra-Curricula Activity

We must attempt to broaden our extra-curricula activities to include more and more students so that a much greater number may benefit from lessons learned from those activities.

Band

It is a pleasure to report that the band has more than

EDUCATION

doubled in numbers and is showing rapid progress under the leadership of the director, Everett Firth, and the assistant director, John Cella. A new policy is being followed—the band meeting during school hours as a group once a week and then dividing into sections for class work. In addition many of these boys and girls are taking private lessons outside of school.

A drive for new uniforms has been very successful due to the generosity of Goodall-Sanford, Inc., the interest of the Band Boosters and the unqualified support of the citizens of Sanford.

Dramatics

Although severely handicapped by the lack of an auditorium, an effort is being made under the direction of Miss Marjorie Vallely to broaden the dramatics program to include all students desiring to express themselves through this medium.

Physical Education

The physical education department, under the able direction of Miss Margaret Wood and Mr. Justin Nunan is being carried on extremely well though handicapped, probably, to a greater extent than any other in the state by reason of the lack of a gymnasium. Especially praiseworthy is Miss Wood's voluntary girls' program carried on after school. Under this program she has basketball, volley ball, bicycle riding, hiking, winter sports, bowling, softball, golf, and tennis culminating in a certificate from the State Department of Education and a school letter.

Athletics

Football has enjoyed a good season under the inspiring leadership of Coach Alvino. Many more boys than usual have participated in this sport and the whole school has benefitted by the excellent morale so evident in the squad.

Basketball has been handicapped more than any other sport by lack of facilities. Sanford this year has had excellent material and an outstanding coach in Mr. Henry Deetjen. Such a combination, with a suitable gymnasium, would have been a financial asset to Sanford High. As it is, basketball has been carried on at a loss when many schools largely finance their entire sports program by returns from this sport. The policy of "athletics for all" is an empty promise without the facilities and the necessary revenue.

In addition to the baseball team, an attempt will be made this spring to organize a track team, the first in several years. There are several reasons for such a team, the primary purpose to give more boys an opportunity to take part in some form of athletics. It is hoped, too, that other athletic teams with carry-over value in civilian life can be instituted.

EDUCATION

Auditorium-Gymnasium

As noted above, there is a desperate need for an auditorium and a gymnasium as part of the high school plant. This is well known to all Sanford citizens and it is reasonable to suppose that in the very near future they will see that their boys and their girls have those facilities so vitally important to any well rounded school program.

This world has been torn by a conflict that has no equal in history. We must make sure, now that it is over, that the world does not even now destroy itself before it educates itself. Education must permeate the whole world and in a reasonably short time. We who are charged with the education of youth must be certain that our school does its utmost to help our boys and girls grow in knowledge and in character, to be courteous, dependable, and honest. All of our school activities, if they are to justify their existence, must contribute to this end.

My deep appreciation goes to school officials, to teachers, and to citizens of Sanford for their very hearty cooperation during my first half year as principal of Sanford High School.

Respectfully submitted,

LAWRENCE L. PAGE,

Principal.

EDUCATION**REPORT OF THE
ELEMENTARY SUPERVISOR**

To the Superintendent of Schools:

I submit my annual report as Elementary Supervisor.

There are thirty-eight elementary teachers in the sub-primary and first six grades in Springvale and Sanford. Approximately 1,000 pupils are registered in these grades.

The enrollment of sub-primary children has greatly increased in the Lincoln, Longfellow and Lafayette schools the past year.

Many teachers and parents feel that children do more efficient work, and are happier, if they enter school at five and a half or six years of age. Many failures in the grades and high school are due to immaturity.

We are making an effort in the lower grades to provide extra work for the very bright child as well as for the average child. For this reason the teachers and pupils enjoy the new text books which are being placed in the various schools.

The services, which the librarians are rendering in both communities, are much appreciated by all school people. The reading of additional books by children greatly adds to their efficiency in their studies.

In conclusion I would like to express my appreciation to you, to the members of the School Committee, and to the Principals and teachers for the cooperation which I am receiving.

Respectfully submitted,

EDITH E. LESLIE,

Elementary Supervisor.

EDUCATION**REPORT OF
MUSIC SUPERVISOR**

January 25, 1947

To the Superintendent of Schools:

I herewith submit my annual report.

Music, like languages, is first introduced to the individual through the ear. The child in his pre-school years has heard much music in the home from his family group or perhaps from the radio or phonograph. Many children will have acquired quite an extensive repertory of songs which they will sing with little encouragement. Children often sing before they talk, imitating musical sounds before they make word sounds. Other children with no opportunity to develop musical feeling in their homes, come to school at the age of five or six with comparatively no ability of musical expression. Consequently, music in the first two years of school, sub-primary and first grade, should be given over almost entirely to rote experience.

After the introductory study the child's musical vocabulary is expanded through songs employing thirds outside the key chord. His sense of rhythm has been developed through the use of singing games, dances, and rhythm chants. Duration of time is felt and interpreted through feeling rather than through mathematical division of melody.

By the end of the third grade children will have acquired some or all of the following:

1. Pleasure in musical expression.
2. Use of the large motor centers in rhythmic play.
3. Correct use of the singing voice.
4. Repertory of songs,
5. Tonal vocabulary.
6. Creative skill.
7. Instrumental adaptability.
8. Pleasure in listening to music.

Now the children are ready for extension of their skill and knowledge of music through the intermediate grades on to the junior high level and into the high school.

The Hamlin, Emerson and High School Glee Clubs participated in the Western Maine Festival held here in Sanford last May and received excellent ratings as did the orchestra,

EDUCATION

junior and senior high school bands. The Hamlin and Emerson Glee Clubs were ably assisted by Miss Louise Frohock as accompanist and the High School by Miss Louise Mallinson, accompanist. Mr. William Hayden was the director of the High School Band and Mr. Everett Firth directed the Junior Band.

The Junior Band attended the New England Festival in Gloucester and received ratings of which we may be very proud.

Aside from the festival, which is the event of the school year, these units made other public appearances, assisting in programs for the various service clubs and giving their customary concerts and musicals.

In conclusion, I wish to express my appreciation to you, to members of the School Committee, and to the teachers for the help I have received this year.

Respectfully submitted,

ALCADA HALL,

Supervisor of Music.

EDUCATION

REPORT OF THE ART SUPERVISOR

To the Superintendent of Schools:

I herewith submit my annual report as Supervisor of Art.

In past generations Art Experience was thought to be the heritage of the chosen few having talent. Today the concept is quite different. Art must be attainable for all through a well-balanced program in the schools. Although few people plan to make a living through Art, the higher standard of living which is becoming accessible to all bring Art into practically every phase of life. There is a distinct upward trend in homes, dress, the development of community planning; the artistic phases of motion picture art; the modern magazine; the wide range of products of industry for everyday use and countless other phases of daily living. The modern school should provide an interest in Art which will carry over into the immediate life of every child and raise his standards of taste and judgment, not only in the school, but in the home and the community. The attendance of the teachers at summer sessions and also their personal research is assisting in the development of this concept. The unit method of teaching which is used extensively in the schools embraces many kinds of Art activities which provide for individual differences, develop richness of experience and contribute toward a well-rounded personality.

Following are the four major fields of Art experience which may be included in a unit of work:

1. Graphic expression—
Drawing, painting, lettering.
2. Design—
Selecting and arranging, creating and decorating.
3. Craft and Construction—
Making articles from wood, clay, cloth, etc.
4. Appreciation—
Observing, discussing, choosing and arranging.

In addition to the unit activities, seasonal problems such as gifts and cards are prepared to take home, and much free expression is being developed in drawing and painting in both the elementary and junior high schools.

Through the solution of Art problems which arise in connection with these everyday activities in school all the children should not necessarily become artists but each should develop the habit of "considering the looks" of everything he makes and does. He acquires simple standards of good

EDUCATION

taste, becomes sensitive to the beauties of simplicity, to the satisfaction of ordered arrangement, enjoys harmonious color, fine proportions, interesting accents in all things and so should carry these standards of taste into his home and community.

The high school class is elective, meets daily and is a full credit course. It is attended largely by students with more than average ability in Art. We are currently enjoying new text books from which are carried on outside assignments.

The work this year began with experiences in abstract design, dealing with space relationship and an understanding and appreciation for some phases of modern art.

A large mural has been completed for the cafeteria. This was made in conjunction with the student council and their endeavor to make improvements in conduct and appearance of the dining hall.

The submittance of a poster to the Annual Book Week Poster Contest sponsored by the Sanford and Springvale Libraries was a fall project. Many posters are also made by various members of the class to advertise school activities.

Expansive decorations in the form of murals to decorate the town hall for various festivities, scenic backgrounds and props are painted in the art room.

At this writing the concentration is on the handling of watercolor with emphasis on the use of figure drawing in graphic expression. Several members of the class are working on compositions which are to be submitted to the nationwide Ingersoll Art Award Contest conducted by Scholastic Magazine.

In conclusion, I wish to thank you, members of the School Committee and the teachers for the helpful cooperation that I am receiving.

Respectfully submitted,

HAZEL M. HARRISON,

Supervisor of Art.

EDUCATION

REPORT OF THE GUIDANCE DIRECTOR

To the Superintendent of Schools:

It is with pleasure that I submit my report on the guidance activities in the public school for the year ending December 31, 1946.

A word of explanation as to the nature of guidance in the schools is probably necessary as this program is a recent innovation in the Sanford schools, although it is commonly included as an integral part of school systems in other states. The purpose of the guidance program is to help the young people discover their own abilities and aptitudes and to direct them along lines which will make the maximum use of them.

During the early part of 1946, veterans were returning to Sanford in large numbers. Many of these young men and women wished to take advantage of the educational benefits of the G. I. Bill and continue their education. Others desired information about occupations, job opportunities, training required for particular lines of work, and other allied information. Large numbers of veterans suddenly thrown back on their own resources had little or no idea as to what they wished to do or for what lines of work they were qualified. Faced with this situation, the school board and superintendent directed this office to devote the large part of its time to counseling returning servicemen. I should like to mention this phase of the work as I believe Sanford, through such agencies as the veterans' counselor, citizens' committees, and public schools, has done an outstanding job in assisting veterans to reestablish themselves in civilian life. I know of few other towns where so much attention has been given to the problems of returning veterans.

During the past year about 300 veterans have taken advantage of the guidance services offered by the public schools. Over 175 of these have been given complete batteries of aptitude tests and extensive counseling. Over 60 young men and women have been placed in colleges and technical schools, such as the University of Maine, University of New Hampshire, Boston University, Bryant College, Wentworth Institute, Vesper George School of Art, and Massachusetts School of Optometry, to mention a few. Assistance was given to several young men in finding jobs, although the majority of these cases were referred to other offices. The Veterans' Administration, U. S. Employment Office, and particularly the local Veterans Guidance Counselor, Mr. George Shalhoup, have

EDUCATION

cooperated very closely with the school department in making the guidance facilities available to the veteran.

Although veterans received first consideration during the early part of the year much progress was made toward the establishment of a guidance program in the public schools. The following things have been accomplished during 1946.

1. An extensive testing program has been established in the high school. Intelligence, mechanical aptitude, clerical aptitude, reading, achievement and interest tests are included in the battery.
2. A library of occupational information has been set up for use by students and teachers.
3. A large amount of literature on educational opportunities has been collected and catalogued for use. Information is available about any type of school that a person might be interested in attending.
4. In the spring complete batteries of tests were given to the eighth grades and the freshman programs of study were based in part on the results of these tests.
5. Students having difficulty in school have been contacted and counseled in an effort to solve their school problems.
6. Working with the principal of the high school, a study is being made of the existing high school curriculum with the purpose of revising it if necessary to better meet the needs of the pupils.

This is only the beginning of the establishment of an extensive and workable guidance program in the Sanford Schools. To date only the preliminary spade work has been done. We hope to see the program extended farther down into the grade schools. On the high school level the final aim of the guidance program is to provide intelligent individual counseling for every boy and girl based on the use of test results, personal observation throughout his school career, scholastic achievement and up to date, reliable occupational and educational information.

Respectfully submitted,

DONALD PARTRIDGE

EDUCATION**REPORT OF
PRINCIPAL OF EVENING SCHOOL**

To the Superintendent of Schools:

I herewith submit my report of Evening School for the year 1946.

The new plan of opening evening school earlier in September and closing at Christmas, a period of fourteen weeks, proved very satisfactory. Travelling conditions during this period are much better than during the winter months. I believe that another year this plan should be continued.

Evening school opened with an enrollment of 225, divided into the following:

Americanization	Bookkeeping
General Shop: Wood Work,	Business Machines
Metal Work, Electricity	Shorthand
Preparation and serving of	Typewriting
foods	
Millinery	Discussion Panel: The social
Dressmaking	and economic problems of
Rugmaking	the world
Mathematics	

The largest enrollment was in the following classes: rug-making, dressmaking, and general shop. The rugmaking class had the highest percentages of attendance for the entire course.

An exhibit of the fine work done by the members of the rugmaking class was on display at the Maine Central Power Company and I wish to thank the Power Company for permitting us the use of their window for this display.

I wish to express my appreciation to you, to the teachers, the students, and all others who helped to make the school year so successful.

Respectfully submitted,

ITHEL E. PRESCOTT,

Principal of Evening School

EDUCATION**REPORT OF
DIRECTOR OF HOME ECONOMICS**

To the Superintendent of Schools:

During the past year two types of home economics work have been given.

The vocational program extends over three years and offers an intensive study of different phases of home economics for freshmen, sophomores, and a combined group of juniors and seniors. Units in this study include foods and nutrition, clothing and textiles, home nursing, home management, home improvement, consumer problems, family relationships and child care. Double periods, making possible a great many practical experiences, are given daily throughout the year.

The other type of home economics is of a general nature, offered daily for one period, and is intended for girls from the commercial and general courses. This course covers training in personal and social living, personal appearance and grooming, nutrition and health, consumer problems, child care and vocational opportunities. During the past year these classes have been made up largely of sophomore and junior girls.

A project in connection with child care and training was the play school covering a period of six weeks last April and May. This was very successfully planned and conducted by Miss Evelyn Knight. Other special projects were canning and preservation of food, home nursing, quantity cookery, and a boys' cooking class.

In September, Miss thel MacNeil, B.S., a graduate of Farmington State Teachers College came as assistant in the department and is taking charge of the work in clothing and related units of work.

There is a need for more extensive home economics training among the girls in this community, and in order that such training may be given, the entire program is being revised to make it possible for all high school girls to take these studies sometime during her course.

In conclusion I wish to express my appreciation to the Superintending School Committee, to the Superintendent, Principals, and all who have helped in the department for their interest and cooperation.

Respectfully submitted,

BLANCHE C. PHILBRICK

ANNUAL REPORT

Of Selectmen and Overseers of the Poor

January 1 to December 31, 1947

Sanford's Municipal Officers deem it a pleasure in making this 1947 Annual Report. The analysis of the different expenditures found enumerated within the following pages of this report should be a helpful medium by which all civic minded and interested citizens can follow the administration of your town affairs.

In our estimation, we, in the Town of Sanford, have fared fully as well as any other community in progressiveness and prosperity in 1947, for we seemed to have maintained a true and steady forward stride throughout the year. For one feature, surely we should be very thankful that by the Grace of God we were spared so generously from the pitiful disaster which so recently ravaged most of our neighboring communities. We should also give thanks for the guidance, courage and facilities at our disposal that made it possible to render some degree of assistance to those menaced by that terrible, destructive element.

It seems to be generally conceded that rising costs have been a very prime factor in our lives, businesses and governmental functions; therefore, it has been instrumental in the curtailment of many progressive services which would have been beneficial to our community. Also, we have felt considerable hesitancy in making expenditures for replacements that in normal times would have been procured to make for betterments within some departments. We sincerely hope that our judgment and actions in that respect will receive your sanction and will eventually prove for the best. Our policy in times such as we are now functioning under is of careful procedure, so that we may always be prepared for emergencies if any should arise. It may be a good thought to bear in mind that the initial cost of all government begins in the local communities, and that whenever the Federal or State governments no longer can assist, the burden falls back upon the individual communities. We are now confronted by such a situation occasioned by adjustments made within the State

Department of Health and Welfare and by the last Legislature which effects a reduction in nearly all Old Age Assistance, Aid to the Blind and Aid to Dependent Children. Any medical aid in those categories is no longer available from the State and fuel allowances and clothing costs were reduced, making necessary purchases almost prohibitive under the allowed budgets, and so it becomes the responsibility of the town welfare department to furnish supplemental aid to meet these urgent needs.

There is one important matter we would like to bring to your attention and that is our endeavor to acquire mechanical equipment for the Highway Departments in order to accomplish some of the necessary public services, such as snow removal and street construction, also maintenance work in these departments at a minimum cost. We realize that from year to year much more is anticipated from those departments in the line of services and sometimes the additional cost of such services is not seriously considered by some citizens.

Finally may we sincerely thank everyone for the fine spirit of cooperation in this community as a whole, for we realize that all are really interested in the progress made in this trying March of Time. Also, our sincere thanks to all department personnel, for they have accomplished all tasks in a creditable manner. May the over all results be well considered by those who have entrusted their Municipal affairs to us.

Respectfully submitted,

ARTHUR M. CARIGNAN,
MAURICE J. MAURICE,
MOORE GREENWOOD,

Selectmen, Assessors and
Overseers of the Poor.

REPORT OF THE VETERANS' GUIDANCE COUNSELOR

January 22, 1948

To the Citizens of the Town of Sanford:

The work of the Veterans' Guidance Center of the Town of Sanford in the year 1947 continued in importance and value to the average veterans of the wars and their families who are residents of Sanford and Springvale.

The gross number of cases and requests for service handled by the Center lessened somewhat during 1947 as compared to the figures for 1946. No attempt will be made to quote exact figures, except to state that the volume of work fell off 26.6%. Exact figures are available on request.

However, veterans' claims and requests for service in 1947 required a greater degree of effort and research for development. This was due mainly to increased time since discharge, loss of valuable papers and evidence on the part of the veteran, regrouping and reorganization of government agencies and other causes.

Due to the failure of the last annual town meeting to appropriate funds for further maintenance, the Center closed its doors at the close of business on December 31, 1947.

In closing, the undersigned wishes to express his thanks and appreciation to the many citizens, industrial firms, merchants, executives, the Sanford School Department and its teachers and others for their splendid help and cooperation, unhesitantly extended, whenever asked for by the Veterans' Guidance Counselor for the welfare of our veterans of the wars and their families.

Respectfully submitted,

GEORGE E. SHALHOUF

REPORT OF THE BOARD OF ENGINEERS OF THE SANFORD FIRE DEPARTMENT

January 21, 1948

To the Municipal Officers of the Town of Sanford

GENTLEMEN:

The Engineers of the Sanford Fire Department submit the following report:

Although we answered only 24 bell alarm fires, we had a busy year. This was due to the extremely dry season in our forest lands.

This past year we worked on the most serious forest fire that has been known in the history of the State of Maine. This fire covered an estimated 150,000 acres and many homes were lost in the neighboring towns. There was only about 600 acres of this fire in the town of Sanford, although it came along the entire northern and eastern boundaries of our town. We feel proud that through the efforts of our fire departments, with the excellent help of our entire citizenry, our oil dealers, our Salvation Army, our Red Cross Chapter, our social organizations, our Police Department and our Selectmen we were able to save all of Sanford's taxable property. We are sincere when we say we appreciate this type of cooperation.

The small number of bell alarms this past year can be attributed to the semi-monthly rubbish collections by our Highway Department. This is wonderful work and may it always continue.

We have issued 1,000 permits for oil storage. The requirements of permits has caused nearly all the second, third and fourth floor oil storage to be done away with. This greatly reduces your fire hazards.

The fireworks section of the ordinances caused a minor amount of controversy last year. However, we all agree that, if the hand or a finger of one child was saved, this section is very valuable. The City of Lewiston, Maine has adopted similar fireworks regulations after several bad accidents last year.

Our Aerial Ladder Truck will be delivered early this year, and our Tank Truck is nearly ready for delivery now. The Town of Sanford will by spring have equipment surpassed by no town in the state.

We appreciate the wonderful cooperation given us by our Warrant Committee and our Selectmen, and we assure you that we will prove the worth of the equipment and the extra men you gave us with which to work.

Sincerely submitted,

CURTIS ALLEN, Chief

CHARLES C. CHADBOURNE, 1st Asst. Chief

BERNARD H. CHADBOURNE, 2nd Asst. Chief

PROTECTION OF LIFE AND PROPERTY**REPORT OF THE CLERK OF THE SANFORD
FIRE DEPARTMENT**

January 1, 1948

To the Municipal Officers, Town of Sanford, Maine

I hereby submit the following report of the Sanford Fire Department for the year 1947.

The Department has responded to 327 calls, 285 still, 28 bells, 5 house calls and 9 fire drills.

Estimated value of property endangered	\$350,365.00
Damage to property endangered	11,533.04
Insurance paid on property	10,733.04
Net Loss	800.00
Total feet of hose laid	47,165
Total gallons of chemical used	30
Total feet of ladders raised	1,556
Miles apparatus traveled	2,020

Respectfully submitted,

GEORGE F. FERGUSON, Clerk.

PROTECTION OF LIFE AND PROPERTY**REPORT OF THE BOARD OF ENGINEERS OF
SPRINGVALE FIRE DEPARTMENT**

To the Board of Selectmen:

The Board of Engineers of the Springvale Fire Department submit the following report for the year ending December 31, 1947.

This year has been an exceptional year in our Fire Department owing to the forest fires this fall. We had 243 alarms during this year.

We installed the new Vigilarm System in the Sanford High School which is tied in with our fire station. Within 20 seconds we would receive the alarm and respond. It is a fine system and we recommend that all schools and public buildings be equipped with the Vigilarm.

We installed our new fire whistle and fire alarm system and switchboard this year, and by spring our station will be ready for the Fire Underwriters to come here and give us a better classification for lower insurance rates.

We also purchased a jeep which we know proved a great value in the recent forest fires. We carry a portable pump and 300 feet of one and one-half inch hose and it will be a saving on our fire trucks.

At the present time our apparatus and equipment are in excellent condition in our station. We installed an oil burner this year.

The Board of Engineers wish to thank our firemen for their splendid cooperation in the recent emergency last October. Also every civilian in the town who helped in any way during the fire. The Selectmen, Police Department and Sanford Fire Department for their fine cooperation in helping us during the crisis. We also wish to remember all the outside fire departments that came to our aid.

We also wish to thank all the women who worked so many long hours in feeding the civilian fire fighters and firemen.

The working hours in the emergency was 11,678 man hours. We are proud of the people in our town who backed us a hundred per cent in our efforts.

We hope that when legislature convenes laws will be passed that will help to prevent another crisis like the past year.

We also wish to thank the permanent men, firemen and road commissioner for their help this year.

Respectfully submitted,

HARRY MARSHALL, Chief
CHARLES A. WINSLOW, Assistant
HAROLD BALDWIN, Assistant

PROTECTION OF LIFE AND PROPERTY**REPORT OF THE CLERK OF SPRINGVALE
FIRE DEPARTMENT**

December 31, 1947

To the Municipal Officers of the Town of Sanford, Maine:

I hereby submit the following report of the Springvale Fire Department from January 1 to December 31, 1947.

The department has responded to 243 alarms, consisting of 219 stills and 24 bells. The company also had six drills.

REPORT OF THE HEALTH OFFICER FOR 1947

To the Selectmen, Town of Sanford, Maine

GENTLEMEN:

As Health Officer for the Town of Sanford from January 1, 1947 to January 1, 1948, I herewith respectfully submit a report of health activities during the current year.

Children in the public and parochial schools of Sanford and Springvale were given physical examinations. When disease or defect was noted the parents were notified of the condition found or suspected and advised to procure medical aid for the child.

All school children having consent of parents were vaccinated against smallpox and inoculated against diphtheria. A total of 658 were vaccinated and 722 were inoculated. In addition monthly clinics were held for the vaccination and inoculation of pre-school children.

Eye examinations were given to children in the primary grades. Dr. Kenneth J. Kornetsky graciously offered his services for these examinations.

All school and clinic work was under the supervision of Miss Laura Tabor, R.N., who certainly should be commended for her zeal and interest in these activities.

As town physician, welfare and old age assistance cases whose grants were inadequate to allow for medical expenses were given medical and surgical care. This entailed visits to the Town Farm, homes of patients, and "rest homes," some of which are located as far as Lebanon and Shapleigh. State children who are boarded out were also treated as the need arose. In carrying out these duties 433 house calls, 327 office calls, 54 visits to the Town Farm and 55 hospital visits were made.

Nuisances and infractions of sanitary and plumbing laws were investigated as complaints were received. These were dealt with forthwith or brought to the attention of the proper authorities. By far the most frequent sanitary problem complained of was the garbage disposal situation. Because of the inadequacy of the entire garbage disposal system little could be done to remedy this situation.

A health problem which should receive immediate attention is the Lower School Street sewer outlet. When level of water is low the smell and appearance of this outlet is a public disgrace plus a possible dangerous health problem.

I take this occasion to remind you, as my predecessor did in the past, of the overcrowded condition which exists at the Town Farm. The present building is totally inadequate for the needs of a town the size of Sanford.

Few contagious diseases were reported during the year. One must not conclude from this that the number of such reportable diseases has greatly decreased but rather that, when such diseases occur, they are simply not reported. Contagious diseases are required by law to be reported to the local health officer. Failure to do this renders it extremely difficult to control such diseases.

In conclusion I wish to express my sincere thanks to the welfare and school nurses and to Mr. and Mrs. Drowns for their help and cooperation during the year.

Respectfully submitted,

A. S. LINCOURT, M. D.

1947 NURSING REPORT OF THE COMMUNITY HEALTH ASSOCIATION

Following is a report of activities of the nurses employed by the Community Health Association.

Bed-side nursing visits included baths to bed patients, changing of surgical dressings, hypodermics and treatments. 1,527 visits of this type were made to individuals. All patients receiving such care had a doctor in attendance from whom we received orders for routine.

The maternity program consisted of 293 pre-natal visits, 279 visits to mothers of new babies, and 313 visits to new born babies.

The work with well babies included home visits, organizing and attending clinics and conferences. 759 home visits were made wherein help was given to mothers in daily care of their babies. The attendance at the conferences held on Thursday afternoon was 901.

At the clinics attended for prevention of contagious diseases, 62 pre-school children were protected against diphtheria, 71 had the combination diphtheria, whooping cough and tetanus inoculation, and 127 were vaccinated against small-pox. Parents are urged to receive this protection for their children either at the clinics held monthly, or at their family doctors.

Supervision of care was given to 36 children at the Health Camp for a seven-week period in summer and to 15 children for eight weekends during the fall. A camp routine of nourishing food, fresh air, extra rest and a happy and calm atmosphere benefited each child.

As always, the tuberculosis program has been an active one. One chest clinic, sponsored by the State was held in February and 297 individuals were X-rayed. Recommendations given by the specialists reading such X-rays, have been carried out. In October, through a request from our organization, the mobile chest X-ray unit offered X-rays to all employees in the Mill and Shoe Shops. We have been notified that at least 50% of the employees had such X-rays. Report of findings has not been received. A great help to the tuberculosis program is the holding at the Goodall Hospital of monthly clinics for taking of chest X-rays. This facilitates the taking of X-rays when needed and eliminates the waiting for the State Clinic to come to this town. Forty-seven X-rays have been taken at these clinics at the hospital.

Two hundred and thirty-nine visits have been made to individuals with some type of tuberculosis. At these visits we urge all known active cases to enter the sanatorium. In-

struction as to living, urging and close follow-up medical care for past-sanatorium patients is done at these home visits.

A nurse accompanied two patients to the Augusta State Hospital.

Six patients were referred to the Cancer Clinic in Portland.

Total visits for the year were 3,519. 1,059 of these were given free of any charge.

The services of the nurses are available to all citizens and we hope the community has profited from our efforts.

Respectfully submitted,

ALPHONSE GUILLEMETTE,
President.

REPORT OF THE PARK COMMISSION

To the Honorable Selectmen:

The fiscal year of 1947 presented many interesting subjects and conditions in your Park Department. Trees, beautification of Gowen Park, development of playgrounds and initial beginning of the East Side Park and playground in the form of a foundation for the field house being some of the highlights. The introduction of new play and folk dance formulas were a part of our development in the playgrounds.

The summer of 1948 might possibly bring to our playgrounds a performance of the Portland Trailer Junior Players.

Your Commission looks forward to continued progress in civic development.

Respectfully submitted,

F. EVERETT, NUTTER, Chairman
HARRY STOTT, Secretary
RAYMOND LORD

ANNUAL REPORT

Town Clerk and Tax Collector

January 1 to December 31, 1947

REPORT OF VITAL STATISTICS

DEATHS

There were one hundred forty-five (145) deaths reported in this office for the year 1947.

This shows an increase of six (6) as compared with the year 1946.

Of this number, seventy-nine (79) were of the male sex and sixty-six (66) were of the female sex.

Of this number, one hundred two (102) were buried within the town and forty-three (43) were taken outside for burial.

In addition, twenty-one (21) were brought in for burial.

We have had nine (9) stillbirths.

BIRTHS

There were four hundred and eighty-seven (487) births recorded in this office for the year 1947.

This shows an increase of one hundred and eighteen (118) as compared with 1946.

Of this number two hundred and seventy-three (273) were of the male sex and two hundred fourteen (214) were of the female sex.

109 Main Street
Sanford, Maine
February 16, 1948

Mr. Arthur M. Carignan, Chairman
Selectmen, Assessors and Overseers of the Poor
Sanford, Maine

Dear Mr. Carignan:

In accordance with Chapter 16, Section 3 of the Revised Statutes of 1944 and at your request, the records of the Town of Sanford have been audited for the year ending December 31, 1947.

I herewith enclose my report of this audit with supporting schedules and questionnaire.

The Records of the Town Treasurer, Selectmen, Superintendent of Schools and Town Clerk and Tax Collector of the Town of Sanford have been audited weekly and their records checked with mine and have been found to be correct.

Respectfully submitted,
MARGARET M. SHAW,
Auditor.

**QUESTIONNAIRE COVERING MUNICIPAL
AUDIT AS PREPARED BY THE STATE
DEPARTMENT OF AUDIT**

Name of municipality: SANFORD, MAINE

Fiscal Year: JANUARY 1, 1947 TO DECEMBER 31, 1947

Assessors

1. Was valuation book added to verify warrant of commitment? YES.
2. Was verification made of any additional taxes committed? YES.
3. Was examination made of all abatements allowed? YES.
4. Were abatements signed by majority of Assessors? YES.
5. Were the valuation records examined to ascertain if they appear to adequately describe the property? YES.
(a) Do you believe them to be adequate? YES.
6. Was the valuation book properly signed? YES.
7. Do you consider the overlay to be within the legal limit of 5% of town appropriations plus state and county taxes ? YES.

Tax Collector

1. Were taxes in commitment book compared with valuation records and reconciled to total amount of warrant to Collector? YES.
2. Was examination made of the books of Collectors for previous years who still have uncollected taxes? YES.
3. Were all delinquent taxes reconciled? YES.
4. Were uncollected taxes verified? YES.
(a) By what method? WEEKLY AUDIT.
5. Have all uncollected real estate assessments been secured by the tax lien or deed method? TAX LIEN.
6. Has interest and/or discount been properly handled? INTEREST—YES.
7. Was the commitment book properly signed by the Assessors? YES.
8. Were excise tax collections checked? YES.
9. Did the Collector make monthly remittances to the Treasurer, as required by law? SEMI-MONTHLY—YES.

Treasurer

Cash

1. Were numbered receipts used? NO.
2. Were these receipts checked in detail to Treasurer's cash book? YES.
3. Were deposits made properly? YES.
4. Did Treasurer have warrants or orders covering all expenditures, and signed by the required number of officials? WARRANTS—YES.

5. Were all warrants paid in full by the Treasurer? YES.
6. Have unpaid warrants been set up as accounts payable? —
7. Were all payments made by check? YES.
 - (a) Were they verified by comparison with checks? YES.
8. Did the Treasurer have undeposited cash on hand at the close of the year? (The books were kept open about a week at the close of the year so all money due from the State could be deposited and final bills paid.) NO.
 - (c) Did you verify this deposit or deposits? YES.
 - (d) Was cash brought up to date of audit? YES.
9. Did the bank balance as reconciled, plus cash on hand, equal the cash book balance at the close of the year? YES.

Tax Liens

1. Have you examined the tax liens listed as assets to determine their value? YES.
 - (a) In your opinion, are they valid? YES.
 - (c) Were unpaid tax liens verified? YES.
2. Have you checked payments during the year? YES.
3. Have you reconciled detailed lists to control accounts? YES.

Clerk

1. Were records checked for appropriations and salaries of officials? YES.
2. Were all appropriations legal? YES.
3. Was a check made of all licenses other than dog and hunting and fishing? YES.
4. Did Clerk remit in full for all licenses? PAID TO TREASURER—YES.
5. Were certificates of oaths of office properly recorded? INDEX CARD FILE.

Municipal Officers

1. Is there a complete double-entry bookkeeping system? NO.
(The Selectmen keep the record of the payments. The Treasurer keeps the record of the receipts in detail—the total of each check is listed in his cash book.)
2. What was the condition of the records? VERY GOOD.
3. Were cash receipts properly credited? YES.
4. Were disbursements in agreement with warrants and properly distributed? YES.
5. Did disbursements appear to be reasonable and proper charges? (Bills and payrolls were approved by at least a majority of the Selectmen before preparation of the warrant.)
6. Were vouchers and payrolls examined? YES.
7. Accounts Receivable:
 - (a) Were they verified? YES.
(Accounts Receivable for 1942-1943-1944 are in the hands of a lawyer for collection. The 1945 and 1946 accounts have been very much reduced

this past year and the 1947 accounts are much less than the accounts were for 1946. The 1945-1946-1947 accounts still outstanding on April 1, 1948 are to be placed in the hands of a lawyer for collection.)

8. Accounts Payable: NONE. (All bills to be paid within the year are paid on the supplemental warrant at the end of the year so there are no Accounts Payable.)
9. Bonds Outstanding:
 - (c) Are interest coupons paid to date? YES.
10. Were school balances verified with Superintendent of Schools? YES.
11. Have you carried usual school balances forward to new year? YES.
12. Have you carried State Aid Road Construction and Third Class Road Maintenance balances forward to new year? YES.
13. Have you checked and are reserves set up for estimated losses on tax accounts and receivables? YES.
14. Was total debt within the legal limit as provided by Article XXIV of the Constitution of the State of Maine? YES.

Trust Funds

(There are two trust funds from which the Town of Sanford receives only the income which are held by the lawfully appointed trustees.)

Protected Reserve Funds.

1. Were they established in accordance with the provisions of the statutes? (Capital Reserve Fund) YES.
2. Have funds been properly invested? YES.

Fidelity Bonds

1. Treasurer
 - (a) Amount \$20,000.00.
 - (b) Name of surety company. Fireman Fund Indemnity Co.
2. Tax Collector
 - (a) Amount \$20,000.00
 - (b) Name of surety company. Fidelity and Casualty Company.

Sinking Fund

None.

General

1. Were any discrepancies or irregularities discovered in any account? Corrections and adjustments were made through the weekly audits.
 3. Have you made detailed schedules of unusual items, special funds, etc.? YES.
-

Mr. Fred M. Berry, State Auditor
State Department of Audit
Augusta, Maine
Dear Sir:

I am enclosing a copy of my Report of the Audit of the Town of Sanford, Maine, for the year ending December 31, 1947.

A copy of this Report is on file in the Office of the Selectmen of the Town of Sanford, Maine.

Respectfully submitted,

MARGARET M. SHAW,

Enclosure

Auditor.

For the purpose of the Town Report and in accordance with Chapter 84 of the Public Laws of 1945, the Statements of Departmental Operating Accounts, in condensed form is shown on Page 10 of the printed Town Report.

In place of comments as required by these same Laws of the State, an answered questionnaire covering a municipal audit as prepared by the State is incorporated in this report.

Saturdays 9:00 to 12:00 Noon

SCHOOL SIGNALS

The "No School Signal" will be sounded only on those occasions when concern for the pupils' welfare makes it imperative.

Local travel conditions are variable, not only in stormy weather, but also in the late fall and early spring. Parents are urged to keep their children at home, even when school is in session, if road conditions in their locality are particularly hazardous.

SIGNALS

4 blasts blown at 6:45—

No School for the High School.

4 blasts blown at 7:45—

No School for the grades for the forenoon session.

4 blasts blown at 11:30—

No School for the grades during the afternoon session.

EDUCATION

REPORT OF THE SUPERINTENDING SCHOOL COMMITTEE

Citizens of Sanford:

We are pleased to present to you our report for 1947. On page 163 of last year's report, with reference to the new gymnasium, we made the following statement, "THE TIME FOR ACTION IN THIS MATTER IS NOW CLOSE AT HAND AND WE ARE CONFIDENT THAT IN THE ALMOST IMMEDIATE FUTURE SOME VERY DEFINITE AND TANGIBLE PROPOSALS FOR THE CONSTRUCTION AND BUILDING OF SUCH AN EDIFICE WILL BE FORTHCOMING."

We are now glad to report that these were not so many empty words or so much idle talk. An adequate appropriation has been voted by the town, the public subscription drive is enthusiastically underway, the Building Committee has been appointed and functioning. It is the earnest hope of the School Committee that the year 1949 will see this long desired and vitally needed structure a reality and ready for occupancy. When this gymnasium becomes available to the Sanford School System it will provide for a program of Physical Education which is unsurpassed in the State of Maine and unequalled in most localities throughout New England. It will contribute not only to the physical growth of our students but likewise it will greatly influence their intellectual and moral development; it will provide educational opportunity to which every Sanford boy and girl is entitled. The construction of this building is worthy of the wholehearted support of every citizen in this community who believes in education.

The policy of your School Committee this year has been based upon the following convictions: (1) that money spent on education is the best investment our taxpayers can make; (2) that opportunity should be given to more of our young people to enter high schools and complete four years of study; (3) that the more young people who get through high school, the more will go through higher institutions of learning; (4) that education should not be considered as an expense, but rather as an investment for the future welfare of our community, state and nation.

To carry out such a policy effectively calls for a carefully planned distribution of the budget and one which will include adequate provision for all those essential needs of the individual pupil.

An analysis of the budget will indicate that we have spent the largest portion on teachers' salaries. Approximately 80% of the total budget was allocated to salaries.

EDUCATION

Teachers' salaries have been substantially increased during the last two years. A salary scale has been adopted which compares favorably with salary schedules in other communities similar in size and population to Sanford. It is the endeavor of the Committee to adjust each teacher's salary to his or her proper place upon the salary scale as rapidly as the financial situation will warrant. In determining each individual salary there are several factors which must be considered such as training, experience, competency, extra-curriculum activities, achievement, professional attitude, etc. It shall be the continued policy of the Committee to eliminate inequalities in pay among teachers wherever such are found to exist.

The following comparative statistics of expenditures for teachers' salaries for the past three years will show the actual substantial increases granted.

SALARIES

	1945	1946	1947
High School			
Teachers' Salaries	\$ 48,379	*\$ 57,131	\$ 65,736
Common School			
Teachers' Salaries	79,557	85,690	101,381
Industrial Arts			
Teachers' Salaries	16,853	17,814	21,361
	<u>\$144,789</u>	<u>\$160,635</u>	<u>\$188,478</u>

*This amount exclusive of amount paid to teachers in Veterans' Program.

\$ 8,752 increase in High School Teachers in 1946 over 1945

\$ 8,605 increase in High School Teachers in 1947 over 1946

\$ 6,133 increase in Common School Teachers in 1946 over 1945

\$15,691 increase in Common School Teachers in 1947 over 1946

TOTAL INCREASES IN TEACHERS' SALARIES IN THE LAST TWO YEARS WAS \$43,689.00.

The salaries of office secretaries, Evening School Teachers, School Nurse and custodians of buildings have likewise been substantially increased.

The recommendations of the Superintendent of Schools and the School Committee for a budget guaranteeing such increases have been fully concurred in by the Warrant Committee and Town Meeting Members. 1948 will show a further increase in salaries over the 1947 expenditures.

At the same time other important factors in the school system have not been neglected. \$17,790 has been spent for text books and supplies as compared with \$16,041 spent in 1946

EDUCATION

and \$14,598 expended in 1945. New texts have been supplied in practically every department in the high school and in the 7th and 8th grades of the Hamlin and Emerson Schools.

New library books were purchased for the Lincoln and Edison Schools. The expenditure in 1947 for Repairs, Insurance and Equipment was \$10,881 as compared with \$9,283 in 1946.

All our school buildings have been properly maintained. Repairs and improvements have been made wherever needed. All rooms and corridors of the Hamlin School were painted and renovated. This involved carpentry and plastering at a cost of approximately \$1,200.00. At the Emerson School the outside framework was painted and windows glazed, tarred surface around the building refilled, a new section of the boiler had to be inset, desks resurfaced and classroom walls painted.

A new stoker had to be installed at the Lincoln School. At the Hawthorne School large oil tanks had to be removed from the kitchen and placed underground at a distance from the building. This was a dangerous situation as the tanks were very near the furnace. Other basement improvements were made in plumbing and lavatory facilities. Hoods had to be constructed and put on the chimneys of the Edison School to prevent rain from ruining second floor classroom walls. A Vigalarm System for protection against fire was installed in the High School building upon recommendation of Fire Chief Harry Marshall of Springvale.

The outside athletic court in the rear of the High School was resurfaced. This court has been of great help to Physical Education instructors for basketball, volley ball and other outside sports.

Front framework and windows of the High School were painted and glazed and front doors refinished. Movie projectors have been purchased for the Vocational Training, Industrial Arts and Science department. Our Visual Aids program has thereby been greatly stimulated and more extensive work in this field is now possible to the educational advantage of all students concerned. Eleven new typewriters have been purchased for the Commercial department to replace those long since worn out. New filing cabinets have been procured to protect official records and transcripts and to serve as a basis for developing a modern and effective cumulative record system which will be a great aid to our Guidance department in making more readily available to teachers and counsellors information which will be very helpful in classroom teaching and guidance. Material including lumber, tools, machinery and equipment have been procured for our Industrial Arts and Vocational Training departments.

Since there had been no handwriting supervision in San-

EDUCATION

ford for the past four years it seemed advisable to correct this deficiency and the Rinehart system of handwriting was instituted. This system is widely recognized for its efficiency and has been adopted in more than 1,000 of the larger and more progressive communities throughout New England. Already there has been a marked improvement among students in writing which is still a fundamental tool of learning.

Safe suitable conveyance is provided for more than 600 children who live places removed from their school building.

Our academic program for veterans is nearly concluded. By means of this program more than 100 veterans returning

Our budget has likewise provided for a guidance director, music and art supervisors, an elementary grade supervisor and a health supervisor.

Our music department now includes a director of our high school and grade schools orchestras.

Our Evening School was continued again this year with a large enrollment and several new courses added.

Our athletic program now includes Track and a Girls' Varsity Basketball team. to their high school studies have completed scholastic requirements and received their diplomas.

The Federal Lunch program is still in operation at the Hawthorne School and High School. This is a most worthwhile project.

The Agricultural program for veterans has been very successful. Classes have been held at the High School and Roosevelt School as well as on-the-farm training for more than a year. An opportunity to enroll in these courses is still offered.

In summary may we express the hope that we have provided a maximum of educational opportunity for the youth in Sanford. It is our conviction that "the mainstay of democracy is the educated citizen. Democracy and education have the same end to enable every citizen to be conscious of his own individuality and dignity which others respect, and to prepare youth for life in a free society."

Respectfully submitted,

CARL J. BROGGI, Chairman

ROSARIO J. TREMBLAY,

FRANCIS A. PROULX,

School Committee.

EDUCATION

REPORT OF THE SUPERINTENDENT OF SCHOOLS

The tasks of a Superintendent of Schools today are so many and so varied that the most difficult part of the work is to divide his time equitably and in a manner which will be most effective in administering to the whole school system without neglecting any part of it. Every day brings new factors to be considered, new problems to be solved, new features to be added, new programs to be introduced, and new facilities to be provided for in a modern educational program.

I should like to call your attention, in this report, to the administration of the school budget of approximately \$280,000. To determine for recommendation how this money should be spent wisely and profitably, as you will easily understand, is a matter of tremendous importance. You will observe from the itemized accounts that more than three-fourths of this total budget was allotted to teachers' salaries.

Our salary scale in Sanford was revised and is now on a par with that of any town or city of similar size and population in New England. It includes a minimum and a maximum wage which has a fair degree of respectability and is one worthy of the teaching profession. It is our policy to adjust teachers' salaries to their proper place on the scale as rapidly as the financial situation will warrant. In establishing an individual teacher's salary due consideration should be given to several factors besides training and experience. Teachers now working in Sanford have been provided with what is known as cumulative sick leave. Each teacher is allowed a sick leave of two weeks each year with pay. If the two weeks or ten school days are not used in one year then they are added to the next year's leave. An accumulation up to thirty day is permissible. This provision was adopted in 1947 and it has proved very popular with teachers.

Summer School attendance has likewise been encouraged by subsidizing up to 50% of the total cost incurred by the teacher. In 1947 probably more teachers than ever before in Sanford attended various summer schools and thereby demonstrated their desire to keep pace with new trends in education and to avail themselves of the opportunity to acquire more learning. Forty-five Sanford teachers at the present time are taking a Boston University Extension Course offered by the Graduate School of Education from which they will receive either two or three credits towards a B.S. or Master's degree in Education. This demonstrates a correct professional spirit and proves that Sanford's teachers are ever ready to fit themselves for their vocational work in the classroom.

EDUCATION

It is not an exaggerated statement to say that teachers in Sanford are as well trained and experienced as in any other school system in New England. The success attained by Sanford students in various New England colleges testifies to the truth of this contention. Achievement tests of Progress which are given periodically likewise verify this statement. It will be our endeavor to retain good teachers, who are loyal and intelligent by paying them an adequate wage, and by making the teaching profession as attractive as possible. This is why I recommended that the largest portion of our budget be allocated to teachers' salaries. We feel sure you will agree that this was a wise expenditure, for the teacher is still the most important factor in any school system in the education of your boy and girl.

All our teachers have met the certification requirements of the State of Maine Department of Education thereby assuring you again of the high calibre of our teaching force. This is especially noteworthy in these times of teacher shortages throughout the country.

Besides the administration of the budget and the selection and organization of a competent teaching staff, the Superintendent must watch out for the continuance of a curriculum which will provide for the general and specialized education of every pupil. Hence besides academic training, we provide vocational training in Manual and Industrial Arts, Home Economics, General Shop and Machine Shop. When possible our Vocational Training Department should be moved to the high school which will mean greater efficiency and more satisfactory achievement. I would then recommend that consideration be given to the possible development of the Roosevelt School as an Area Trade School. State and Federal aid might be available if such a project were approved.

We are continuing to emphasize art and music, dramatics, debating and public speaking.

Our Guidance department is developing a more extensive program of counselling, testing, placement and follow-up of students.

Our health department is doing a magnificent job in physical examinations given to our students. This careful checking is serving as a wonderful preventative in checking in many cases what might terminate into fatal and malignant illnesses.

Our Grade Supervisor is now allowed her full time to be given to supervision of studies in the sub-primary and first six elementary grades. Reading for comprehension is especially stressed and remedial work is also emphasized.

Our physical education program now includes Girls' basket-

EDUCATION

ball and track, baseball, football, basketball. It would be ideal to have every boy and girl actively interested and participating in at least one sport.

The advent of our new Gymnasium so long needed is already in view. This will be used also as an auditorium which will aid not only the physical but also the social, intellectual and moral education of our boys and girls.

More than 600 boys and girls are supplied conveyance. Safety is constantly preached and reasonable means are taken to insure it. We ask parents to cooperate and are happy to report not a single accident in 1947.

Our buildings and school grounds we believe are kept in good shape.

Text books and supplies are amply provided to insure teachers and pupils with whatever is essential to their learning technique.

In closing let me thank you as parents and citizens for the fine support you have given me during the past year. It has been a pleasure to serve you as your Superintendent of Schools.

Respectfully submitted,

ROBERT H. McCARN

EDUCATION

REPORT OF THE SCHOOL NURSE

To the Superintendent of Schools:

The following report is of a program concerned with the protection of the health of the school child.

Arrangements were made for, and assistance given, the attending doctor in the physical examinations of the children in the sub-primary, fourth and seventh grades in the public schools, and the freshman girls at the St. Ignatius High School. The families were notified of any condition found wherein the doctor felt that further examination by the family doctor was indicated. The following referrals were made:

- 44 children needed further throat examination
 - 1 child referred because of hernia
 - 1 child referred because of an orthopedic condition
 - 1 child referred because of cleft palate
- 12 children advised to have urinalysis
- 22 advised to have heart examinations
- 13 advised to have blood count
- 5 advised to have neurological exam
- 30 advised to have tuberculin tests
- 14 advised to have ear examination

Parents were notified of the needs of their particular children. These examinations, as important as they are, need close follow-up care to be sure recommendations are carried out.

The children at the sub-primary, and first grades of the St. Ignatius, Notre Dame, and Holy Family were given a heart examination by the health officer and three children referred for further examination.

Case-finding and care of children with any type of tuberculosis has been part of the program. Six hundred nineteen students were given the tuberculin test. Thirty-two students were positive re-actors. These individuals had chest X-rays to determine extent and type of tuberculosis. During the year 119 school children have been X-rayed. The percentage of positive re-actors is less each year which proves that our program is effective. Two students have been patients in the tuberculosis sanatorium during the past year. Other children, showing a primary tuberculosis infection were cared for as advised by chest specialists.

A recent law in the State of Maine requires all teachers, employees and bus drivers coming in contact with the school children to have a chest X-ray every two years. The Bureau

EDUCATION

of Health was contacted and arrangements were made for such personnel to be X-rayed at the expense of the State Department. Reports of such X-rays are to be filed in the office of the Superintendent of Schools. The value of such a law is detection of active tuberculosis cases and to separate such an individual from the school child, thus preventing infection.

Ear hygiene has been considered. Group audiometer testing has been done for the children in the third to eighth grades in the public schools. Fifty-two children were found to have hearing below normal. Thirty-two of these have had corrections made so that their hearing has returned to the normal level. Thirty-one children have been seen by a local ear specialist at clinics at which he has volunteered his time. There are five children who have been recommended to have lip reading—but no teacher is available in this community for such teaching.

A routine system for caring for the eyes and vision is being accomplished. The students in the public High School had an examination by a local optometrist. Four hundred eighty-four were examined; 139 were found to be wearing glasses, and 44 in need of a more complete examination. Of that 44, 33 have had correction. Another optometrist has volunteered his time for examination of the sub-primary and first grade students. This examination has not been completed as yet. The teachers gave the Snellen Eye test to students from the second through the eighth grades. Referrals for further correction were given to the families.

Tonsil operations were done on 12 children at clinics sponsored by the Goodall Hospital in cooperation with the local doctors.

Assistance was given the health officer at clinics for vaccination against smallpox and for prevention of diphtheria. Such service was offered to all sub-primary and first grade students. In September, clinics for prevention of whooping cough and tetanus were begun. This should control the spread of whooping cough and diphtheria in this community.

The Searchlight Club of Sanford and Springvale Women's Club provided milk for 82 underprivileged children who were unable to buy milk for themselves.

The services of two visiting psychiatrists were utilized for advice to the freshman students and a selected group of senior students at the High School. The talks were concerned with emotional problems affecting the individual. One of these psychiatrists lectured to 38 mothers of pre-school children on behaviour attitudes.

Also, in connection with the mental hygiene program a

EDUCATION

conference was held with the psychiatrist who is in charge of the State Division of Mental Hygiene. A plan was explained to us, wherein clinics sponsored by the State Department will be organized and referrals for care, may be sent for help.

Sixty-eight treatments were given to children at dental clinics. Children financially able to go to their family dentists are urged to do so each year and bring a certificate to school showing such care has been given.

Twenty-eight school children received summer care for a seven-week period at the Health Camp sponsored by the Community Health Association. These children were ones having a definite abnormal physical condition. Supervised care and instruction how to live was taught. Fifteen children attended the camp for eight weekends this fall. The weekend program of supervised care and rest helped these children at the beginning of the school year. At the beginning of the week-ends, one child was not attending school and five attending part time. At the closing of the camp all were attending full time due to an improved physical condition.

Arrangements were made with the State Department for home instruction for two crippled children.

Treatments and recommendations for children needing special care have been carried on in cooperation with the attending physicians.

In March, a physical and health education demonstration was given in the town hall and assistance given to the Physical Education directors.

Twenty-six first aid treatments were given for minor injuries.

Two hundred forty-eight consultations were held with parents concerning particular problems in connection with their child.

Five hundred eighty-six visits were made to class rooms for various reasons in connection with the program as correlated with the school curriculum.

Eighty-one home visits were made to ill school children, and 110 home visits for the purpose of health instruction.

The routine for preventing contagion has been the same as in former years and new teachers in the system were acquainted with these rules at the beginning of the year. In cooperation with the teachers and parents an attempt has been made to change the philosophy of school nursing from doing for the pupil to guidance, in order that the child may develop responsibility for his own health.

EDUCATION

The above preventive and corrective program has been made possible because of the tremendous interest and ever present help received from those approached for assistance.

With this year ended I hope that our efforts have built a strong foundation for work in the coming years.

Respectfully submitted,

LAURA E. TABOR, R. N.

REPORT OF THE ELEMENTARY SUPERVISOR

To the Superintendent of Schools:

I herewith submit my annual report as Elementary Supervisor.

There are 34 teachers in the first seven elementary grades in Sanford and Springvale. Approximately 1,000 pupils are registered in these grades.

Educators are increasingly stressing the importance of the work in the lower grades. We are fortunate, indeed, that we have a conscientious school department in Sanford. It is endeavoring to fit our children for higher education, and for living in a complex world.

It is necessary for teachers to stress the essential subjects in the lower grades. Teachers are especially interested in the correct teaching of reading as most subjects are dependent upon this important tool subject.

The sub-primary teachers find that the mature children grasp reading and other subjects much better than do the immature ones.

The splendid work of the various children's libraries continue to aid in the grade work.

There is a good distribution of children in the various grades. There are no crowded classrooms.

In conclusion I wish to express my appreciation to you, to the members of the School Committee, and to the Principals and teachers for the cooperation which I am receiving.

Respectfully submitted,

EDITH E. LESLIE,

Elementary Supervisor.

EDUCATION

REPORT OF THE PRINCIPAL OF HIGH SCHOOL

To Superintendent Robert McCarn:

Dear Sir:

It is a pleasure to present to you my report as principal of Sanford High School.

Enrollment

The enrollment as of October first, 565, is slightly below that of last year, due to a much smaller entering class. Fewer students than usual have dropped out, however, and an analysis of present grade school classes makes it fairly certain that next year will see the beginning of a steady increase in high school enrollment, an increase that should continue for a rather extended period if figures on a national basis may be used. Before the last war the national birth rate was under 18 per 1,000 population, in 1942 it rose to 20.9, in 1943 to 21.5, in 1944 and 1945 down to 20 and up again in 1946 to 23.3. In 1947 the birth rate went to 26.2 THE HIGHEST BIRTH RATE YEAR ON RECORD.

Attendance

Attendance has been excellent so far this year with tardiness and dismissals held at a minimum. Routine notification by mail or telephone to all parents of absences of their children has been undertaken and has met with approval of all concerned.

Veterans

February will mark the end of separately organized classes for veterans other than the agricultural group. From time to time young men returning from the service have re-enrolled in the high school. Ranks sent to Sanford High School from colleges where veterans have enrolled, have, on the whole been excellent and have more than justified the work of teachers, school department officials, and townspeople who gave of their efforts to make the Sanford Veterans' Program outstanding in Maine.

Sports

Girls' interscholastic basketball has been introduced at Sanford High after a lapse of many years. Games are all played in the afternoon and furnish a means of exercise and of coordination, an opportunity to mingle with girls of other

EDUCATION

schools, and to learn lessons of sportsmanship and cooperation. Much credit should be given Miss Dorothy Boulos, coach and girls' physical education director, for her enthusiasm and impartial sincerity in her relations with her large girls' squad.

Track, under the direction of Mr. John Turcotte, was reintroduced the past year and should grow in popularity.

Both girls' basketball and boys' track have served to broaden the physical education program to the extent that nearly 50 additional girls and boys are taken care of by these two sports alone.

Curriculum

During the past year the faculty and guidance director have cooperated with the principal in working on a revision of the curriculum. The result was an extensive mimeographed 32-page guidebook for parents, teachers, and students containing a statement of the educational philosophy of the school, the revised course of study, a description of each subject taught and occupational information for students for reference in choosing their school subjects. To make such a booklet valuable, an annual revision must be made. Such a revision will be undertaken this year with the heads of departments cooperating.

Gymnasium

The town of Sanford is again showing the way to other communities by raising by taxation and popular subscription a sum of money sufficient to insure an adequate gymnasium. Without doubt the gymnasium as planned by the building committee, will be outstanding in Maine. Such a building will insure the carrying out of a well-rounded physical education program even now in the process of being developed. Such a gymnasium can and doubtless will serve as an assembly hall until such time in the future as an auditorium can be built to round out the high school building program.

Dramatics and Speech

Miss Marjorie Vallely, in addition to classes in English, is conducting classes in dramatics and speech. Such classes are extremely valuable. A voice recorder has been purchased and is being used to very good advantage.

Visual Aids

The scope of visual aids has been broadened by the purchase of a small portable 16 mm. sound movie projector and a delinescope. Several departments, notably science and industrial arts are using these very effectively in teaching.

EDUCATION

Industrial Arts

A change in teaching assignments has strengthened the general shop in the freshman and sophomore years, enabling instructors to give more individual attention to students.

Shop work is divided into the following:

1. Metal work
2. Welding
3. Auto mechanics
4. Electricity
5. Sheet metal work
6. Woodworking
7. Drafting and blueprint reading
8. Household mechanics

Students are divided into groups and each group in turn receives instruction in each field.

In the junior and senior years those electing to continue the shop course, spend 50 per cent of their time at the Roosevelt School where the same areas are available in a more advanced stage.

It seems highly advisable to move the Roosevelt School shop to the high school building when the new gymnasium is built. A transfer of the present cafeteria to the basement of the new building to provide more room and better lunch facilities and utilization of the present cafeteria for the machinery from the Roosevelt School should be considered in the interest of efficiency.

America was once a nation of new and vast frontiers. Now, however, these frontiers have of necessity changed and we talk in terms of nations. Education, accordingly, must change to keep pace with this ever enlarging vista. Schools, including Sanford High, must be geared for this ever changing world.

I deeply appreciate the cooperation of school officials, teachers, and interested citizens of Sanford in our common responsibility—to help make our boys and girls a credit to themselves and to the town of Sanford.

Respectfully submitted,

LAWRENCE L. PAGE

EDUCATION

REPORT OF THE MUSIC SUPERVISOR

January 30, 1948

To the Superintendent of Schools:

I herewith submit my annual report as Supervisor of Music.

There are 39 grades and classes which I meet each week, from the sub-primary to the high school level, and four music appreciation classes in the high school. Children are making steady progress in their development to become better material for our glee clubs and this, I hope, will be a carry-over into life beyond their school years where they may become members of adult singing groups; thus applying their training now as an avocation in their future years.

The Emerson and Hamlin Schools both have a Girls' Glee Club. Last May the Hamlin girls made their second Maine Festival appearance at Lewiston with very gratifying results, as did the Emerson girls. The Emerson girls made their first New England audition at Portsmouth. The rehearsals of these two units are held after school.

At the High School there is a very large girls' chorus, and a boys' glee club of around twenty boys. The girls' glee club attended the Maine and the New England Festivals last spring with pleasing results.

I was sorry not to present the orchestra at the Maine Festival as they did so well when they auditioned the year before, when the festival convened here in Sanford.

Naida Nickerson, of the High School, auditioned in the soloist group receiving a superior rating. The string ensemble, consisting of Jolene Simpson, cello, Naida Nickerson, violin, and Dorothy Perkins, piano, received superior ratings for their audition too.

Two new courses have been introduced in the High School; music appreciation for the first half year and the last half harmony is offered. There are 24 students taking the music appreciation course. Harmony will begin after mid-years.

In the music appreciation course, the listening to music is an active process, not a passive absorption of impressions. Since it is an activity, it is necessary that the listening be directed in such a way that the attention for the student may be given to those features of the music which will make it give him the greatest satisfaction. This listening activity assists the student to discover for himself the important features of the music he is hearing, thereby making friends with music.

EDUCATION

One of the main purposes of the study of harmony is to lead the student to become sensitive to the harmonic beauties of music.

This awakening comes not only through the development of a technical knowledge of harmony, but also from the stimulation of his musical imagination. Both should go hand in hand. The student is therefore required to express his own musical ideas in composition not confined to the limitations of his early technical equipment.

Mr. Firth, with his assistants, Mr. Cella and Mr. Ramsdell, is carrying along the instrumental music through the grades and high school.

The Junior band has 55 members, the junior orchestra 15 children. The Junior band auditioned at the Maine and New England Festivals and received commendable ratings.

The High School orchestra is progressing under Mr. Firth's direction and it has a membership of 35 students. The enrollment of the band is 93. The band attended both festivals and also received first ratings. They gave a successful "Pop Concert" last spring to help defray expenses of these trips.

The development of more strings to serve in our orchestra seems to be the timely movement. The orchestra can do so much for the cultural background in our schools as well as provide fine entertainment for everyone.

In conclusion, I wish to express my appreciation to you, to Mr. Page, to members of the School Committee, and to the teachers for the help I have received this year.

Respectfully submitted,

ALCADA L. HALL

EDUCATION

REPORT OF THE ART SUPERVISOR

To the Superintendent of Schools:

I herewith submit my annual report as Supervisor of Art.

"Art is the most sublime mission of man, since it is the expression of thought seeking to understand the world and to made it understood."—August Rodin

From the viewpoint of the above quotation Art is indeed, inescapable by a thinking people; for as long as each of us strives to improve his daily life, and in ever widening circles reaches out to embrace community activities, state, nation and eventually world politics, to bring order out of chaos, we are using art principles— because art is an ordered way of working and of thinking things through to a logical conclusion.

Our life in a Democracy depends upon leaders with the type of mind that can think independently. Nations which stress imitation, dependence, and blind obedience, we are well aware, lead to Fascism. Thinking independently is usually described as "Free Expression", a much abused term in Progressive Art Education. It also embraces the art term, "Creative Activity". The thinking and the doing are in most instances inseparable. Because the word ART connotes ORDER it seems therefore to contradict the term FREE EXPRESSION. However, ARTISTIC FREE EXPRESSION makes it necessary for the idea or activity to stay within reasonable bounds, laws, or governing principles of a nature to produce ORDER even though it be something new and different—a product of its creator.

This idea, then, of Artistic Free Expression is the basis for the Art Program, which endeavors to follow the Educational Policies of the school system. Art activities are planned to fit into the curriculum in such a way as to help the teacher put across subject matter by bringing out Artistic Free Expression. Many are doing just this, very successfully, especially in the Unit Activities and Social Studies. A fine example of this type of integration is shown when a teacher uses a figure drawing lesson to such an advantage that most of the children in the room can produce, in a creative drawing, their conception of a colorful episode in the customs of a people being studied, using action, costume and suitable backgrounds.

Art Activities in the elementary grades reflect good daily guidance in sociology. In connection with Junior Red Cross enrollment, we have been working on posters; Helping Mother

EDUCATION

and Helping Teacher, in grade three; Health Habits, in grade four; and Character Training, in grades five, six, seven and eight. Ideas are many and varied, showing the emphasis being placed on Personality Growth and Development through encouragement of Self Expression and Independent Thinking, as opposed to Imitation and Conformity.

The High School Art Classes this year meet all morning on Monday and Wednesday, allowing a larger number of students to take Art twice a week, rather than one class meeting every day. This has worked out to advantage, as the Art Room has become more of a Workshop with students coming in with individual problems, such as Yearbook illustrations, drawings for class assignments, posters for School Activities and outside clubs, decorations and programs for school dances and settings for graduation pageants. One student was responsible for a seven by ten foot nativity scene mural used as a background for the Christmas observance in the library. Another worked out a mural for a cafeteria decoration depicting school activities.

For a third time in the past few years one of our students was a winner in the annual Maine State Poppy Poster Contest sponsored by the American Legion Auxiliary, taking second place in the 1947 contest. We have had two previous first place winners and a national honorable mention.

It is especially gratifying to note that when a particular emergency arises, such as advertisement of the play, "Arsenic and Old Lace", also the floats and abundance of posters and banners prepared by the Gym Fund Parade, the High School students prove themselves more than adequate in their initiative. Such undertakings so quickly and efficiently dispatched with evident good will and cooperation speak well, not only for the Art Department, but for the excellent guidance these young people are receiving in all their subjects under our Progressive System of Education which fosters just such sociological competence.

In conclusion, I wish to thank you, members of the School Committee and the teachers for the helpful cooperation which I am receiving.

Respectfully submitted,

HAZEL M. HARRISON,

Art Supervisor.

RECREATION

REPORT OF THE GUIDANCE DIRECTOR

To the Superintendent of Schools:

It is with pleasure that I submit my first report as Guidance Director for the public schools of Sanford.

I should like to take this opportunity to thank the superintendent, the principals, and the teachers of the Sanford schools for their splendid cooperation and help. The pleasant relationships with members of the school department and the friendly reception which the people of Sanford have given my family and me have made us feel very much at home here in Sanford. It hardly seems possible that we have been here less than four months.

Since October 20, when I assumed my duties as Guidance Director, the major part of my Guidance activities has been concerned with the high school and our two grammar schools, the Emerson and the Hamlin.

A good part of the Guidance Director's work in the high school consists of counselling with the students in regard to educational, vocational, and personal problems.

An important phase of this counselling during the fall of 1947 has been the group and individual conferences held with the college preparatory seniors. The return of the veterans to an educational institution has caused over-crowded conditions in the schools and colleges throughout the country. The entrance requirements of our colleges and universities are being constantly raised so that it is increasingly more important that our high school seniors receive careful guidance in the choice of and preparation for college.

In both the Emerson and the Hamlin schools, achievement tests have been administered to the eighth grade pupils. Results of these tests will indicate the academic achievement of our pupils in comparison with eighth grade pupils all over the country.

The core of the guidance program is the individual counselling done by trained counsellors. One of the aims of our guidance program is to provide each student from the seventh to twelfth grades with a counsellor who is interested in helping him solve his problems whatever they might be. The counselling problem is one which must be entered into gradually in order not to disrupt the time schedule of our teachers. At the present time counsellors have been appointed in the eighth grades so that each eighth grade pupil has some teacher who will devote part of his time to learning about him as an

RECREATION

individual and functioning as his guidance counsellor while he is a pupil in that school.

It is planned that a similar program of teacher counsellors will be under way at the senior high school before the end of this school year.

During the next year it is proposed that our guidance services should be expanded in the following directions:

1. Expansion of our counselling program so that every student from grade seven through grade twelve will have the advantage of trained personalized guidance.
2. The expansion of our testing program into the elementary schools so that it may be a well coordinated program beginning with grade one and extending through grade twelve.
3. The establishment of a cumulative record system which will be a record of each pupil's growth from sub-primary through high school. Such a system could be permanent in spite of changes in personnel.
4. A follow-up study of high school graduates and school leavers. Just as it is important for a manufacturer to know what becomes of his product, it is essential that we as education know what becomes of our product.
5. The establishment of a program of occupational information so that our graduates will have an understanding of the opportunities in the world of work.
6. The establishment of placement service for part and full time employment for our high school students and graduates.
7. The establishment of a periodic psychiatric clinic to assist in a better adjustment of difficult educational, emotional, and physical problems.

In closing let me say to the citizens of Sanford that the guidance office stands ready to serve you all. Anyone who wishes to use the services of this office in regard to educational information or advice is welcome.

Respectfully submitted,

HENRY B. PERRY,

Guidance Director.

RECREATION

REPORT OF THE PRINCIPAL OF EVENING SCHOOL

I hereby submit my report of Evening School for the year 1947.

The plan for opening evening school early in September and closing with the Christmas recess was followed this year. I believe this plan very successful and should be followed in years to come.

Sufficient enrollment warranted the opening of the following classes:

- Americanization
- General Shop: Wood Work, Metal Work, Electricity
- Preparation and serving of foods
- Millinery
- Dressmaking
- Rug Making
- Mathematics
- Bookkeeping
- Shorthand
- Typewriting
- Business Machines
- Art
- Recreational Leadership

Two new classes were added this year. Art taught by Miss Hazel Harrison and Recreational Leadership conducted by Mrs. William Clarke. These two classes were very well attended which is a fine tribute to the teachers in charge.

The prospects for a new gym looks very bright and I hope next year we may again add physical education for adults to our evening school.

In conclusion I would like to express my appreciation to you, to the members of the School Committee, to the teachers, to the Goodall-Sanford Mills and all others who helped to make the school year successful.

Respectfully submitted,

ITHEL E. RESCOTT,

Principal of Evening School.

RECREATION

REPORT OF DIRECTOR OF HOME ECONOMICS

To the Superintendent of Schools:

The objectives of the Home Economics Course are to develop an active interest in homemaking and related home economics activities; to develop an attainable standard for accomplishment in both food preparation and clothing construction and a desire to always meet that standard; to build up an understanding of the importance, scope, and magnitude of home economics; to develop enough manipulative ability in different phases to meet the pupil's individual needs; to develop judgment ability in home activities; and finally to develop enough creative ability to make the home a comfortable, attractive place in which to live.

To meet these objectives the course in high school includes vocational and general home economics classes. Each girl in the vocational classes spends a total of seven hours and twelve minutes weekly in class while the girl in the general class spends three hours and six minutes. The latter program does not give time for very much construction work but is arranged for girls from other courses who can give only one period of their time to home economics.

Units in general home economics are personal and social living, personal appearance and grooming, nutrition, consumer problems, child care and development, and vocational opportunities for girls.

Units in the vocational classes include foods and nutrition, clothing and textiles, home nursing, home management, home improvement, personal and family problems and are supplemented with hours of laboratory work and home experiences.

At the present time all girls are required to take at least one year of home economics studies during their high school preparation. The total number of girls taking home economics subjects beginning in September was one hundred which was an increase over the number the previous year.

One change has been made in the teaching staff during the year, Miss Mary Waterhouse, a graduate of the University of Maine, came to us from Biddeford High School to take Mrs. Ethel McNeill Lolley's place in November. During my absence the last half of last year the work of the department was very successfully carried on under the direction of Mrs. Florence Prescott.

I wish to thank the Superintending School Committee, Mr. McCarn, Mr. Page, Mrs. Lolley, Mrs. Prescott, and Miss Waterhouse for their interest and help in this department.

Respectfully submitted,

BLANCHE C. PHILBRICK,

Director of Home Economics.

Stephen A. Cobb, term expires February 1, 1950
Leon H. Powers, term expires February 1, 1951
Wilfred J. Tremblay, term expires February 1, 1952
Elmer L. Ward, term expires February 1, 1953

ANNUAL REPORT

Of Selectmen and Overseers of the Poor

January 1 to December 31, 1948

Your Municipal Officers for the year 1948 in their wish to meet all the requirements of their official duties, are submitting an itemized account of all departmental functions within the following pages of this 179th Annual Town Report. We hope that the perusal and study of this report of your town's administration will be helpful in a thorough understanding of expenditures of your tax monies.

In reviewing the past year, we realize that Sanford has fared as well as other surrounding communities of approximately the same size, we also realize that its inhabitants have been as courageous and progressive, especially in the instance of being responsive to one of the urgently needed Post War Projects in their decision to finance and build the War Memorial Gymnasium, which we hope to realize the completion in the fall of 1949.

As your tax assessors having to consider the increased appropriations for the 1948 budget, we seemed confronted with a considerable increase in the tax rate, but upon the termination of our assessment work we were well pleased to realize that there had been so much progress made in creating new values, thereby increasing the total valuation of the town, resulting in a minor instead of a major increase in the tax rate. Again an appreciated indication that Sanford was still in a progressive trend.

As your Overseers of the Poor we have experienced a few sombre financial skies, especially within the latter part of the year when employment seemed somewhat curtailed and that had a very sudden and effective reaction upon the welfare department of your town, especially considering the prevailing cost of living. We should bear in mind that the appropriations made for welfare purposes can hardly be estimated in advance, other than fixed departmental cost such as welfare nurse and Town Farm maintenance, all other expenditures are created by circumstances which usually arise from

unemployment and sickness, also within the categories of Old Age Assistance, Aid to the Blind and Aid to Dependent Children, when the State of Maine has not taken in consideration the increased cost of living for those state welfare recipients. The necessary supplemental aid has been very costly to the Town. We hope that the 1949 Legislature will understand the existing hardships to all concerned and be successful in legislating the necessary adjustments.

May we wish for future years a continuation of successful industrial operations within the town, so that its citizens may meet all their obligations and enjoy their share of prosperity, thereby being progressive at all times.

Finally may we extend our most sincere thanks to all who have helped us towards some degree of success in the performance of our official duties, especially all department officials, for we certainly appreciate their having been so co-operative with our office. To our clerical staff many thanks for the considerate response to our numerous demands of time and efforts.

Respectfully submitted,

ARTHUR M. CARIGNAN,
MAURICE J. MAURICE,
THEODORE C. GAUTHIER,

Selectmen, Assessors and
Overseers of the Poor.

PROTECTION OF PERSONS AND PROPERTY

REPORT OF THE BOARD OF ENGINEERS OF THE SANFORD FIRE DEPARTMENT

To the Honorable Board of Selectmen and the Citizens
of the Town of Sanford:

The Engineers of the Sanford Fire Department submit
the following report:

Your Department has been called out on eleven bell alarms, of which six were false alarms, leaving only five bell alarms of fire. We are pleased to say this is an all-time low record. We feel that this can be attributed to the adoption of the new local fire ordinances and the inspection program of the department. Every business building and multi-family house was inspected and the citizens were very cooperative in suggestions made for safer conditions.

The Aerial Ladder Truck was put in service in June and we find it to be a wonderful addition to your equipment. The new Four-wheel-drive Tank Truck has also proven its worth to us in handling our rural fires. The Chief's car with its two-way radio equipment has been of great value many times.

We procured from the Fire Emergency Relief Committee, at no cost to the Town of Sanford, 4,000 feet of fire hose, one 500-gallon per minute four-man portable pump and a Dodge Navy panel truck. It is our intention to make a rescue truck of this and put it into the service of the department.

Your equipment is in excellent condition, although two of your major pieces are over 20 years old.

We wish to express our sincere appreciation to the Selectmen, Police Department, the Springvale Fire Department and the citizens of the Town of Sanford for the fine cooperation given us this past year.

Respectfully submitted,

CURTIS ALLEN, Chief

CHARLES C. CHADBOURNE, Asst. Chief

BERNARD H. CHADBOURNE, Asst. Chief

PROTECTION OF PERSONS AND PROPERTY**REPORT OF THE CLERK OF THE SANFORD
FIRE DEPARTMENT**

January 1, 1949

To the Municipal Officers of the Town of Sanford, Maine:

I hereby submit the following report of the Sanford Fire Department for the year 1948.

The Department has responded to 237 calls, 209 stills, 11 bells, 2 house calls, and 15 fire drills.

Estimated Value of Property Endangered	\$295,450.00
Damage to Property Endangered	16,702.38
Insurance Paid on Property	16,702.38
Total feet of Hose Laid	37,460
Total Gallons of Chemical Used	245
Total Feet of Ladders Raised	764
Miles Apparatus Travelled	1,297.5

Respectfully submitted,

GEORGE F. FERGUSON, Clerk

PROTECTION OF PERSONS AND PROPERTY**REPORT OF THE BOARD OF ENGINEERS OF
THE SPRINGVALE FIRE DEPARTMENT**

January 15, 1949

To the Board of Selectmen:

The Board of Engineers of the Springvale Fire Department submit the following report ending December 31, 1948.

The station and apparatus is in very fine condition, and as usual we would like to have the public come in at any time.

We had 198 alarms this year which is smaller than last year, and we feel that the fine cooperation of the people has reduced the big fires in this community. We also would like to state there was no fire loss for the year.

We have had our six drills this year, also instructed a group from the Waterboro Fire Department.

We have had 600 monthly inspections on public buildings this year.

We are very pleased with the ladder truck which we received from the Sanford Station and find it is superior to our old one.

We are looking forward to our new 500 gallon water tank which we feel is greatly needed. Due to conditions that have prevailed in the past two years, we find we must take water with us to fight forest fires or buildings in our rural areas.

We thank the permanent men and call men for their cooperation this year.

We wish to thank all the different departments and committees that have cooperated with us in the past year.

Yours truly,

HARRY MARSHALL, Chief
CHARLES A. WINSLOW, Asst.
HAROLD BALDWIN, Asst.

PROTECTION OF PERSONS AND PROPERTY**REPORT OF THE CLERK OF SPRINGVALE
FIRE DEPARTMENT**

December 31, 1948

To the Municipal Officers of the Town of Sanford:

I hereby submit the following report of the Springvale Fire Department from January 1, 1948 to December 31, 1948.

The department has responded to 198 alarms, consisting of 177 stills, 11 bell alarms, 10 house calls, also 6 drills.

Total Value of Property Endangered	250,000.00
Damage to Property Endangered	2,225.00
Insurance Paid on Property Damaged	2,225.00
Loss	None
Number of Feet of Hose Laid	22,850
Number of Feet of Ladder Raised	1,091
Number of Miles Apparatus Traveled	2,692

Respectfully submitted,

JACK LAWRENCE, Clerk.

REPORT OF THE HEALTH OFFICER FOR 1948

To the Selectmen, Town of Sanford, Maine.

GENTLEMEN:

As Health Officer of Sanford from January 1, 1948 to January 1, 1949, I herewith respectfully submit a report of health activities during the current year.

School children of Sanford and Springvale were examined. Parents were notified of whatever defect or disease noted and requested to procure medical aid for same.

With consent of parents school children were vaccinated against smallpox and inoculated against diphtheria, whooping cough and tetanus. A total of 322 were vaccinated and 315 were inoculated. The total number of school children receiving the above prophylactic care was less than the number cared for in the preceding year. This is due, in part, to the greater number of pre-school children being taken care of in the pre-school and baby clinics held monthly. As in preceding years all school and clinic work was under the supervision of Miss Laura Tabor, R. N.

Eye examinations of school children were again conducted by Dr. J. Kornetsky.

Welfare and old age assistance cases were tendered medical and surgical care. In carrying out these duties 441 house calls, 383 office calls, and 204 hospital visits were made.

As in the past year nuisances and infractions of sanitary and plumbing laws were investigated as complaints were received and dealt with forthwith or brought to the attention of the proper authorities.

In conclusion I wish to express my sincere thanks to the welfare nurses, school nurse, and to all the citizens of the community for the fine cooperation they have given me during the year.

Respectfully submitted,

A. S. LINCOURT, M. D.

Health Officer

REPORT OF NURSING WORK OF COMMUNITY HEALTH ASSOCIATION, INC. FOR 1948

To Citizens of Sanford:

The program of the association has been one based on principles of public health nursing. The content of the work has been bed side nursing care to the ill in their homes, health education to prevent illness and attendance at conferences and clinics.

The directors of the work consist of a group of organized volunteer citizens, who have met monthly and outlined policies. Two nurses have been employed and their work is supervised by the school nurse. In conducting the program, the directors have kept in mind the state law pertaining to public health nursing in the homes. This law states that any nurse employed in public health nursing must be registered and approved by a state public health credential committee.

The work has been financially supported by volunteer contributions, town appropriations, fees from patients and fees from insurance companies. No citizen was refused care because he or she could not pay. This policy was proven by the fact that 268 free bed side nursing visits were made. Payment is not expected for health education visits and 1,084 visits of this type were made in 1948.

Figures are the means for reporting services rendered so the following are given:

908 home visits were made to acutely ill patients
719 home visits were made to ones with chronic illnesses
214 home visits were made to pre-natal patients
315 home visits were made to new mothers and new born babies
19 home visits were made to venereal disease patients
698 home visits were made to well infants, pre-school children
367 home visits were made to tuberculosis patients

As for clinics, the following were organized and attended:

(1) Fourteen chest clinics have been held at and through the courtesy of the hospital. 239 individuals had chest X-rays.

(2) Assistance was given the health officer at clinics where 76 children under school age were inoculated against whooping cough, tetanus and diphtheria. 24 pre-school children were vaccinated against small-pox.

Well-baby conferences were held every Thursday after-

noon and 951 visits were made to these conferences by the mothers.

The project of the summer health camp gave care to 15 Sanford children for a seven-week period. This project is supported, in full, by volunteer financial assistance. The children participated in a daily routine for improving their physical condition and were given instruction for right living during the winter.

The total number of visits for the year were 3,236.

The directors close the year confident that the work has benefited the health and standard of living of many citizens in this community.

Respectfully submitted,

Alphonse Guillemette,

President.

REPORT OF THE PARK COMMISSION

To the Honorable Selectmen:

The Park Commission considers this past year as one of the most successful in its history, advancement having been made in all departments, physical and entertaining. 23,870 children were assisted in a variety of arts as well as being entertained, a top feature being a presentation of the "Steadfast Tin Soldiers" by the Portland Junior Trailer Players, the only community in the state having such, outside of Portland. The National Recreation Association again places us second in the State in progress, and the addition of the new Field House at the Eastside Playground will further advance us in the work we are trying to present. Our development is consistent with the best interests of Park and Playground progress.

Respectfully submitted,

F. EVERETT NUTTER
HARRY STOTT
RAYMOND LORD

ANNUAL REPORT

Town Clerk and Tax Collector

January 1 to December 31, 1948

REPORT OF VITAL STATISTICS

DEATHS

There were one hundred sixty-five (165) deaths reported in this office for the year 1948.

This shows an increase of twenty (20) deaths as compared with the year 1947.

Of this number, eighty-six (86) were of the male sex and seventy-nine (79) were of the female sex.

Of this number, one hundred thirty-three (133) were buried within the town, and thirty-two (32) were taken outside for burial.

In addition, thirty-five (35) were brought in for burial.

We have had eleven (11) stillbirths.

BIRTHS

There were four hundred and forty-nine (449) births recorded in this office for the year 1948.

This shows a decrease of thirty-eight (38) births as compared with the year 1947.

Of this number two hundred and thirteen (213) were of the female sex and two hundred and thirty-six (236) were of the male sex.

The number of each month is shown below:

	1947	1948
January	49	40
February	36	37
March	35	39
April	41	29
May	44	49
June	53	33

TAX COLLECTOR'S REPORT

July	45	35
August	35	45
September	37	40
October	36	46
November	45	25
December	31	31
Totals	487	449

MARRIAGES

There were one hundred and eighty (180) marriages recorded in this office for the year 1948.

This shows a decrease of eighty-eight (88) marriages as compared with the year 1947.

In addition, forty-three (43) marriages were reported from other city and town clerks during this same period.

The number of each month is shown below:

	1947	1948
January	19	14
February	17	15
March	15	6
April	13	11
May	22	17

109 Main Street
Sanford, Maine
February 10, 1949

Mr. Thomas Meunier, Chairman
Selectmen, Assessors and Overseers of the Poor
Sanford, Maine

Dear Mr. Meunier:

In accordance with Chapter 16, Section 3 of the Revised Statutes of 1944 and at your request, the records of the Town of Sanford have been audited for the year ending December 31, 1948.

I herewith enclose my report of this audit with supporting schedules and questionnaire.

The Records of the Town Treasurer, Selectmen, Superintendent of Schools and Town Clerk and Tax Collector of the Town of Sanford have been audited weekly and their records checked with mine and have been found to be correct.

Respectfully submitted,

MARGARET M. SHAW,

Auditor

**QUESTIONNAIRE COVERING MUNICIPAL
AUDIT AS PREPARED BY THE STATE
DEPARTMENT OF AUDIT**

Name of Municipality: **SANFORD, MAINE**
Fiscal Year: **January 1, 1948 to December 31, 1948**

Assessors

1. Was valuation book added to verify warrant of commitment? Yes.
2. Was verification made of any additional taxes committed? Yes.
3. Was examination made of all abatements allowed? Yes.
4. Were abatements signed by majority of Assessors? Yes.
5. Were the valuation records examined to ascertain if they appear to adequately describe the property? Yes.
 - (a) Do you believe them to be adequate? Yes.
 - (b) If not, give reasons.
6. Was the valuation book properly signed? Yes.
7. Do you consider the overlay to be within the legal limit of 5% of town appropriations plus state and county taxes? Yes.

Tax Collector

1. Were taxes in commitment book compared with valuation records and reconciled to total amount of warrant to Collector? Yes.
2. Was examination made of the books of Collectors for previous years who still have uncollected taxes? Yes.
3. Were all delinquent taxes reconciled? Yes.
4. Were uncollected taxes verified? Yes.
 - (a) By what method? Weekly audit.
5. Have all uncollected real estate assessments been secured by the tax lien or deed method? Tax lien.
6. Has interest or discount been properly handled? Interest—yes.
7. Was the commitment book properly signed by the Assessors? Yes.
8. Were excise tax collections checked? Yes.
9. Did the Collector make monthly remittances to the Treasurer, as required by law? Semi-monthly—Yes.

Treasurer**Cash**

1. Were numbered receipts used? No.
2. Were these receipts checked in detail to Treasurer's cash book? Yes.
3. Were deposits made promptly? Yes.
4. Did Treasurer have warrants or orders covering all expenditures and signed by the required number of of-

ficials? Warrant—Yes.

5. Were all warrants paid in full by the Treasurer? Yes.
6. Have unpaid warrants been set up as accounts payable? No.
7. Were all payments made by check? Yes.
 - (a) Were they verified by companion with checks? Yes.
8. Did the Treasurer have undeposited cash on hand at the close of the year? (The books were kept open about a week at the close of the year so all money due from the State could be deposited and final bills paid.) No.
 - (c) Did you verify this deposit or deposits? Yes.
 - (d) Was cash brought up to date of audit? Yes.
9. Did the bank balance as reconciled, plus cash on hand equal the cash book balance at the close of the year? Yes.

Tax Liens

1. Have you examined the tax liens listed as assets to determine their value? Yes.
 - (a) In you opinion are they valid? Yes.
 - (c) Were unpaid tax liens verified? Yes.
2. Have you checked payments during the year? Yes.
3. Have you reconciled detailed lists of control accounts? Yes.

Clerk

1. Were records checked for appropriations and salaries of officials? Yes.
2. Were all appropriations legal? Yes.
3. Was a check made of all licenses other than dog and hunting and fishing? Yes.
4. Did Clerk remit in full for all licenses?—Paid to Treasurer—Yes.
5. Were certificates of oaths of office properly recorded? Index card file.

Municipal Officers

1. Is there a complete double-entry bookkeeping system? No.

(The Selectmen keep the record of the payments. The Treasurer keeps the record of the receipts in detail—the total of each check is listed in his cash book.)
2. What was the condition of the records? Very good.
3. Were cash receipts properly credited? Yes.
4. Were disbursements in agreement with warrants and properly distributed? Yes.
5. Did disbursements appear to be reasonable and proper charges? (Bills and payrolls were approved by at least a majority of the Selectmen before preparation of the warrant.)
6. Were vouchers and payrolls examined? Yes.
7. Accounts Receivable:
 - (a) Were they verified? Yes.

8. **Accounts Payable:** None.
 (All bills to be paid within the year are paid on the supplemental warrant at the end of the year so there are no Accounts Payable.)
9. **Bonds Outstanding:**
 Are interest coupons paid to date? Yes.
10. Were school balances verified with Superintendent of Schools? Yes.
11. Have you carried usual school balances forward to new year? Yes.
12. Have you carried State Aid Road Construction and Third Class Road Maintenance balances forward to new year? Yes.
13. Have you checked and are reserves set up for estimated losses on tax accounts and receivables? Yes.
14. Was total debt within the legal limit as provided by Article XXIV of the Constitution of the State of Maine? Yes.

Trust Funds

(There are two trust funds from which the Town of Sanford receives only the income which are held by the lawfully appointed trustees.)

Protected Reserve Funds

1. Were they established in accordance with the provisions of the statutes? (Capital Reserve Fund.) Yes.
2. Have funds been properly invested? Yes.

Fidelity Bonds

1. **Treasurer**
 - (a) Amount \$20,000.00
 - (b) Name of surety company: Fireman Fund Indemnity Co.
2. **Tax Collector**
 - (a) Amount \$20,000.00.
 - (b) Name of surety company: The Fidelity and Casualty Company of New York.

Sinking Fund—None.**General**

1. Were any discrepancies or irregularities discovered in any account? Corrections and adjustments were made through the weekly audits.
 2. Have you made detailed schedules of unusual items, special funds, etc.? Yes.
-

Net Debt, December 31, 1948 \$174,003.46

109 Main Street
Sanford, Maine
February 10, 1949

Mr. Fred M. Berry, State Auditor
State Department of Audit
Augusta, Maine

Dear Sir:

I am enclosing a copy of my Report of the Audit of the Town of Sanford, Maine, for the year ending December 31, 1948.

A copy of this Report is on file in the Office of the Selectmen of the Town of Sanford, Maine.

Respectfully submitted,

MARGARET M. SHAW,

Auditor

Enclosure

For the purpose of the Town Report and in accordance with Chapter 84 of the Public Laws of 1945, the Statement of Departmental Operating Accounts, in condensed form is shown on Page 10 of the printed Town Report.

In place of comments as required by these same laws of the State, an answered questionnaire covering a municipal audit as prepared by the State is incorporated in this report.

SCHOOL SIGNALS

The "No School Signal" will be sounded only on those occasions when concern for the pupils' welfare makes it imperative.

Local travel conditions are variable, not only in stormy weather, but also in the late fall and early spring. Parents are urged to keep their children at home, even when school is in session, if road conditions in their locality are particularly hazardous.

SIGNALS

4 blasts blown at 6:45—

No School for the High School

4 blasts blown at 7:45—

No School for the grades for the forenoon session.

4 blasts blown at 11:30—

No School for the grades during the afternoon session.

EDUCATION

REPORT OF THE SUPERINTENDING SCHOOL COMMITTEE

Citizens of Sanford:

It has been our determined purpose to provide the boys and girls of our town with all those educational opportunities which will best develop them physically, intellectually and morally. Thus, we believe, they will be able to obtain a successful and contented livelihood in the society in which they live. It is our hope too, that as a result of such educational development they may better realize and appreciate the many advantages of living under our democratic form of government and a better understanding of their priceless heritage of freedom. We have encouraged that type of curriculum which will inspire our youth to become zealous in the propagation, preservation and protection of our form of democracy against the perilous philosophy of false ideologies with which we are constantly confronted.

Education costs money. It is an expenditure but it is also an investment. Its dividends cannot be evaluated in dollars and cents but we know on faith that the values of education to the individual and to the community are incalculable.

It will be noted in the following comparative analysis of expenditures that we have tried to keep pace with the rising cost of living by improving salaries for all school employees. It has been the purpose of the Committee likewise to make adjustments in salaries of teachers when existing inequalities are apparent. The years of training and experience of a teacher have also been considered important factors in salary advancement.

Salaries

	1946	1947	1948
Teachers (High School)	\$ 57,131	\$ 65,736	\$ 72,172
Teachers (Grade Schools)	85,690	101,381	102,270
Teachers (Industrial Arts)	17,814	21,361	22,601
Custodians	16,640	18,599	19,459
	<u>\$177,275</u>	<u>\$207,077</u>	<u>\$216,502</u>

Fuel

High School	\$ 2,456	\$ 2,317	\$ 3,364
Grade Schools	5,264	7,966	8,270
	<u>\$ 7,720</u>	<u>\$ 10,283</u>	<u>\$ 11,634</u>

EDUCATION

Conveyance

Grade Schools\$ 9,886 \$ 13,436 \$ 15,629

With rise in teachers' salaries and the salaries of custodians there has also been considerable increase in cost of fuel and conveyance as demonstrated above.

Textbooks, supplies, repairs and school equipment are likewise much more expensive today than in 1946.

Our total expenditures for 1948 amounted to \$286,433.51. The total receipts were \$286,826.05. This left a balance of \$392.54.

Our budget allocations were as follows:

Salaries (All School Employes)	76%
Fuel	4%
Textbooks and Supplies	7%
Repairs, Insurance and Equipment	3%
General Supervision and Control	1.5%
Evening School	1%
School Nurse9%
School Grounds1%
Contingent	1%
Conveyance	5.5%

There are greater and more exacting demands on the educational process of today by reason of the increasing complexities of our social, economic and civic life. This expansion of our educational program demands the assumption of more and greater responsibilities on the part of school authorities. It is not as simple as in former days.

Our policy has been to secure and retain well trained and experienced teachers. Our pupil-teacher ratio has been properly maintained to secure best teaching results. In other words, we have not permitted our teachers to be overburdened with too large classes. Without being extravagant we have endeavored to provide suitable and modern textbooks, adequate supplies, equipment and teaching material. We feel that these things are essential if our investment in education is to be sound and effective.

The cost of construction and repairs has been high. However, in this matter too we have not neglected the immediate needs of our youth in maintaining the proper upkeep of our buildings. The obligation of providing proper facilities for our Physical Education program has been met in the construction of our new Gymnasium. This will not only meet a school need but also a community need as well. We feel sure this

EDUCATION

will be a great asset to our school program and our community life to foster better citizenship and a finer sense of true Americanism.

Our educational program has been expanded to include training not only in the academic and purely classical fields but also in industrial and vocational training. Courses are also offered in domestic science, general science, social studies, commercial subjects and modern languages. Such an educational preparation is calculated to satisfy the needs of the average youth of today when he concludes his studies. We have tried to take into consideration those who will continue their education in higher schools of learning and those who will immediately enter into the world of occupations.

We have favored a modern, revised salary scale which will guarantee higher salaries to good teachers and better professional standards for the teaching profession.

We have believed in encouraging more professional training on the part of teachers by substantially subsidizing summer school attendance.

In conclusion we wish to thank you the citizens of this community who have worked so wholeheartedly in cooperation with us for the continued betterment and enrichment of our educational system which is the bulwark of our democracy.

Respectfully submitted,

ROSARIO J. TREMBLAY, Chairman

FRANCIS PROULX

GEORGE S. WILLARD

EDUCATION

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Citizens of Sanford:

It is a cause of much joy and satisfaction to report that the year 1948 has witnessed the beginning of the long-awaited construction of our new Auditorium-Gymnasium. Its anticipated completion in 1949 will satisfy a need long felt and most vital to the best interests of Sanford boys and girls of school age as well as to the community at large. Then, too it is the finest form of tribute and testimonial by which those brave sons and veteran heroes of Sanford who gave their all to their Country can be commemorated.

Since Sanford by reason of our new Gymnasium will soon be able to engage on a fair basis in physical competition with other schools, I recommended the appointment of Mr. Sven Rosengren as physical education director in the grades. This is the first time that such instruction and supervision in physical development has been given to our grade school youngsters. It is a program that is strongly urged by our State Department as essential to a good modern education system. Under the able direction of Mr. Rosengren it is already proving to be advantageous to pupils and popular with teachers. Special subsidy comes from the State to finance this program.

Total enrollment in our schools was slightly larger this year than last. Comparative statistics on enrollment during the last two school years are as follows:

	1947-48	1948-49
Sanford High	544	574
Edison	195	181
Emerson	204	197
Hamlin	147	135
Hawthorne	57	52
Lafayette	184	184
Lincoln	173	166
Longfellow	213	235
	<hr/> 1717	<hr/> 1724

Our teaching staff consists of 45 teachers in the grades, 28 in high school, 3 Industrial Arts, 2 Vocational Training, 3 Domestic Science, a Music Supervisor, School Nurse, Art Supervisor, Rinehart Handwriting Supervision, 2 Office Clerks.

EDUCATION

There have been fewer changes in our teaching staff than in any recent year. Only three changes were needed in the high school faculty. Miss Anne Flemming replaced Miss Dorothy Boulos as physical education director for girls. Lawrence Arnold replaced Francis Griffin who has become an employee of the U. S. Census Bureau. John Fahey replaced Mrs. Grace Earle, now retired. New grade teachers elected were Miss Catherine Morrill, James Bannon, Rinette Pelletier and Phyllis Bouchard. Miss Helen Kostis was appointed to Domestic Science at the Emerson and Hamlin Schools. Miss Abbie Harvey, formerly at Bath, Maine, is our new Supervisor of Music. Sven Rosengren is physical education director in the grades.

We believe that our Salary Schedule, revised again in 1948, has done much to retain a more stable staff of competent and efficient teachers. Sanford's salary scale for teachers has brought favorable comment from our State Department of Education and also from authorities on salaries at Harvard University and elsewhere. Few localities if any in New England have better salary provisions or better maximums than those offered to teachers in Sanford. As a result we have had no teacher shortages but on the other hand an abundance of applications for teaching positions in our town. This is something to be grateful for especially when we learn that 2,000 additional teachers will be needed in Maine next year with approximately only 500 student teachers available in our Normal Schools and Teachers' Colleges.

We have re-organized all of our departments so as to guarantee closer supervision and greater efficiency in administration for better achievement.

Regular Scheduled Conferences of teachers in each department are held monthly. These meetings are of formal type and include reports on recently published professional books, reports on what other systems are doing in a particular field and making comparisons with our own, a discussion of audio-visual aids, occupational information connected with the course of study offered, development of curriculum course content, guidance, evaluation of new text books, needs as far as supplies and equipment are concerned, a suitable testing program, and any other problem or pertinent matter that members of the department might have. Finally as an outcome a detailed report of final conclusions and recommendations of the Conference is then made out by the Chairman or Head of the Department which is filed with the Superintendent. This group participation on the part of teachers in curriculum development and supervision is making for a more interested, intelligent and unified school system. It means better coordination and a more scientific and progressive approach to our educational plans and problems.

EDUCATION

Our school housing facilities are adequate for the present but with anticipated increases in enrollment in the years ahead more building space will be needed. When this becomes necessary I would recommend the construction of an annex or additional wing to our present high school building making a combined junior-senior high school to accommodate our 7th and 8th grades. The educational advantages and immediate use of our new Gymnasium-Auditorium would than be available to our younger students. It would also be possible to transfer the pupils attending the Longfellow School to the Emerson School where there is a larger and safer playground and building. This would likewise appear to be a more economic way of handling the situation.

There is also another definite need for athletic grounds and stadium at the high school. I have asked the architect, Mr. Parnum of Kuljian & Co. to include these plans in his drawings of the new building perspective. Volunteer help could be drafted in carrying forward such a project and already there is much enthusiasm manifest in the community for such a project.

Long-range planning of this kind is wise because it will make it possible for us to take advantage of any State or Federal Aid which will doubtless be available in the near future. Such bills to aid school building projects are now in the process of being presented to the U. S. Congress and the State of Maine legislature.

Our program of supervision in Art, Music, Penmanship and Health has achieved a high degree of perfection. Pupil demonstrations in these various fields show outstanding achievement.

Worthy of special mention also is the splendid showing of our high school band and orchestra. Dramatics, debating, public speaking, driver-training, girls' basketball, track, school paper, basketball, football and baseball all offer opportunities to our boys and girls to occupy their leisure time profitably and correctly. We are anxious for every student to enrich his school life by participating in some extra-curricula activity.

In analyzing the state of our school system I believe we can safely conclude that progress is being made and every effort is being expended to insure a superior educational system in Sanford.

Your cooperation, so evident at all times in school policies, is greatly appreciated. It is a pleasure to work with you.

Respectfully submitted,

ROBERT H. McCARN,

Superintendent of Schools.

EDUCATION**REPORT OF THE
PRINCIPAL OF HIGH SCHOOL**

Superintendent Robert McCarn

Dear Sir:

I hereby submit to you my report as principal of Sanford High School.

Enrollment.

The enrollment figures are as follows:

Fall Enrollment 574

Left School and Reasons:

Moved Away 3

Transferred 2

Armed Services 1

Work 6

Unknown 3

The above enrollment shows a slight increase over a year ago. The number leaving school has decreased by half over each of the past three years. Whether this is due to better adjustment of students is hard to ascertain. If the holding power of the school is being strengthened however, it is indeed gratifying.

It is a pleasure to be able to report steady progress in the various branches of our school activities.

Scholarship

Scholarship is, on the whole, showing definite improvement partly as a result of definite effort to work with individuals, guiding them into the course to which they are best fitted and partly as the result of more specialization among the teachers. Tangible results of this should soon be seen.

Philosophy of Education

In order that members of the faculty and administration may at all times continue to hold a broad view of education and its relation to the youth of Sanford, a thorough curriculum study will be made during the last half of the school year. An appraisal of the present philosophy of education will be made with a revised philosophy as the probable outcome. A survey of the "needs of youth" in Sanford High, an evaluation of the present curriculum, and a thorough study of course content will be undertaken.

EDUCATION

Guidance.

The guidance program under Henry Perry has been strengthened and broadened to the point where it is possible to point with justifiable pride to important results.

Dramatics and Speech

Dramatics and Speech classes are being held again this year under the direction of Miss Marjorie Vallely and have justified their inclusion in the offerings of the high school.

Band and Orchestra

Following the lead of the larger schools of New England, the Band has lost its extra-curricula status and has been incorporated as a regular school subject, meeting four periods a week and carrying scholastic credit.

The Orchestra also under the direction of Mr. Everett Firth, has taken its place with the Band as a most worthwhile activity. Both Band and Orchestra will, due to the efforts of the Band Boosters, attend the state and New England Music Festivals.

Auditorium-Gymnasium

It is a tribute to Sanford citizens that next year the town should have one of the finest gymnasiums in this part of New England. No effort has been spared to make it a usable building—modern in every respect. With its potential capacity of approximately 2,000, it should serve its purpose well for many years.

Athletic Field

A project, not included in planning for the gymnasium and necessary to the rounding out of a physical education program, is the development of an athletic field at the rear of the gymnasium. Such a project should receive strong support as realization would mean an athletic plant of inestimable value.

Athletics

Sports continue to interest and bring benefit to a large group of students.

Football, undergoing a building process begun three seasons ago, has each year shown improvement in numbers competing, in spirit, and in success in competition with other schools. Under the present fine leadership it should continue to show progress.

Basketball, lacking boys of experience has not been too successful in games won and lost. Coach Nunan has a group of young and enthusiastic players who should, next year, give a good account of themselves. With the new gymnasium scheduled to be completed in October, high school basketball

EDUCATION

should receive a new impetus with greater numbers of students given an opportunity to benefit from this form of physical education.

Baseball, also under Coach Nunan, enjoyed a good season last spring and should be in a strong position again this year.

Track and Girls' Basketball, newcomers to the athletic program at Sanford High, have justified their inclusion as judged by the number of boys and girls served by these sports. Track, not as spectacular as basketball, is beginning to "take hold". Indoor track in the new gym is a possibility. Girls' Basketball has been popular and beneficial. In the past two years fine contacts have been made and pleasant relations enjoyed with girls of neighboring schools. Miss Anne Fleming, added to the Sanford High faculty this year, is an able and inspiring coach.

Sanford High students of today will be an important part of the America of tomorrow. They will help develop its resources, advance its science and industry, help to create new art, to make laws and grapple directly or indirectly with great international issues. They quite possibly will face complex problems which will make the problems of today seem simple by comparison. How well they deal with them depends to great extent on the kind of education they receive now.

May I express my appreciation to you, to the School Board, members of the faculty, and citizens of Sanford for the support and help given me during the past year.

Respectfully submitted,

LAWRENCE L. PAGE,

Principal

EDUCATION

REPORT OF THE SCHOOL NURSE FOR THE YEAR 1948

To the Superintendent of Schools:

The following report is of a program carried on to give each child the best opportunity for normal growth and development.

Individual care, as needed, has been extended to all school children. Children experiencing normal attitudes and conditions have been cared for by teachers and families. The school nursing program has resolved around detecting abnormalities, improving such, and assisting in returning children to an average grouping.

The basis of our program is the physical appraisal carried on for sub-primary, fourth and seventh grade students in the public grade schools and the sophomore students at High School.

The following referrals were made to parents for further investigation for the family doctor on recommendation of the examining physician:

- 52 Children needed further throat examination
- 48 Children needed further heart examination
- 4 Advised to have special care to ears
- 4 Advised to have Neurological examination
- 3 Children needed further examination because of hernia
- 2 Children referred because of presence of tumors
- 28 Children Advised to have tuberculin tests
- 6 Children Advised to have blood counts
- 6 Children Advised to have urinalysis

The above group of children are followed carefully and it is intended that before the school year is over all will have corrections made of conditions discovered. Last year 75% of referrals were cared for satisfactorily.

The preventive tuberculosis program continues as in former years. 488 students received the tuberculin test and 11 new students received the tuberculin test and 11 new students found to need chest X-rays. A monthly chest clinic is held at the Goodall Hospital and students needing X-rays are referred to that clinic. 138 were given such care and recommendations made for them by a chest specialist.

EDUCATION

Another part of our prevenative program was organizing and attending clinics held by the health officer for prevention of whooping cough, tetanus and diphtheria. 239 sub-primary age children received such injections. Also 298 school children were vaccinated against smallpox at clinics attended by the health officer and school nurse.

Again, this year the Searchlight Club and Springvale Woman's Club have provided free milk to underprivileged children in the schools.

Five hard of hearing children were examined by an ear specialist and care advised.

48 first-aid treatments were given to school children.

8 Dental clinics were held and 41 children received care.

In connections with obtaining correction of defects, tonsil clinics are held by the attending surgeons at the Goodall Hospital and 9 children received care. These clinics are made possible by the doctors, hospital staff and Women's Board and Auxiliary of the hospital.

An individual health record has been established for each child. This is a consecutive record from the sub-primary grade to senior year in High School. Notations of activities and details of care are recorded. These records are available to the teachers to acquaint them with the physical condition of children in their care. Also, they make for a cooperative program with the physical education department. The records are so kept that the type activity a child may participate in is made known to the physical education director. This is a very important point in both programs.

The policies of teacher's part in our program have been recorded and at a meeting held the first of the school year, these policies were explained.

There are definite state laws to assist in reducing the incidence of contagious diseases amongst the children. Teachers have been notified of their part in such a program. However, this is effective only if cooperation is obtained from the parents and instruction has been given to that group to keep their children at home at the first sign of illness. Considerable time is devoted during the year by both teachers and nurses in stressing this point to the parents.

Individual care has been arranged for 6 children needing care by a specialist.

EDUCATION

The Goodall Hospital offered the services of their laboratory for laboratory tests to all eighth grade students wishing such care. The purpose of such a program is to detect symptoms of disease early in life. 12 students were referred to their physicians for follow-up care as a result of these examinations.

216 conferences with parents were held and discussion as to particular problem of their child.

556 visits were made to classrooms in connection with the program.

241 home visits were made for the purpose of health instruction and 61 visits to ill school children.

This report is a part record of objective measurement of results of the school nursing program. However, scientific evidence of the value of some of the work can not be presented—but has been demonstrated by improvement in habits and attitudes of the individual child.

Respectfully submitted,

LAURA E. TABOR, R. N.

EDUCATION**REPORT OF THE
PRINCIPAL OF EVENING SCHOOL**

To the Superintendent of Schools:

I herewith submit my report of Evening School for the year 1948.

The same plan of opening Evening School early and closing Christmas recess was followed this year. It has proven very satisfactory and I believe should be followed in the coming years.

The enrollment this year was very good although not as large as in former years. A demand for a class in advanced English was sufficient to warrant opening a class. Mr. Harold Gates was the instructor.

The following subjects were offered this year:

Americanization	Bookkeeping
General Shop	Business Machines
Preparation and Serving of Foods	Shorthand
Millinery	Typewriting
Dressmaking	Advanced English
Rug Making	Art

If the gym is ready next fall, I am in hopes that it will be possible to offer adult gym classes. The adult gym classes were very well attended before the fire.

I feel that Evening School was very satisfactory and profitable to the people attending.

I wish to express my appreciation to you, to the teachers, to the students, to the Goodall-Sanford, Inc., and all others who helped to make the school year a success.

Respectfully submitted,

ITHEL PRESCOTT

Principal of Evening School

EDUCATION

REPORT OF THE GUIDANCE DIRECTOR

To the Superintendent of Schools:

It is with pleasure that I submit my second annual report as Director of Guidance.

In order to more simply review the guidance activities during the year 1948, there will be discussions under five separate headings corresponding to the five major guidance services, namely: Testing, Teaching of Occupational Information, Counseling, Placement, and Follow-up.

are separate headings corresponding to the five major guidance services, namely: Testing, Teaching of Occupational Information, Counseling, Placement, and Follow-up.

1. Testing—Grade Eight:

Whenever students transfer from the grammar school to the senior high school it is necessary for them to make certain very important decisions. In order that counselors and teachers can give these people much needed help in making these choices it is necessary to know as much as possible about their abilities, aptitudes, and interests. Much of this information can be gathered through the administration and interpretation of standardized tests.

The following tests, therefore, were administered to the eighth grade students of both the Emerson and Hamlin schools during the winter of 1948.

1. The Metropolitan Achievement Test
2. The California Intelligent Test
3. The California Occupational Inventory
4. Minnesota Clerical Test to the girls
5. The Minnesota Paper Form Board to the Boys.

Senior High School

Test Administration on the senior high school level can be for any one, or more, of several reasons. It may be to help teachers adapt their courses of study to the weaknesses and special abilities of their individual students, or as a source of information in a counseling situation, or to help ascertain a student's aptitude for present or higher education. To assist in these ends the following tests have been administered:

Grade Nine:

The Iowa Silent Reading Test.

EDUCATION

Grade Ten:

The Turse Shorthand Aptitude Test—to students planning to take shorthand during their junior year.

Grade Twelve:

1. The Otis Quick Scoring Test of Mental Ability.
2. The Kuder Preference Record.
3. The Bennett Test of Mechanical Comprehension to the boys
4. The Minnesota Clerical Test to the girls.

II. OCCUPATIONAL INFORMATION

A unit on occupations has been made a part of the course of study in the ninth grade civics classes. In these classes each student chose an occupation in which he was interested and wrote a detailed report on that occupation.

An effort is being made to build up a large library of free and inexpensive literature on occupations.

Teachers are bringing to the attention of their students those occupations which are related to their subjects.

Occupational tours have been conducted to local industrial plants.

III. COUNSELING—Grade Eight:

Teacher counselors in the Emerson and Hamlin Schools devoted a part of their time each week to counseling with eighth grade students with a primary purpose of helping them select their ninth grade subjects. As a result of this program there was less readjustment of schedules among the freshmen students this fall than there has been for some time.

Senior High School:

The question is continually arising, "Who should be counselled first?" This September at the suggestion of the Superintendent of Schools the counseling program was begun by first checking the physical records of all students. This was followed by an individual interview with each handicapped student. A notice was then sent to all teachers of physically handicapped students so that they could make the best possible classroom adjustment.

Considerable time was spent during the fall helping seniors who plan to continue their education beyond high school.

Five classroom teachers are cooperating with the director of guidance and the high school principal in the counseling program.

EDUCATION

Each student in the senior high school will have an opportunity for at least one individual interview with a competent counselor. Some students, of course, will have several interviews.

IV. PLACEMENT

While a few girls and boys have been placed in part time positions there are not, unfortunately, enough of these positions available in Sanford and Springvale to meet the demand for work.

Every effort is being made to encourage local employers to take advantage of the services of the Sanford High School in solving their employment problems.

V. FOLLOW-UP

A Follow-up Study of the classes of 1943, 1945, and 1947 is being made. A questionnaire asking for information about personal educational, and occupational data was sent to each member of these three classes. We have had some difficulty inducing graduates to return their completed questionnaires. Those who have not yet responded to the inquiry are now being followed up so that it is hoped that a complete report of this survey can be made in a short time.

The above is a summary of the activities of the Guidance Department during the year 1948. It is planned that these activities already established will be continued and expanded during the coming year. During 1949 we hope to inaugurate an annual "Career Conference" and an annual "Educational Conference".

A more conscious effort will be made to acquaint our students with the opportunities available in our local industries. To do this an attempt will be made to bring local merchants and manufacturers into the school to explain to the students the opportunities in their particular fields of work.

An earnest attempt will be made to assist our seniors to place themselves to their best advantage upon graduation from high school.

In closing I wish to thank the Superintendent of Schools, The Principal of the High School, and the classroom teachers without whose counsel and support our guidance program would be impossible.

Respectfully submitted,

HENRY B. PERRY,

Director of Guidance.

EDUCATION

REPORT OF THE MUSIC SUPERVISOR

To Superintendent Robert H. McCarn:

Dear Sir:

I am glad to present to you my report as Supervisor of Music.

Music—The Universal Language. All peoples, all countries, all nations, all communities can share in the many sided advantages of music.

The aim is to create a desire for and love of music.

Sight reading first as a means toward accomplishing that aim as we all enjoy the things most in which we take part.

Education—"To Learn To Think". Not only is it necessary to use the required physical effort, to have good posture, proper breathing, proper use of muscles, etc., used in singing but also to think the pitch, the words, the syllable names, the value of notes which includes thinking of arithmetic; all of this must be done by each individual in a set time required by the rhythm of the music.

The music we study helps to create an interest in other countries and we correlate our songs with our other studies. The social value of taking part in an enjoyable group activity can not be measured.

We give in public the work that has been done in class through the year and are at present planning two concerts for the Town Hall besides the others that have been and will be given in the different school auditoriums. We also expect to have our school system represented at the numerous festivals.

At present there are thirty-three elementary classes which are visited every other week for a half hour lesson by the supervisor and two harmony and music appreciation classes at high school as well as the High School Glee Clubs and the twelve seventh and eighth grade classes which are visited every week. The harmony class has the objective of not only having a keener interest in the beauties of music but the pupils have also acquired the ability to use the tonic, sub-dominant, and dominant chords in a practical way such as being able to harmonize simple melodies.

EDUCATION

We have had some music appreciation along with the harmony and during the last half of the year we shall put into practice our study of harmony in the appreciation of music. These classes are small but the pupils seem interested and many have spoken of electing the course for next year.

The Girls' Glee Club at high school is very large and there is a good sized Boys' Glee Club which has been made into a mixed group by adding some chosen voices from the Girls' Glee Club.

At Emerson there is a rehearsal after school every Thursday of a Glee Club to which all pupils of Hamlin and Emerson were invited for tryouts.

At Hamlin there is a rehearsal after school every Tuesday of a string class which consists of two cellos as well as violins representing Hamlin, Emerson, Edison, and Longfellow schools. It is hoped that this will be a great help to the High School Orchestra.

Mr. Firth, with his assistants, Mr. Cella and Mr. Ramsdell, is carrying along very successfully the instrumental music through the grades and high school.

There are ninety-two pupils in the High School Band, there are fifty-five in the Junior Band, and there are thirty-five in the High School Orchestra. Mr. Firth will present some concerts in the Town Hall here and has also presented some of his pupils in a joint concert with Portsmouth High School both at Portsmouth and at Sanford. The value of these joint programs is very great.

At present the supervisor is teaching so that the teachers may better understand the methods of the new supervisor. My predecessor did a splendid job and I do appreciate working in a system where there is a fine musical background.

The teachers carry on every day the work of the supervisor and we stress individual work. It is hoped that every pupil can have the opportunity to recite individually in music the same as in other subjects. The group work is also carried on every day.

In the lower grades we work with individuals especially as to pitch. It takes time but is time well spent. Many children who can not sing at all on pitch at the beginning of the school year become the best singers. They need help and I believe in giving help to them. It is said that every one who can speak can sing and with this statement I heartily agree. We use either names of birds or choirs and never the word

EDUCATION

monotone. No child should ever be told by anyone, parent or teacher, that he or she can not sing. Children remember and oftentimes carry ideas through life to their own detriment.

It has been a joy to work in such well-kept mostly up-to-date buildings and in such a splendid school system and I wish to thank you, also Mr. Page, the principals of all the schools, all of the teachers, and all concerned, for the cooperation I have received since coming to this up-to-date friendly community last fall.

Respectfully submitted,

ABBIE HARVEY,

Supervisor of Music

REPORT OF ART SUPERVISOR

To the Superintendent of Schools:

I submit the following annual report:

The Contemporary Expressions of a Nation are reflective of the current philosophy of its leaders. In art, as in politics at the moment, there is quite a controversy between the tendency to favor the slightly left of center and the effort to remain in the middle. In the world of fashion an attempt is being made to stereotype appearances by what is termed the "feminine look" and the "dominant look." No phase of life stands alone. Every vital as well as the seemingly inconsequential issue is indicative of a mass impression which forms a culture pattern or vibration design. The same is true of an organization such as a school system. The current teaching philosophy is that of democracy expressed in the center. Consequently, the art program is reflective of that philosophy.

The present specific objective is an informality in teaching methods conducive to a more fluent means of self-expression for all, as opposed to the stereotyped lesson of not long ago which emphasized technique and resulted in success for the relative few possessing "talent".

The pupil's UNDERSTANDING or MENTAL CONCEPT of a situation is placed above SURFACE QUALITIES.

This type of art expression is not "merely pretty". When successfully undertaken, resulting lessons are far more exciting and meaningful to both the child and his teacher.

EDUCATION

To be more specific—a typical unit of study such as Mexico may be approached in two of the following ways: The stereotyped approach in art would be for a whole class to follow the teacher in drawing the Mexican, as he is often represented, as a sleepy individual wearing a sombrero and reposing beside a cactus. Resulting expressions would be copies lacking vigor, depth and interest.

Today, the classroom teacher, in presenting a unit, uses art expression in covering a situation more completely. Using much outside reference material from the library, film strips, photographs and any actual Mexican products which the children or other interested individuals can contribute, she encourages the pupils to make and dress dolls to represent people, construct homes, model animals and vehicles, paint a mural, and to express their own UNDERSTANDING of the whole situation by drawing original pictures of Mexicans in the many occupations typical of any people engaged in living a busy life. These creative illustrations will lack the stilted near-perfection of the stereotyped lesson. Except for the child with special ability whose work will be outstanding, some of these Mexicans may be slightly or even badly out of proportion, but if the child's conception is clear, the Mexicans will go vigorously about their business of living and remain vivid and colorful in the child's mind.

Such a democratic approach in teaching not only encourages self-expression but fosters better inter group relations. The children who gain a clear impression of the many ways in which peoples of other culture patterns are like themselves rather than having culture DIFFERENCES emphasized will grow to be more UNDERSTANDING citizens of America rather than merely tolerant. Understanding can contribute to world peace and eventual unity.

In conclusion, I wish to express my appreciation to you, the School Board and the teachers for your helpful cooperation in making the art program successful.

Respectfully submitted,

HAZEL M. HARRISON,

Supervisor of Art.

EDUCATION

REPORT OF THE DIRECTOR OF HOME ECONOMICS

To the Superintendent of Schools:

I herewith submit my annual report of the Home Economics Department of Sanford High School.

The theme of our home making program, around which the units are planned, is better home for all families. With this in mind the main objective is to interest as many girls as possible to study homemaking, during some part of her high school career, regardless of her plans immediately following graduation. Each girl needs the combined training of home and school in home economics to enable her to understand and solve the problems of home and family life.

During the past year some revisions have been made in the general plan of studies for vocational and general groups. The course now includes units in general home economics for all ninth grade girls given one period daily. The subject matter covered is personal and social living, grooming, personal appearance, nutrition, consumer problems, and child care and development.

Grades ten and eleven are given double periods daily and include laboratory work. One year of nutrition and food preparation and clothing construction are offered with additional units in related subjects, namely, textiles, home management, home improvement, home nursing, personal and family problems.

Single period classes are offered for grade twelve. These classes are for vocational and general girls. The vocational group having completed double periods daily for three years conclude their studies with advanced food problems, dietetics, family relationships, child care and vocational opportunities in home economics. The general group girls, who may or may not have had one year of home economics previously, study nutrition, problems of the family, personality development, vocations, choice, care and cost of clothing.

In September 133 girls were registered in this department which was the largest number we have ever had.

This year forty-two of the girls enrolled in Home Economics classes organized a chapter of the Future Homemakers of America which has affiliated with the State and National Organiza-

EDUCATION

tion. The purposes for which this organization shall serve are as follows:

1. To promote a growing appreciation of the joys and satisfactions of homemaking.
2. To emphasize the importance of worthy home membership.
3. To encourage democracy in home and community life.
4. To work for good home and family life for all.
5. To promote international good will.
6. To foster the development of creative leadership in home and community life.
7. To provide wholesome individual and group recreation.
8. To further interest in home economics.

Conferences are being held each month this year with Miss Mary Waterhouse and Miss Helen Kostis, co-workers in the department, to coordinate the work of all grades, improve standards of the department and develop better understanding of all phases of Home Economics.

In conclusion I wish to express my sincerest appreciation for all who have in any way helped to make this department a success.

Respectfully submitted,

BLANCHE C. PHILBRICK,
Director of Home Economics

LIST OF TEACHERS

ANNUAL REPORT

Of Selectmen and Overseers of the Poor

January 1, to December 31, 1949

The following pages contain a report of the activities of the various departments of the town for the year 1949. In this report the people of Sanford may readily gauge the extent to which the town as a whole has progressed. With the addition of new buildings, roads, sidewalks and other projects, we certainly have progressed beyond former years. We, the selectmen of Sanford, must extend our most sincere thanks to the heads of the several departments, to the clerks under them and to the people of Sanford who have helped us to arrive at the half century mark with the utmost confidence in the future of the town.

At the beginning of the year, the town's largest project by far was the construction of a new gymnasium and auditorium. This project was the subject of several discussions pro and con. With the formal dedication of this new building and the turning over of the keys to the school department slated for the first of this year, the democratic way of acceding to the demands of the majority will have prevailed, and we sincerely hope that the predictions of the proponents of the gym will bear fruit to the extent that this building will be self-supporting. The people of this town have for years been forced to go out of town for events that could not come here due to lack of facilities that would allow a large enough congregation to assemble to meet expenses. With a seating capacity of some 3,000 people in the new gym, it is felt that a new era in entertainment is in store for the people of Sanford.

The formation of a sewer district in the early part of 1949 while not under the jurisdiction of the board of selectmen, should receive some attention in this statement, as we feel that this is of vital interest to the town. The warrant for the annual town meeting of December 1949 was the first one that

did not contain articles for extension of sewers or construction of new ones. With both utilities water and sewer now in a position to plan their own work, it is hoped that together with the road commissioner of the town, all new streets could be completed at once with water and sewer pipes laid at time of road construction. This would stop the practice of building a road, surfacing it, and then having the street dug up again to lay pipes.

The park department also completed its new building in Carpentier park on High Street. This building is designed to be used as a combination field house and library. While the building was substantially completed in 1949, it will not be until the early part of 1950 that the building will come into use.

The people of Springvale can thank some woman (as yet unknown to the selectmen) for the new bridge on Mill Street. Construction had been delayed on this job for two years due to price rises. If it had not been for this woman going through the bridge while walking across it, a more serious accident might have taken place. When the condition was realized, the bridge was closed to traffic and work started. The new bridge should outlast the most of us now here, and no further expense is expected there for some years to come.

A fund of approximately \$19,303 that had been accumulating for several years in favor of Sanford in the state aid road account was discovered, and with this fund about four and one-half miles of the Whicher's Mills road was rebuilt. This road upon application of the selectmen to the state highway commission was designated as state aid road No. 14. This construction fills a long felt need in this section as many parts of this road were impassable in the spring of the year. The total cost to the town for this piece of road was \$7,195.50. The state paid out \$12,106.43. We now have a balance with the state of \$1.91.

It would seem that the general conditions in the town for 1949 were no worse than in many other towns, and were better than some. A good indication of this may be found in the number of private homes being built, and general construction while not as great as in 1947 and 1948, compared very favorably with pre-war years.

We might well be proud of the steady progress made by the town in the year 1949. Everything that was done either privately or by the municipality would seem to indicate that we were facing the second half of this century with confidence. There have been many changes in the past 50 years, and no one can deny that this town did not stay abreast of the times. We have become the largest town in Maine, and the people of Sanford can be sure that our progress has been closely watched by other towns as we raced ahead in every phase of municipal life.

With the continued cooperation of the citizens of Sanford, and of the various departments of the town, we feel sure that the year 1950 and the years to follow will be outstanding in the records of the town. May our progress be uninterrupted, and may each and every citizen enjoy a prosperous year.

Respectfully submitted,

THOMAS A. MEUNIER,
ARTHUR M. CARIGNAN
MAURICE J. MAURICE

PROTECTION OF PERSONS AND PROPERTY**REPORT OF THE BOARD OF ENGINEERS OF
THE SANFORD FIRE DEPARTMENT**

January 22, 1950

To the Municipal Officers of the Town of Sanford

GENTLEMEN:

The Engineers of the Sanford Fire Department submit the following report for the year 1949:

We have checked the equipment of the department and find it to be in excellent condition. The Ahrens Fox 1922 pumper must be considered to be reaching the point of replacement because when a truck is 28 years old its replacement parts are no longer available. It is only through the excellent care that this truck has had that keeps it now in service. The value of the new tank truck purchased in 1948, has been shown many times the past year.

We are pleased to report a new low fire loss record of the Town of Sanford for the year 1949. The loss was \$1,800.00 to \$170,000.00 worth of property endangered. We believe this is proof of the efficient control of fires in our town. The credit for this efficiency can be given to the Call Firemen of the Sanford Fire Department, no such record could be reported without this type of cooperation.

Much has been done in the Fire Prevention program of the town, made possible by the new ordinances adopted at the 1946 town meeting. There is a minimum amount of oil stored above the first floors, through the requirement of oil storage permits.

The collection of rubbish weekly by the Highway Department is of great value in keeping the fire losses low in Sanford. We sincerely hope this activity will never be disbanded.

Through the excellent cooperation of your building inspector with the Fire Department, Sanford is a safe, clean town to live in.

We wish to express our sincere appreciation to the various departments of the town for the excellent cooperation given this department this past year. Especially we want to thank the Police Department, the Springvale Fire Department, the Highway Department, the Selectmen and the citizens of the town for helping make the fire control a success for 1949.

Sincerely submitted,

CURTIS ALLEN, Chief

CHARLES C. CHADBOURNE, 1st Asst. Chief

BERNARD CHADBOURNE, 2nd Asst. Chief

PROTECTION OF PERSONS AND PROPERTY**REPORT OF CLERK OF
SANFORD FIRE DEPARTMENT**

Sanford, Maine

January 1, 1950

To the Municipal Officers of the Town of Sanford, Maine:

I hereby submit the following report of the Sanford Fire Department for the year 1949.

The Department has responded to 223 calls, 202 stills, 9 bells, 4 house calls, and 8 fire drills.

Estimated Value of Property Endangered	\$170,500.00
Damage to Property Endangered	1,800.00
Insurance Paid on Property	1,800.00
Total feet of hose laid	22,975
Total Gallons of Chemical Used	39
Total feet of ladders raised	660
Miles apparatus traveled	1,205

Respectfully submitted,

GEORGE F. FERGUSON,

Clerk.

PROTECTION OF PERSONS AND PROPERTY**REPORT OF THE BOARD OF ENGINEERS OF
THE SPRINGVALE FIRE DEPARTMENT**

January 23, 1950

To the Board of Selectmen:

The Board of Engineers of the Springvale Fire Department submit the following report for the year ending December 31, 1949.

We have responded to 179 alarms for the year, also had over 800 inspections of buildings during the year.

Our outstanding feature of this year was the purchase of our new water tank. We used it at the Morrell farm fire keeping the loss down to \$2,500, which otherwise if totally destroyed, would have been several thousand dollars loss. Therefore, on that one fire alone it paid for itself.

The report of lives in surrounding states make us stop and feel that our town can be proud of the fire company and the people who are cooperating with us in keeping down the hazards that creates fires.

This year we have asked the Board of Underwriters to come for a survey of this town, to reclassify the insurance rates, as we know that the equipment of the department is up to a high standard, and a better rate should be given.

We are very pleased that the fire escape and piazza have been erected on the Town Farm, and thanks to the Selectmen for their help in making it possible. We hope that in the future, a fire proof building will be built.

The Town Hall has also had a new fire escape erected.

We have purchased a two-way radio for our tank truck.

We thank the public for their cooperation in burning permits, it has kept the fire loss down to a great extent.

We thank the different departments of the town for their help the past year.

Respectfully submitted,

HARRY MARSHALL, Chief
CHARLES A. WINSLOW, Assistant
HAROLD BALDWIN, Assistant

PROTECTION OF PERSONS AND PROPERTY**REPORT OF CLERK OF
SPRINGVALE FIRE DEPARTMENT**

December 31, 1949

To the Municipal Officers of the Town of Sanford:

I hereby submit the following report of the Springvale Fire Department from January 1, 1949 to December 31, 1949.

The Department has responded to 179 alarms consisting of 158 stills, 13 bell alarms, 8 house calls, also 7 drills.

REPORT OF NURSING WORK OF COMMUNITY HEALTH ASSOCIATION, INC. FOR 1949

To the Citizens of Sanford:

The program of the Association has been one based on principles of public health nursing. The volunteer group of citizens who comprise the membership of directors have met monthly and kept in contact with the nursing program.

The financial support has been the same as in previous years—volunteer contributions, town appropriations, fees from patients and insurance companies.

A detailed report of visits can never be made in a general report for much of the work is confidential between the doctor, patient and nurse.

However general figures for reporting work done are given below:

829 home visits were made to acutely ill patients.

338 home visits were made to ones with chronic illnesses.

158 home visits were made to pre-natal patients.

250 home visits were made to new mothers and new born babies.

680 home visits were made to well infants and pre-school children.

279 home visits were made to tuberculosis patients.

Clinics to promote prevention of disease were organized and attended as follows:

(1) one community chest x-ray survey was held and 5,400 individuals x-rayed.

(2) Assistance was given the health officer at monthly clinics where 159 children under school age were inoculated against whooping cough, tetanus, and diphtheria, 51 pre-school children were vaccinated against small-pox.

(3) 8 chest clinics were held at the Goodall Hospital and 93 adults were x-rayed.

Well baby conferences were held on Thursday afternoons and 728 visits were made to the conferences by mothers and babies.

19 Sanford children were given care at the summer health camp for a seven-week period. All these children had some type of a physical defect and were referred by their doctors for special care. This project reduces the incidence of disease and prepares the children physically and mentally for the winter months. Volunteer financial assistance supports this branch of work.

The total visits for the year numbered 3,032.

Respectfully submitted,

ALPHONSE GUILLMETTE,
President.

REPORT OF THE HEALTH OFFICER FOR 1949

To the Selectmen, Town of Sanford, Maine

GENTLEMEN

As Health Officer for the Town of Sanford from January 1, 1949 to January 1, 1950, I herewith respectfully submit a report of health activities during the current year.

In 1949 Sanford's public and parochial school children were given physical examinations with the aid of the school nurse, Miss Laura Tabor, R. N.

All cases of contagious diseases in school children which were referred to the health officer were isolated until all chance of infection of others was gone.

In the public and parochial schools, vaccinations and inoculations were given to all children having parents' consent. Vaccinations and inoculations were given also to pre-school children at monthly clinics.

Dr. Kenneth J. Kornetsky, as in 1948, examined the eyes of children in the primary grades.

Medical and surgical care was given to welfare cases where needed. When necessary, State children who are boarded out were also given medical care. Care was given to old age assistance cases whenever treatment was indicated. This included visits to the Town Farm, and "rest homes" in Shapleigh, Acton, Lebanon, and other towns.

Whenever complaints were received, public nuisances and infractions of the plumbing and sanitary laws were investigated and dealt with. When not immediately corrected, they were reported to the proper authorities.

All possible precautions were taken to detect and prevent the spread of contagious diseases. The number of these diseases was thus relatively low.

In conclusion, I wish to express my thanks to the welfare and school nurses, and to Mr. and Mrs. Drowns for their help and cooperation during the year.

Respectfully submitted,

A. S. LINCOURT, M. D.,

Health Officer.

REPORT OF PARK COMMISSION

To the Honorable Selectmen, Town of Sanford

GENTLEMEN:

During the past year of 1949 the Park Commission are pleased to report an advancement in all phases of its work, including playground activities which have shown development in several new lines of games and play material. The new fieldhouse at Carpentier Park, adding a new physical as well as social center, with a new playground contemplated for the coming season. The park situation is improving with Gowen Park being beautified and Central Park having new shrubbery installed this coming season. Tree addition and development will also be in order as in the past.

Through the medium of the Park Commission a more beautiful Sanford is desired and hoped for.

Respectfully submitted,

F. EVERETT NUTTER, Chairman

HARRY STOTT, Secretary

RAYMOND LORD, Engineer

ANNUAL REPORT

Town Clerk and Tax Collector

January 1 to December 31, 1949

REPORT OF VITAL STATISTICS

BIRTHS

There were four hundred and thirty-seven (437) births recorded in this office for the year 1949. This shows a decrease of twelve (12) births as compared with the year 1948.

Of this number, two hundred and five (205) were of the female sex and two hundred and thirty-two (232) were of the male sex.

The number of each month is shown below:

	1949	1948
January	32	40
February	31	37
March	44	39
April	30	29
May	48	49
June	36	33
July	41	35
August	39	45
September	30	40
October	46	46
November	30	25
December	30	31
Totals	437	449

MARRIAGES

There were one hundred and sixty (160) marriages recorded in this office for the year 1949. This shows a decrease of twenty (20) marriages as compared with the year 1948.

In addition, thirty-five (35) marriages were reported from other city and town clerks during this same period.

TAX COLLECTOR'S REPORT

The number of each month is shown below:

	1949	1948
January	4	14
February	17	15
March	6	6
April	15	11
May	22	17
June	17	31
July	14	22
August	9	12
September	17	21
October	17	17
November	12	10
December	10	4
Totals	160	180

DEATHS

There were one hundred forty-nine (149) deaths reported in this office for the year 1949. This shows a decrease of sixteen (16) deaths as compared with the year 1948.

Of this number, sixty-six (66) were of the female sex, and eighty-three (83) were of the male sex.

One hundred and twenty-seven (127) were buried in town, twenty-nine (29) were taken outside for burial, and forty-six (46) were brought in for burial.

We have had six (6) stillbirths.

The number of each month is shown below:

	1949	1948
January	11	18
February	19	16
March	14	11
April	12	8
May	16	17
June	9	7
July	11	13
August	10	20
September	12	12
October	12	15
November	16	10
December	7	18
Totals	149	165

TAX COLLECTOR'S REPORT**DOG LICENSES**

During the year 1949, there were ten hundred and sixteen (1,016) dog licenses issued in this office. In addition there were five (5) kennel licenses issued.

These licenses represent one thousand four hundred and sixty-seven dollars and ninety cents (\$1,467.90) which was received and paid to the Treasurer of the State of Maine on December 31, 1949.

The following licenses were granted:

Six hundred and thirteen (613) males	\$ 551.70
Two hundred and seventy-seven (277) spayed females	249.30
One hundred and twenty-six (126) females	617.40
Five (5) kennels	49.50
	<hr/>
	\$1,467.90

109 Main Street
Sanford, Maine
February 3, 1950

Mr. Thomas Meunier, Chairman
Selectmen, Assessors, and Overseers of the Poor
Sanford, Maine

Dear Mr. Meunier:

In accordance with Chapter 16, Section 3 of the Revised Statutes of 1944 and at your request, the records of the Town of Sanford have been audited for the year ending December 31, 1949.

I herewith enclose my report of this audit with supporting schedules and questionnaire.

The Records of the Town Treasurer, Selectmen, Superintendent of Schools and Town Clerk and Tax Collector of the Town of Sanford have been audited weekly and their records checked with mine and have been found to be correct.

Respectfully submitted,

MARGARET M. SHAW,

Auditor

**QUESTIONNAIRE COVERING MUNICIPAL
AUDIT AS PREPARED BY THE STATE
DEPARTMENT OF AUDIT**

Name of Municipality: **SANFORD, MAINE**
Fiscal Year: **January 1, 1949 to December 31, 1949**

Assessors

1. Was valuation book added to verify warrant of commitment? Yes.
2. Was verification made of any additional taxes committed? Yes.
3. Was examination made of all abatements allowed? Yes.
4. Were abatements signed by majority of assessors? Yes.
5. Were the valuation records examined to ascertain if they appear to adequately describe the property? Yes.
(a) Do you believe them to be adequate? Yes.
6. Was the valuation book properly signed? Yes.
7. Do you consider the overlay to be within the legal limit of 5% of town appropriations plus state and county taxes? Yes.

Tax Collector

1. Were taxes in commitment book compared with valuation records and reconciled to total amount of warrant to collector? Yes.
2. Was examination made of the books of collector for uncollected taxes previous years? Yes.
3. Were all delinquent taxes reconciled? Yes.
4. Were uncollected taxes verified? Yes.
(a) By what method? Weekly audit.
5. Have all uncollected real estate assessments been secured by the tax lien or deed method? Tax lien.
6. Has interest or discount been properly handled? Interest—Yes.
7. Was the commitment book properly signed by the Assessors? Yes.
8. Were excise tax collections checked? Yes.
9. Did the collector make monthly remittances to the Treasurer, as required by law. Semi-monthly—Yes.

Treasurer**Cash**

1. Were numbered receipts used? No.
2. Were these receipts checked in detail to Treasurer's cash book? Yes.
3. Were deposits made promptly? Yes.

4. Did Treasurer have warrants or orders covering all expenditures and signed by the required number of officials? Warrants—Yes.
5. Were all warrants paid in full by the Treasurer? Yes.
6. Were all payments made by check? Yes.
 - (a) Were they verified by comparison with checks? Yes.
7. Did the Treasurer have undeposited cash on hand at the close of the year? (The books were kept open about a week at the close of the year so all money due from the State could be deposited and final bills paid.) No.
 - (a) Did you verify this deposit or deposits? Yes.
 - (b) Was cash brought up to date of audit? Yes.
8. Did the bank balance as reconciled, plus cash on hand equal the cash book balance at the close of the year? Yes.

Tax Liens

1. Have you examined the tax liens listed as assets to determine their value? Yes.
 - (a) In your opinion are they valid? Yes.
 - (b) Were unpaid tax liens verified? Yes.
2. Have you checked payments during the year? Yes.
3. Have you reconciled detailed lists of control accounts? Yes.

Clerk

1. Were records checked for appropriations and salaries of officials? Yes.
2. Were all appropriations legal? Yes.
3. Was a check made of all licenses other than dog and hunting and fishing? Yes.
4. Did Clerk remit in full for all licenses? Paid to Treasurer.
5. Were certificates of oaths of office properly recorded? Index file.

Municipal Officers

1. Is there a complete double-entry bookkeeping system? No.

(The Selectmen keep the record of the payments. The Treasurer keeps the record of the receipts in detail—the total of each check is listed in his cash book.)
2. What was the condition of the records? Very good.
3. Were cash receipts properly credited? Yes.
4. Were disbursements in agreement with warrants and properly distributed? Yes.
5. Did disbursements appear to be reasonable and proper charges? (Bills and payrolls were approved by at least a majority of the Selectmen before preparation of the warrant.)
6. Were vouchers and payrolls examined? Yes.

1. Were records checked for appropriations and salaries of officials? Yes.
2. Were all appropriations legal? Yes.
3. Was a check made of all licenses other than dog and hunting and fishing? Yes.
4. Did Clerk remit in full for all licenses? Paid to Treasurer.
5. Were certificates of oaths of office properly recorded? Index file.

Municipal Officers

1. Is there a complete double-entry bookkeeping system? No.

(The Selectmen keep the record of the payments. The Treasurer keeps the record of the receipts in detail—the total of each check is listed in his cash book.)
2. What was the condition of the records? Very good.
3. Were cash receipts properly credited? Yes.
4. Were disbursements in agreement with warrants and properly distributed? Yes.
5. Did disbursements appear to be reasonable and proper charges? (Bills and payrolls were approved by at least a majority of the Selectmen before preparation of the warrant.)
6. Were vouchers and payrolls examined? Yes.

7. Accounts Receivable:
(a) Were they verified? Yes.
8. Accounts Payable:
(All bills to be paid within the year are paid on the supplemental warrant at the end of the year so there are no Accounts Payable.)
9. Bonds outstanding:
Are interest coupons paid to date? Yes.
10. Were school balances verified with Superintendent of Schools? Yes.
11. Have you carried usual school balances forward to new year? Yes.
12. Have you checked and are reserves set up for estimated losses on tax accounts and receivables? Yes.
13. Was total debt within the legal limit as provided by Article XXIV of the Constitution of the State of Maine? Yes.

Trust Funds

(There are two trust funds from which the Town of Sanford receives only the income which are held by lawfully appointed trustees.)

Fidelity Bonds

1. Treasurer
(a) Amount \$20,000.00.
(b) Name of surety company: Fireman Fund Indemnity Co.
2. Tax Collector
(a) Amount \$20,000.00
(b) Name of surety company: The Fidelity and Casualty Company of New York.

Protected Reserve Funds

None.

Sinking Fund

None.

General

1. Were any discrepancies or irregularities discovered in any account? Corrections and adjustments were made through the weekly audits.
2. Have you made detailed schedules of unusual items, special funds, etc.? Yes.

SCHOOL SIGNALS

The "No School Signal" will be sounded only on those occasions when concern for the pupils' welfare makes it imperative.

Local travel conditions are variable, not only in stormy weather, but also in the late fall and early spring. Parents are urged to keep their children at home, even when school is in session, if road conditions in their locality are particularly hazardous.

SIGNALS

4 blasts blown at 6:45:

No school for the High School.

4 blasts blown at 7:45:

No school for the grades for the forenoon session.

4 blasts blown at 11:30:

No school for the grades during the afternoon session.

REPORT OF THE SUPERINTENDING SCHOOL COMMITTEE

Citizens of Sanford:

The duties and obligations of those who serve on a School Committee are many and difficult at times. The responsibility of such service, however, often brings its own recompense for there is hardly a nobler task than the training and education of youth. "To few men in any community comes the opportunity for finer or more enduring service."

In our legislative and judicial functions as a board we have endeavored to think first, last and always of the best interests of the boys and girls who attend school.

There are of course certain limitations to our achievements. Budgeting and financing a school system to provide what is necessary and yet keep within the economic boundaries of what the town can afford is no easy matter at times. Yet it is necessary to consider the taxpayer, the property owner, the laborer, the industrialist and all others who are subject to taxation. The School Committeeman in his official capacity must think of the youth in particular and the community in general if his duties as a public official are to be properly fulfilled. Money can be wasted in any department unless closely supervised and administered.

We are glad to report that we have kept within our budget even though the amount of money received in 1949 from the State School Fund was nearly five thousand dollars less than anticipated.

A re-shaping of the budget about mid-year made this possible. Even with this necessary readjustment of allocations we were still able to meet salary increases in accordance with the provisions of our Salary Schedule. New textbooks were provided for many departments too long neglected, supplies were adequately dispensed, necessary equipment was purchased and repairs were made in all of our buildings.

The salaries of all teachers were increased with the exception of those who have reached the maximum on the Salary Scale, and those who serve as substitutes. Our Salary Schedule is still among the best provided by any community in the state. Its provisions are liberal and attractive to teachers; a minimum and a maximum; substantial increments annually; cumulative leave of 30 days; subsidization for extension courses and summer school attendance. Our staff is much more stable and fewer changes in personnel result in much greater efficiency and progress educationally. The teacher is still the most important factor in our school system. To be a good teacher, training and experience, are of course necessary, but professional contentment and satisfaction are also essential if the best teaching results are to be attained. High salaries alone will not bring this satisfaction and contentment. There are many

EDUCATION

other conditions which must not be neglected. We have kept in mind this fact by eliminating any overcrowded conditions in classrooms; by providing sufficient supplies; essential equipment, proper textbooks. Classrooms and corridors have been repainted and redecorated to provide a better atmosphere for both teachers and pupils to carry on their work.

It has been the policy of the Committee to provide transportation for pupils who live a mile or more from the school which they attend. Bus routes have been established to cater to the greatest number of pupils who live outside that radius. Permits in the form of badges are issued to each pupil privileged to ride. This has eliminated much confusion and the possibility of overcrowding the buses and creating a hazardous condition.

Our buildings are frequently inspected by State and local representatives of our fire and insurance departments to check fire escapes, exits, extinguishers, boilers and any other condition that might cause hazards or dangers to pupils. Every measure is taken to protect the health and safety of children. Surveys have likewise been made of our lighting and heating units in each building.

The beautification of school grounds is also a concern of the department and it is encouraging to note that a very minimum of property damage has occurred this year to any of our grounds or buildings. Custodians are to be commended for their interest and care in protecting school property. It also speaks well for teachers and pupils alike who have adopted such a fine attitude of good citizenship in the use of public property.

The new Memorial Auditorium Gymnasium is another building now under the jurisdiction of the School Committee. This is a structure of which every citizen should be proud. It is generally conceded to be one of the best buildings of its kind anywhere in New England. If properly used it will contribute much to the physical, mental and spiritual development of our students. It should create greater community spirit and unify our efforts to become better Americans.

It has been our purpose, at all times as members of the School Committee, to work for the greater welfare of the schools under our control without prejudice or favoritism to any individual or group. We have often realized and experienced the difficulties of our task. We have been ever mindful of the importance of our service.

We are grateful to all citizens for their cooperation with us in the cause of education.

Respectfully submitted,

FRANCIS A. PROULX, Chairman
GEORGE S. WILLARD
ROSARIO J. TREMBLAY

EDUCATION

REPORT OF THE SUPERINTENDENT OF SCHOOLS

Citizens of Sanford:

I am happy to make my fourth annual report to you since assuming the office of Superintendent of Schools in 1946.

The duties of a superintendent are countless but his time and energy are necessarily limited. As an administrator he must recommend practically all educational plans, policies or programs which directly or indirectly affect the school system. The organization of all departments and units within the system both on the secondary and elementary grade level is under his direction. The supervision of work being done by principals, teachers, custodians and all other school employees is likewise his responsibility. He is the executive officer of the School Committee and the State Department of Education to carry out and enforce whatever decisions or laws these two legislative and judicial bodies may make.

There is a total enrollment in the public schools of 1,725. This represents a slight increase over four years ago. Our teaching staff includes 81 teachers. Class pupil teacher ratio averages less than one teacher per 25 pupils. Some classrooms necessarily have a larger ratio but there are no overcrowded conditions as exist in so many other localities. Teachers' salaries have been increased each year in accordance with the provisions of our Salary Schedule.

The following comparison of the yearly amounts expended for salaries will show the actual increase during the last four years.

	1946	1949	Increase
Teachers (High School)	\$ 57,191	\$ 75,000	\$ 17,809
Teachers (Grade Schools)	85,690	108,828	23,138
Teachers (Industrial Arts)	17,814	22,722	4,908
Custodians	16,640	20,630	3,990
Totals	<u>\$177,335</u>	<u>\$227,180</u>	<u>\$ 49,845</u>

We have had more teachers attending Summer School and Extension Courses than ever before. The policy of subsidizing these courses has contributed much to the professional development and training of teachers.

Our teaching staff has become more permanent. There were fewer changes in our faculty this year than in previous years.

This of course means greater efficiency and achievement. Teacher shortages are unknown here in Sanford. We feel certain that our policy toward teachers will attract those who

EDUCATION

are best qualified and most competent to the advantage of students.

Within the past four years we have had to purchase many new text books, new equipment and more abundant supplies. Teachers have greatly appreciated the consideration they have received in having their requisitions filled for the essential tools that they need in order to perform their best work.

Our guidance department in the high school now includes a director and two assistants as this work is quite extensive in its scope. All three likewise do some teaching.

Our Industrial Arts department has been re-organized and Mr. Earle Gorrie has been appointed head of this department. Mr. Edward Botka was also elected to assist him.

Departmental Conferences for all teachers are held once a month. Much advancement has been made in co-ordinating and improving the procedures and techniques used in teaching. The whole curriculum has been improved and teachers have thus been able to familiarize themselves through reading with the newest professional books and publications in education. As a result of these meetings notable achievement has been made in the daily work in the classroom.

Intelligence and Achievement tests were administered to all pupils from the first through the eighth grade. Charts were made for each grade and the results of their achievements were most gratifying.

This year we have included a program of Safety Education in all grades. A basic reading system is now in force from sub-primary through the sixth grade. Reading ability has greatly increased this year.

Worthy of particular mention is our Supervised Physical Education program, our music and art programs, the Hand-writing system, our competitive sports schedule.

The new Auditorium-Gymnasium will mean much to develop a better school spirit and a fuller and more complete program of education in our high school and throughout our entire system.

The co-operation of the teachers has been 100%. Harmony exists throughout our entire system and best serves the interests of the pupils in our schools.

I am very grateful for your assistance at all times.

Respectfully submitted,

ROBERT H. McCARN,

Superintendent of Schools.

EDUCATION

REPORT OF THE PRINCIPAL OF HIGH SCHOOL

Superintendent Robert McCarn

Dear Sir:

I hereby submit to you my report as principal of Sanford High School.

Enrollment

The enrollment of the high school as of October 1 was 575. The usual fall loss has taken place — less during the past two years than usual. Four students have transferred to Sanford High since the opening of school.

Auditorium-Gymnasium

As a result of the fine auditorium-gymnasium, Sanford High is now able to carry on more efficiently an already well established physical education program.

The seating capacity of the building for basketball is, at present, 1,800. This can easily be increased by several hundred if need arises. Used as an auditorium the total seating capacity should be in excess of 2,500.

Some thought should now be given to the early completion of the basement of the building making available a cafeteria, band room, additional locker rooms, a check and concession room. The development of an athletic field would round out the finest athletic plant in the state.

Vocational Education

During the past year we have been saddened by the loss of Mr. Ernest Pascucci, of the Roosevelt Vocational School. Mr. Gorrie, transferred from the Industrial Arts Shop and Mr. Edward Botka, who has taken his place at the high school, are both entering upon their new duties with enthusiasm.

Curriculum Planning

Every progressive school makes continual adjustments in the curriculum as educational needs vary with changing times. The first phase of a new curriculum study is now being made by the faculty or groups representing the faculty. At the present time the department heads are studying "needs of students" as worked out by the entire faculty, the guidance department and the school administration. The next step will be the evaluation of the services of Sanford High in relation to

EDUCATION

these student needs. The final phase will be a study of course content.

Music

The band, under the capable direction of Mr. Everett Firth, is somewhat smaller in numbers than a year ago due to a large graduating group. The field drilling has improved in a marked manner. Credit for much of this should be given Mr. Lawrence Arnold who has spent a good deal of time and effort with the group.

The orchestra is continually showing improvement.

Vocal music in the high school this year includes a mixed glee club of fifty voices — students chosen for this having passed a rigid voice test. This group will represent Sanford High at one or more festivals this spring. In addition to the glee club, there is a chorus made up primarily of those who have not been chosen for the first group or who simply like to sing. Much credit is due Miss Abbie Harvey for her work with these students.

The band, orchestra, and glee club members are looking forward to the Western Maine Festival to be held in Sanford in May. At that time several thousand school musicians will enjoy the hospitality of this town.

Commercial Department

During the past year a committee of teachers was selected by the State Department of Education to set up a more uniform commercial curriculum for the high schools of the state. This committee included Miss Marion Fuller of the high school faculty. The recommendation of the group has meant a slight readjustment of our commercial curriculum, advancing Business Arithmetic from the freshman to the sophomore year and Bookkeeping from sophomore and junior to the junior and senior years.

This year Business English and Review Business Mathematics have been included in the year of Office Practice given the senior year. This change should strengthen the position of the graduate entering her first position in business.

Study Habits

Proper study habits are fundamental assets of any student. Much has been done in this field during the past year by the teachers, guidance department, and administration and results of this effort are becoming more and more apparent.

Sports

The athletic program of the school is on a firm basis with football taking care of many more boys each year and with

EDUCATION

varsity, junior varsity, and freshman teams each under capable coaches. Last fall Sanford had one of the finest teams in its history, finishing the season with both a remarkable record of wins and good sportsmanship.

Last spring Sanford had a satisfactory baseball season. Track, though not particularly successful from the standpoint of wins and losses, did furnish an opportunity for a large group of boys to get healthful exercise and learn valuable lessons found in all athletic activities. Boys' and girls' basketball, this winter, shows signs of making good progress. Interclass basketball, now available on a large scale, will serve as an outlet for the energies of very many students.

Driver Training

Driver Training under the direction of Mr. Francis Topping was introduced to Sanford High during the past year. In this course, the first of its kind in York County, students are taught not only the proper driving procedures but are given related classroom work. Six hours are spent behind the wheel as a driver, 24 hours as observer and 28 hours in the classroom. According to national records compiled by the A.A.A., the sixteen year old group has a record of two million miles per fatality while the forty-five to fifty year group has a record of over twenty-one million miles showing very definitely that the fatality hazard is far greater for young drivers. The State of Colorado has 6,000 students and New York State 10,000 in Driver Training. In some cities in the country the course is required of all students before graduation. As the result of studies made in cities and towns throughout the country where Driver Training is taught, records of safety are being made far exceeding expectations.

It is the responsibility of every teacher to help youth meet the problems, the discouragements and the demands of a rapidly changing world. It is my sincere feeling that our faculty is cognizant of this responsibility and is making every effort to meet it.

I should like to thank the superintendent, the school board and the people of the town of Sanford for their continued support of the faculty and myself in our efforts to continue to make Sanford High an outstanding school.

Respectfully submitted,

LAWRENCE L. PAGE,
Principal.

EDUCATION

SCHOOL NURSING REPORT FOR THE YEAR 1949

To the Superintendent of Schools:

The school nursing program has been carried on as a part of the general health program. All children of school age have been considered in the plan. An attempt has been made to carry out recommendations of the American School Health Association as they apply to this particular community.

The desire to prevent illness amongst the children has led to a program wherein we attempt to recognize abnormal conditions in the early stages. Physical examinations are given to children in the sub-primary, fourth grade, seventh grade and sophomore year of High School. Parents are notified of the recommendation for further care made by the attending physician. From this point on we feel as if the responsibility for care rests with the parents and family physician. However, when desired, the school nurse helped the family arrange for needed care. So far this year, we have had a sixty per cent response from the parents in obtaining needed care for their children. Following recommendations were made at time of examination:

- 23 children advised to have further heart examinations
 - 2 children advised to have further examination of nose
 - 71 children advised to have further throat examination
 - 2 children advised to have further chest examination
 - 1 child advised to have further care for ear condition
 - 2 children advised to have further care of hernia
 - 2 children advised to have further psychiatric examination
 - 3 children advised to have further examination because of a crippled condition
 - 2 children advised to have further postural care
- Three examinations were done by a qualified doctor.

A program to care for the children's vision consisted of careful classroom lighting and visual examinations of all children in the sub-primary, fourth, seventh grade and sophomore years of high school and any child in the other grades whose teacher detected sub-normal sight. Fifty-two referrals for further care were sent to parents. Visual examinations were done by competent optometrists.

The fluorine treatments for prevention of tooth decay was applied to 468 children in the lower grades. Clinic personnel

EDUCATION

from the State Division of Dental Hygiene gave this service. Parents were given a detailed description of their children's teeth and needed care recommended.

The program for prevention of tuberculosis was carried on in connection with the general program in Sanford. One hundred sixty-eight students were given the tuberculin test. Fifteen were found to be positive and one of these was x-rayed and admitted to the sanatorium and care advised for the others. Twenty-two students were x-rayed at the monthly clinic because of reports of x-rays taken other years. At the time of the community chest x-ray survey 528 students over 15 years of age were x-rayed. One hundred forty-eight members of school personnel were x-rayed also.

Clinics for the prevention of small-pox were organized and assistance given the health officer. Three hundred and three school children were vaccinated.

One hundred forty-one children in the sub-primary and first grade were inoculated against whooping cough, diphtheria and tetanus.

The audiometer (hearing) test to denote loss of hearing was given to children from the second through the eighth grade, 102 children were found to need further care.

Five children have been referred to the psychiatric clinic for assistance in re-adjustment.

Twelve children are being followed as visitors to the crippled children's clinic.

Local service clubs and the Sanford Chapter of the Red Cross assisted in supplying eye-glasses and needed clothing and food to needy children.

The Searchlight Club of Sanford and Springvale Woman's Club arranged for needy children to have milk during the school session.

The Women's Board and Women's Auxiliary of the Goodall Hospital in conjunction with the doctors made possible tonsil clinics.

A program for prevention of contagion has been planned and carried out in accordance with the State Law.

EDUCATION

Each teacher in the grade schools has been given a definite written program for her part in the school nursing work.

Nineteen selected school children, having some type of a physical defect and referred by their family physician were given seven weeks of concentrated care at the Sanford Health Camp.

During the past year 605 visits were made to class-rooms for consultation with teachers. Ninety-nine home visits were made to ill children. One hundred seventeen home visits were made for the purpose of health education. Three hundred thirty-eight visits were made by parents and school children to the nurse's office.

In conclusion, the individual child is showing progress in possessing greater health information and is putting this knowledge into actual practice — hence the value of the entire program is demonstrated.

Respectfully submitted,

LAURA E. TABOR, R. N.,

School Nurse.

EDUCATION**REPORT OF THE
PRINCIPAL OF EVENING SCHOOL**

January 18, 1950

To the Superintendent of Schools:

I herewith submit to you my report as principal of Sanford Evening School for the year 1949.

The following subjects were taught this year:

Americanization	Rug Making
General Shop	Bookkeeping
Preparation and Serving of Foods	Business Machines
Millinery	Typewriting
Dressmaking	Advanced English

Beginners shorthand was not offered this year because I felt the results obtained from this subject in such a short course were very unsatisfactory. Previous years it has been necessary to close the class early because of a drop in attendance.

I am very happy to report that it was not necessary to close any of the classes early this year. The fine spirit of co-operation of teachers and students was very gratifying.

I am in hope that some arrangements may be made so that adult gym classes may be offered next year.

In conclusion, I wish to express my appreciation to you, to the teachers, to the students, to the Goodall-Sanford, Inc., and all others who help to make this evening school one of the best we have had for years.

Respectfully submitted,

ITHEL E. PRESCOTT,
Principal of Evening School.

EDUCATION

REPORT OF THE GUIDANCE DIRECTOR

To the Superintendent of Schools:

It is with pleasure that we submit this report on Guidance in Sanford High School.

Testing. Testing, one of the important functions in a guidance program, is carried out to determine aptitudes, interests, and skills. Better teaching and more effective pupil-directing can be done on the basis of test results.

The following tests were administered:

1. The Kuder Preference Test to juniors.
2. The Ohio Psychological test to seniors planning to enter schools of higher education.
3. The Otis Mental Ability Test to all students having no previous I. Q. record.
4. The American Council on Education Tests of Achievement in mathematics, social science and natural science to all senior students.
5. Occupational Interest Tests, Personality Tests, and Tests of Mechanical or Clerical Aptitude to individual students.

Group Guidance. Several group guidance activities were sponsored during the year, included were two field trips taken by students in the Vocational Course; one to the Saco-Lowell Shops in Biddeford; the other to the Sanford-Goodall Mills. A Career Conference was held in March at the high school. Speakers, representing twenty-five different occupational fields, described their work and discussed with students the qualifications, personal and professional, necessary for entering these fields. The opportunities and limitations within these fields were also pointed out by the speakers.

College Entrance. Our counseling service included interviews with students planning to enter colleges and schools of higher learning. This work involved correspondence with admissions officers of the colleges, tests and conferences. Approximately fifty students of the class of 1949 are now in attendance at these schools and are achieving success — a credit to themselves, their parents, and their Sanford teachers.

During the past year this office has also served former Sanford High students and alumni by supplying information,

EDUCATION

both occupational and educational, to them and has assisted fourteen young men to gain admission to schools of advanced training.

Occupational and Educational Information. Five hundred occupational pamphlets have been acquired, these covering as many vocations; these are kept in files provided for the purpose in the Guidance Office. Students may borrow these and all types of guidance materials at any time, upon request. Educational information, likewise, is made available to both students and teachers by means of mimeographed reprints, bulletin board displays, exhibits, and through the media of club work and other activities of our extra-curricular program. Teachers assisted in bringing educational information to the attention of the students through units of work. One such unit was on "Study Habits in High School". This was offered to freshmen through the civics classes taught by Miss Louise Mallinson and Mrs. Wilma Rollins. A similar unit is being planned for the junior and senior college course students on the "Improvement of Reading and Study Techniques" to be taught by the Guidance Director, beginning the second semester.

Records. Complete records were kept for each student. These records have both immediate and long-range values. They have immediate value while the student is in school, and their long-range value appears when they follow the student in life after leaving school.

The purpose in keeping these records is a dual one. They are, first of all, maintained to enable the counselors and those concerned with the student's development to assist and wisely counsel him or her while in school. Secondly, they are needed to supply individuals and agencies which may interest themselves in the student after he or she leaves high school with such information about him or her as may be required to form sound judgment.

These records are filed and can be easily located at all times for the use of school officials directly concerned; namely, the superintendent, principal, teachers, and counselors.

At all times records are considered as an aid to, never a substitute for, a personal knowledge and an understanding of the student in question.

Some items of information listed in the records are as follows:

- a. Personal data: name, date and place of birth, address, telephone number.
- b. Home, or family background.
- c. Physical, medical, and health history.
- d. Scholastic record.

EDUCATION

- e. Test results.
- f. Outside-school activities, interest hobbies, clubs, and private lessons.
- g. In-school activities (extra-curricular or curricular).
- h. Educational and vocational plans.
- i. Work experience: part time, vacation, and so on.
- j. Character ratings.
- k. Records and notes of personal interviews made by the counselors.

Counseling. Counseling is the major part of the guidance program. Students have problems of all sorts, personal, social, and vocational. The guidance officers try to help students, to help themselves and help them to solve or partially solve their problems, in the light of facts, information, and understanding which guidance may provide them.

Each student has at least two planned interviews with the guidance counselors per year, and as many more as he, himself, wishes.

The following groups of girls have been interviewed to date since September, 1949:

67	seniors
57	juniors
35	sophomores
94	freshmen
<hr/>	
253	Total

The following groups of boys have been interviewed to date since September, 1949:

67	seniors
55	juniors
38	sophomores
94	freshmen
<hr/>	
254	Total

In closing we wish to express our appreciation to the Superintendent of Schools, the Principal of High School and to all classroom teachers for their fine spirit of cooperation.

Respectfully submitted,

CHARLES H. TOWLE,
Guidance Director

KATHRYN B. MAHANEY,
Assistant Guidance Director

MURIEL W. SLADEN,
Assistant Guidance Director

EDUCATION

REPORT OF THE MUSIC SUPERVISOR

To Superintendent Robert Hugh McCarn:

Dear Sir:

It is a pleasure to report to you of the music activities in the public schools of the town of Sanford.

The life of every child, teacher and member of the community should be made richer and fuller because of music education.

The aim of the music program here is to create a desire for and love of music in children, teachers and community. To create a process of education through music which enables children to think for themselves since thinking is an essentially creative and productive process. To have children one hundred per cent able to participate. Music education for EVERY child.

We are doing some rote singing, some listening, some creative work, some rhythmic work, some playing of instruments, and are learning seventeen steps in music reading which will lead, it is believed, to real sight reading and knowledge of the fundamentals of reading music. These six units are in conformance with the six point program as advocated by the Music Educators' National Conference.

Rote singing is carried on in all grades and in Junior and Senior High Schools; Listening to songs being taught, to scales, to records, to pitches, in fact listening is an important part of every musical activity; Creative Work in all phases of music work as well as original songs and words by individuals and by classes; Rhythmic work such as motion to songs, marching and other rhythmic activities as well as feeling the rhythm of songs and also learning different rhythmic combinations of notes; Music Reading steps beginning in first grade and going on through all grades even into Junior High School; Playing of instruments carried on through Mr. Firth's direction.

Music is a subject which includes the National Education Association objectives of health; Command of Fundamental Processes; Worthy Home Membership; Vocation; Citizenship; Worthy Use of Leisure; and Ethical Character.

We believe that music belongs to everyone and that it is a basic part of every child's education. It is as important as reading, writing, arithmetic, history, and other subjects. It is the right of every child in school.

The majority of the teachers choose their own songs and in

EDUCATION

this way the music work is correlated with the other subjects so that history, geography, languages and other studies take on living meaning against the background of their own music.

Music is an effective part of the curriculum—it vitalizes interest and because of the alert mental attitude necessary for singing, it has a vitalizing effect on the other subjects.

In the lower grades, the children are divide into choirs so that we may give individual help to the children and especially to those who need to be helped to hear the correct pitch. Many children who are in the lowest choir at the beginning of the year make the best singers by the end of the year because of this individual help. It is a great joy to pupils and teachers when some who have not been singing on pitch are promoted to the better choirs. Every child is encouraged to sing and to have happy experiences in singing. In learning music, children truly learn to live. There is social value in sharing with others a happy experience. Music belongs to everyone — provides ability and enjoyment which knows no class, creed or racial discrimination.

Music educators all over the country are realizing how necessary it is for pupils to have a background of music reading ability. Just as a background is necessary in everything so is a background necessary in singing groups in order to do the best work. Therefore we are doing real fundamental work with music reading in all of the grades. At the same time we are keeping up the wholesome joy of group participation in song singing.

The victrolas and records in the schools are being used in listening activities as well as rhythmic activities and additions are being made to the record library.

Assemblies are held at many occasions at which time patriotic, community, and memory songs are enjoyed and the children feel also the power of numbers. Assemblies also help to develop a school spirit as there is social value in sharing with others a happy experience. Music classes in general and assembly singing in particular constitute one of the schools most powerful means of socialization.

At High School we have a Glee Club which meets twice a week during activity period and a small part of the Glee Club meets three times a week. This is a selected group of between fifty and sixty boys and girls who have represented the school at the War Memorial Gymnasium dedication, the band concert, and will take part in the Western Maine Festival May 6 at Sanford and in the New England Festival. One student took part in the New England Concert Festival last spring at Wellesley, Mass., and seven have been accepted for the Concert Festival to be held April 12-16 at West Spring-

EDUCATION

field, Mass. This will be directed by Dr. Lara Hoggard, assistant to Fred Waring and Shawnee Press Editor. Small ensembles have sung at club gatherings and the Glee Club is always happy to take part in any school functions.

The Glee Club put on a concert at the town hall last spring and is preparing another concert for March 24, 1950 in the gymnasium. A group of six senior girls sang at baccalaureate last year and the Glee Club sang at high school graduation.

There is a chorus at high school which meets with Miss Mallinson once a week and from this group pupils are selected for Glee Club as reinforcements are needed.

Our High School Glee Clubs participated last May in the Western Maine Music Festival at Auburn and the New England Festival at Old Orchard Beach.

At Emerson, Mrs. Hayden has a very fine Girls' Glee Club of about fifty voices. The whole student body participated in a concert last spring at Emerson and the Girls' Glee Club did some special numbers. The Girls' Glee Club sang at the Western Maine Festival.

Hamlin had a concert at Lincoln auditorium last year; Lincoln had a concert at Lincoln; Lafayette had a Christmas concert last year and this year; Hawthorne had an entertainment last April.

Mr. Firth with his assistants, Mr. Cella and Mr. Ramsdell, is carrying along very successfully the instrumental program through the grades and high school. There are seventy pupils in the high school band, fifty-five in the junior band and thirty in the high school orchestra. Mr. Firth's groups have taken part in town hall and gymnasium presentations besides giving concerts at both places. His instrumentalists will take part in the festivals and his senior high school band will participate in the drills which are always a part of the festival afternoon programs. This will mark the first time that the Sanford High Band will take part in the drill exhibition.

The supervisor gives a half hour lesson in all of the elementary grades every week and in the junior high schools and the Hawthorne every other week.

Thank you for the privilege of working in such a splendid school system and I wish to thank you, Mr. McCarn, the Superintending School Committee, Principal Page of the high school the principals of all the schools, all of the teachers and all concerned for the cooperation I have received in the last two years.

Respectfully submitted,

ABBIE HARVEY,

Supervisor of Music

REPORT OF ART SUPERVISOR

To the Superintendent of Schools:

I herewith submit my annual report as Supervisor of Art.

Art is the overall quality of our cultural heritage. Various societies are in the process of integration or disintegration depending upon the extent to which they adhere to the art principle of unity. Likewise, the individuals who make up those societies exhibit art quality in their behavior or show lack of internal unity. Group standards or ideals are set before them; and if their personal standards coincide with the group standards in such a way that they are able to conform without pressure or anxiety, they are said to have integrated personalities, the prime requisite for a satisfying or happy existence. Thus they contribute to the unity of society.

Since the core of our democracy is the child, teachers must help him achieve that art quality of a unified personality. Such personalities are constantly being influenced by the quality of living that goes on in a class, a room, a group or each school as a whole. To achieve art quality in the atmosphere of a room without destroying the freedom and elasticity necessary for the creative activity and thought which foster growth is a supreme task. May I say, as a supervisor, that in our school system this art quality is everywhere in evidence. Our child-centered curriculum is conducive to personality development, which shows clearly in creative art expression.

Some of our projects calling for creative expression are as follows: The high school students submitted drawings to the Scholastic Art Awards, which are national in scope; and we were proud to have a junior boy's picture of the gym construction receive honorable mention in the Higgin's Ink contest. A junior girl won second place in the state contest for American Legion Poppy posters. The annual Book Week Poster Contest for seventh and eighth grades also received favorable publicity.

This year we have accepted an invitation from the American Junior Red Cross to take part in its International School Art program. This will involve submitting a number of drawings and paintings from the sixth grade through the high school, depicting our American way of life, which will be sent to schools abroad. Eventually we hope to receive exchange drawings from some foreign country. This program provides a channel through which the creative impulse may contribute to greater international understanding among young people and become one of the avenues through which they may travel toward a new and better world in the future.

In conclusion, I wish to express to you, to members of the School Committee, to principals and teachers appreciation for the cooperation I am receiving.

Respectfully submitted,

HAZEL M. HARRISON,
Art Supervisor.

ANNUAL REPORT

Of Selectmen and Overseers of the Poor

January 1 to December 31, 1950

Within the pages of this, the 181st annual report of the Selectmen of the Town of Sanford, you, the citizens of the town, may read of the programs of the various departments of the town, and the methods used to carry out the wishes of the citizens, as expressed in town meeting. To the various department heads, the clerks under them, and to the citizens of Sanford, we, the Selectmen, wish to express our sincerest thanks for the support we have received in carrying out the duties of our office.

We have had a larger amount of construction, both in new homes and places of business, over the past year than usual. This, despite the higher costs and the unsettled state of affairs in general, indicates a trust in the future of the town. This picture of the future has been marred somewhat over the past year by the appearance of the clouds of war on our horizon. There is no doubt that we will be called upon in the future to make sacrifices such as we have never seen before. Already, a considerable number of our young men have been called into the service, and laws already passed by our State Legislature will make every citizen a participant in this war if the need arises.

At its annual town meeting this past year, the town meeting members approved articles that gave Sanford its first million dollar budget. It is hoped that the new construction will help to offset and cushion somewhat the impact of this budget on our present tax structure. With the steady rise in our operating costs over the past years, ending in last year's peak, the Selectmen have been hard put to find the extra taxable property to prevent the tax bill from becoming an unbearable burden.

Among the articles passed and approved at the last annual town meeting, the one calling for an appraisal of all property, both personal and real by an outside firm of appraisers, was by far the most important one from the viewpoint of the Selectmen. The need for such an appraisal for the purpose of more equitably distributing the tax burden has long been realized. Work will start on this project in April 1951, and the figures will be ready for use in the 1952 tax year.

The question of what to do with our present town farm was left in the hands of a committee this past year, and their recommendations as reported in town meeting were followed. These recommendations called for the construction of a new wing to replace part of the present structure. The sum of \$61,000 was voted for this construction and the building was left in the hands of a building committee. If this committee is not held up in procuring materials, construction should start this year.

In closing this report, the Selectmen wish to take this opportunity to wish each and every citizen of this town a happy and prosperous year. With the continued cooperation of the citizens, the heads of the various departments and the men under them we are confident that this year will be a happy and prosperous one for all.

Respectfully submitted,

THOMAS A. MEUNIER,
MAURICE J. MAURICE,
ARTHUR M. CARIGNAN,

Selectmen of Sanford

PROTECTION OF PERSONS AND PROPERTY**REPORT OF THE BOARD OF ENGINEERS OF
THE SANFORD FIRE DEPARTMENT**

January 23, 1951

Municipal Officers of the Town of Sanford

GENTLEMEN:

The Engineers of the Sanford Fire Department submit the following report for the year 1950.

The equipment is in very good condition as a whole considering its age. The Maxim Pumper is now 23 years old but is in excellent condition. The only piece of equipment that causes us deep concern is the Ahrens Fox Pump which is 29 years old and many of its parts are no longer available. We stressed this point to the members of the meeting last year and as a whole they felt as we did, that this pump should be replaced, but due to the extremely high appropriation it was hoped we could get by another year. We take every precaution to put the heavier work on the other equipment to better assure another year of life to this pump.

The past year we have replaced one-half mile of underground wire which was made necessary by age and violent loads of electricity caused by heavy wind storms and broken high tension lines.

We can foresee much activity this coming year in Civil Defense organization and sincerely seek the kind cooperation of all our citizens.

We wish to express our sincere appreciation to our Selectmen, Police Department, Highway Department and the Springvale Fire Department for their excellent cooperation during the past year.

Respectfully submitted,

CURTIS ALLEN, Chief

HAROLD W. CLARK, 2nd Asst. Chief

PROTECTION OF PERSONS AND PROPERTY

REPORT OF CLERK OF
SANFORD FIRE DEPARTMENT

January 1, 1951

To the Municipal Officers of the Town of Sanford, Maine

I hereby submit the following report of the Sanford Fire Department for the year 1950.

The Department has responded to 263 calls: 12 bell; 238 stills; 5 house calls, and 8 fire drills.

Estimated Value of Property Endangered	\$190,250.00
Damage to Property Endangered	32,232.85
Insurance Paid on Property Endangered	17,232.85
Net Loss	15,000.00

Total Feet of Hose Laid	47,705
Total Gallons of Chemical Used	29
Total Feet of Ladder Raised	1061
Miles Apparatus Traveled	1141.5

Respectfully submitted,

GEORGE F. FERGUSON,
Clerk.

PROTECTION OF PERSONS AND PROPERTY**REPORT OF THE BOARD OF ENGINEERS OF
THE SPRINGVALE FIRE DEPARTMENT**

January 22, 1951

Board of Selectmen,
Town Hall,
Sanford, Maine

To the Board of Selectmen:

The Board of Engineers of the Springvale Fire Department submit the following report for the year 1950.

We have responded to 170 alarms and have had 807 inspections and we wish to state that mainly due to the inspections there has not been a single dollar lost for the year in the buildings inspected.

We are also pleased to report the new fire loss record for the town of Springvale this year, \$350.00 loss, against \$250,000 worth of property endangered.

During the year we have installed a new fire alarm Box No. 391 at the new War Memorial Gymnasium, and also one on Railroad Avenue near Ruel's coal yard, Box 65.

Civilian Defense has been meeting once a week for three months and have become well trained to meet an emergency if necessary.

Since the loss of power during the hurricane, we are going to have the Gamewell Company install a connector to our switch board so that during power failure we can use our generator to keep our alarm system up at all times.

We have also purchased two Handie Talkie Transmitters for our use during fires and also for defense work.

During the year we will install a proportioner on Engine No. 4, which enables us to draw proper amounts of foam liquid and wet water into the water stream.

The equipment in our station is in excellent condition as is the station itself.

We wish to thank the permanent men and the call men and the Board of Selectmen, the Sanford Fire Department and the Police Department, and other departments for their fine cooperation during the year.

Respectfully submitted,

HARRY MARSHALL, Chief
HARLAND C. WINSLOW, Assist.
HARLAND D. MOULTON, Asst.

PROTECTION OF PERSONS AND PROPERTY**REPORT OF CLERK OF
SPRINGVALE FIRE DEPARTMENT**

December 31, 1950

To the Municipal Officers of the Town of Sanford:

I hereby submit the following report of the Springvale Fire Department from January 1, 1950 to December 31, 1950.

The Department has responded to 170 alarms consisting of 153 stills, 10 bell alarms, 7 house calls, also 8 drills.

Total Value of Property Endangered	\$250,000.00
Damage to Property Endangered	350.00
Insurance Paid on Property Endangered00
Loss	350.00

Number Feet of Hose Laid	18,925
Number Feet of Ladder Raised	1,013
Number Miles Apparatus Traveled	1,479.1
Hours Pumped 36.20 Minutes.	

Respectfully submitted,

JACK LAWRENCE,
Clerk.

REPORT OF NURSING WORK OF COMMUNITY HEALTH ASSOCIATION, INC. FOR 1950

To the Citizens of Sanford:

The directors and nurses of the Community Health Association carry on a public health nursing program which is recognized as satisfactory by the State Department of Health and the United States Public Health Service.

The form of this report is similar to other years. This type of work requires routine impersonal reporting as the confidential aspect of contacts with patients must be respected.

Financial support is received from a town appropriation, volunteer contributions, and fees from patients and insurance companies.

Services are available for any citizen.

The following is a summary of the number and types of visits made:

- 411 Home visits to acutely ill patients
- 651 Home visits to ones with chronic illnesses.
- 65 Home visits to pre-natal patients
- 200 Home visits to new mothers and new-born babies
- 415 Home visits to well infants and pre-school children
- 428 Home visits to tuberculosis patients

Clinics were organized and attended as follows:

- (1) 15 Chest clinics held at the Henrietta D. Goodall Hospital and 158 individuals had chest x-rays. Reports of find-

HEALTH AND SANITATION

ings were given to family physicians and patients. Follow-up care was provided as needed.

(2) 10 clinics were attended for the purpose of assisting at the time when 311 inoculations were given for protecting pre-school children from whooping cough, tetanus and diphtheria. Fifty pre-school children were vaccinated against small-pox.

(3) Well-baby conferences were held once a month and 137 babies attended.

The summer Health Camp for physically handicapped children was held for a seven-week period and twenty-two Sanford children received care.

The Nasson Nursery School had one of our nurses attend each morning to inspect each child for signs of contagion.

The total number of visits for the year numbered 2,170.

Respectfully submitted,

MRS. KENNETH J. KORNETSKY,

President Community Health
Association, Inc.

REPORT OF THE HEALTH OFFICER FOR 1950

As Health Officer for the Town of Sanford during the year January 1st to December 31st, I herewith respectfully submit my report of activities for that year:

Under medical and surgical care to welfare and old age assistance cases should be listed office visits, calls to the Town Farm, house calls to the homes of patients, visits to rest homes in Lebanon, Acton, and Shapleigh, and calls to hospitalized patients. Visits were also made to state wards boarded out to families in this district.

Inoculations and vaccinations were given this year to students through high school with parents' consent.

The Well-Baby Clinic, held every month to inoculate in-

HEALTH AND SANITATION

fants against Tetanus, Pertussis, and Diphtheria, was well-attended. More and more mothers are taking advantage of this convenient and economical method of protecting their children against disease. This clinic and the school inoculations and vaccinations were under the able direction of Miss Laura Taber, R.N., and the Community Health Association nurses. I would like to take this opportunity to congratulate them on the successful operation of these functions.

The very low record of contagious disease in Sanford through the year is unfortunate not entirely due to the precautions that were taken, but to the fact that such disease was not reported in the vast majority of cases. Without conscientious and prompt reporting, contagious disease cannot be effectively controlled.

As in previous years, physical examinations were given to children in the schools, and upon detection of illness or suspected illness, the parents were informed of the condition. Since defective vision is responsible for many school children's poor response to education, eye examinations were again given in the primary grades by Dr. Kenneth J. Kornetsky.

Violations of plumbing and sanitation laws were investigated upon complaint, and corrected immediately or referred to officials with authority to handle them.

My duties as Health Officer were greatly facilitated by the capable assistance of the Town Welfare Nurse, Miss Vera Lewis, R.N., and the Community Health Association nurses.

Respectfully submitted,

A. S. LINCOURT, M. D.,

Health Officer.

In Appreciation

HARRY STOTT

**Member,
Park Commission
1927 - 1950**

**Member,
Oakdale Cemetery
Committee
1936 - term unexpired**

It was with the deepest regret that the office of the Selectmen received the announcement from Harry Stott that he would not be a candidate to succeed himself in the office of Park Commission.

Appointed to the office at its inception in 1927, Mr. Stott has given unstintingly of his time and effort from the time when the Park Department was no more than an idea, to its present high standard which has been recognized by both State and National Associations. Not only our public parks but also the task connected with the beginning and continuance of our playgrounds, come within the jurisdiction of the Park Commission, and much of the high level of success attending these projects is due to him. In this he deserves the recognition and thanks of all. That he has received such recognition is attested by the fact that he has been made a member of the American Association of Park Executives, one of the only three men in Maine to have been so chosen. Until his retirement at the end of 1950, Mr. Stott was happy and constant in this work, and the parks and playgrounds stand largely as a memorial to his efforts.

For many years also, Mr. Stott has been a member of the Oakdale Cemetery Committee, and the Oakdale Cemetery has profited in no small degree by his counsel and attention to the work at hand.

We are glad to call his work to your attention and to give him this word of appreciation.

REPORT OF PARK COMMISSION

To the Honorable Selectmen

Town of Sanford

The year 1950 for your Park Commission was one of progress and development. Primarily the finishing and putting into operation the Carpentier Fieldhouse and Playground, a definite addition to the recreational facilities of our town.

Some progress has been made on the so-called William O. Emery Drive, which eventually will become a beauty spot in that location. Trees have been planted in various locations where necessary and replacements have taken place for those that have failed to grow or survive. A continuation of the work in the playgrounds will be carried out the coming year, with the year 1950 showing an attendance in the neighborhood of 20,000.

Respectfully submitted,

F. EVERETT NUTTER, Chairman
HARRY STOTT, Secretary
RAYMOND LORD

ANNUAL REPORT

Town Clerk and Tax Collector

January 1 to December 31, 1950

REPORT OF VITAL STATISTICS

BIRTHS

There were four hundred and fifty-one (451) births recorded in this office for the year 1950. This shows an increase of fourteen (14) births as compared with the year 1949.

Of this number, two hundred and six (206) were of the female sex and two hundred and forty-five (245) were of the male sex.

The number of each month is shown below:

	1950	1949
January	33	32
February	26	31
March	38	44
April	35	30
May	35	48
June	39	36
July	39	41
August	41	39
September	52	30
October	41	46
November	40	30
December	32	30
Totals	451	437

MARRIAGES

There were one hundred and eighty-three (183) marriages recorded in this office for the year 1950. This shows an increase of twenty-three (23) marriages as compared with the year 1949.

In addition, thirty-seven (37) marriages were reported from other city and town clerks during this same period.

TAX COLLECTOR'S REPORT

The number of each month is shown below:

	1950	1949
January	11	4
February	7	17
March	6	6
April	15	15
May	16	22
June	14	17
July	20	14
August	19	9
September	28	17
October	14	17
November	14	12
December	19	10
Totals	183	160

DEATHS

There were one hundred and forty-seven (147) deaths reported in this office for the year 1950. This shows a decrease of two (2) deaths as compared with the year 1949.

Of this number, seventy-one (71) were of the female sex, and seventy-six (76) were of the male sex.

One hundred and nineteen (119) were buried in town, thirty-eight (38) were taken outside for burial, and thirty-six (36) were brought in for burial.

We have had ten (10) stillbirths.

The number of each month is shown below:

	1950	1949
January	7	11
February	13	19
March	10	14
April	11	12
May	11	16
June	6	9
July	17	11
August	15	10
September	16	12
October	8	12
November	16	16
December	17	7
Totals	147	149

TAX COLLECTOR'S REPORT**DOG LICENSES**

During the year 1950, there were ten hundred and fifty-three (1,053) dog licenses issued in this office. In addition there were twelve (12) kennel licenses issued.

These licenses represent one thousand five hundred and fifty-four dollars and fifty cents (\$1,554.50) which was received and paid to the Treasurer of the State of Maine on December 31, 1950.

The following licenses were granted:

Six hundred and thirty-six (636) males	\$ 572.40
One hundred and twenty-two (122) females	597.80
Two hundred and ninety-five (295) spayed females	265.50
Twelve (12) kennels	118.80
	<hr/>
	\$1,554.50

109 Main Street
Sanford, Maine
February 2, 1951

Mr. Thomas A. Meunier, Chairman
Selectmen, Assessors and Overseers of the Poor
Sanford, Maine

Dear Mr. Meunier:

In accordance with Chapter 16, Section 3 of the Revised Statutes of 1944 and at your request, the records of the Town of Sanford have been audited for the year ending December 30, 1950.

I herewith enclose my report of this audit with supporting schedules and questionnaire.

The Records of the Town Treasurer, Selectmen, Superintendent of Schools and Town Clerk and Tax Collector of the Town of Sanford have been audited weekly and their records checked with mine and have been found to be correct.

Respectfully submitted,

MARGARET M. SHAW,

Auditor.

**QUESTIONNAIRE COVERING MUNICIPAL
AUDIT AS PREPARED BY THE STATE
DEPARTMENT OF AUDIT**

Name of Municipality: **SANFORD, MAINE**

Fiscal Year: **January 1, 1950 to December 30, 1950**

Assessors

1. Was valuation book added to verify warrant of commitment? **Yes.**
2. Was verification made of any additional taxes committed? **Yes.**
4. Were abatements signed by majority of Assessors? **Yes.**
3. Was examination made of all abatements allowed? **Yes.**
5. Were the valuation records examined to ascertain if they appear to adequately describe the property? **Yes.**
6. Was the valuation book properly signed? **Yes.**
(a) Do you believe them to be adequate? **Yes.**
7. Do you consider the overlay to be within the legal limit of 5% of the town appropriations plus state and county taxes? **Yes.**

Tax Collector

1. Were taxes in commitment book compared with valuation records and reconciled to total amount of warrant to Collector? **Yes.**
2. Was examination made of the books of Collector for uncollected taxes previous years? **Yes.**
3. Were all delinquent taxes reconciled? **Yes.**
4. Were uncollected taxes verified? **Yes.**
(a) By what method? **Weekly audit.**
5. Have all uncollected real estate assessments been secured by the tax lien or deed method? **Tax lien.**
6. Has interest or discount been properly handled? **Interest—yes.**
7. Was the commitment book properly signed by the Assessors? **Yes.**
8. Were excise tax collections checked? **Yes.**
9. Did the Collector make monthly remittances to the Treasurer, as required by law? **Semi-monthly—yes.**

Treasurer

Cash

1. Were numbered receipts used? **No.**
2. Were these receipts checked in detail to Treasurer's cash book? **Yes.**
3. Were deposits made promptly? **Yes.**

4. Did Treasurer have warrants or orders covering all expenditures and signed by the required number of officials? Warrants—yes.
5. Were all warrants paid in full by the Treasurer? Yes.
6. Were all payments made by check? Yes.
 - (a) Were they verified by comparison with checks? Yes.
7. Did the Treasurer have undeposited cash on hand at the close of the year? (The books were kept open about a week at the close of the year so all money due from the State could be deposited and final bills paid.) No.
 - (a) Did you verify this deposit or deposits? Yes.
 - (b) Was cash brought up to date of audit? Yes.
8. Did the bank balance as reconciled, plus cash on hand equal the cash book balance at the close of the year? Yes.

Tax Liens

1. Have you examined the tax liens listed as assets to determine their value? Yes.
 - (a) In your opinion are they valid? Yes.
 - (b) Were unpaid tax liens verified? Yes.
2. Have you checked payments during the year? Yes.
3. Have you reconciled detailed lists of control accounts? Yes.

Clerk

1. Were records checked for appropriations and salaries of officials? Yes.
2. Were all appropriations legal? Yes.
3. Was a check made of all licenses other than dog and hunting and fishing? Yes.
4. Did Clerk remit in full for all licenses? Paid to Treasurer.
5. Were certificates of oaths of office properly recorded? Index card file.

Municipal Officers

1. Is there a complete double-entry bookkeeping system? No. (The Selectmen keep the record of the payments. The Treasurer keeps the record of the receipts in detail—the total of each check is listed in his cash book.)
2. What was the condition of the records? Very good.
3. Were cash receipts properly credited? Yes.
4. Were disbursements in agreement with warrants and properly distributed? Yes.
5. Did disbursements appear to be reasonable and proper charges? Yes. (Bills and payrolls were approved by at least a majority of the Selectmen before preparation of the warrant each week.)
6. Were vouchers and payrolls examined? Yes.
7. Accounts Receivable:
 - (a) Were they verified? Yes.

8. **Accounts Payable:**
(All bills to be paid within the year are paid on the supplemental warrant at the end of the year so there are no Accounts Payable.)
9. **Bonds outstanding:**
Are interest coupons paid to date? Yes.
10. Were school balances verified with Superintendent of Schools? Yes.
11. Have you carried usual school balances forward to new year? Yes.
12. Have you checked and are reserves set up for estimated losses on tax accounts and receivables? Yes.
13. Was total debt within the legal limit as provided by Article XXIV of the Constitution of the State of Maine? Yes.

Trust Funds

(There are two trust funds from which the Town of Sanford receives only the income which are held by the lawfully appointed trustees.)

Fidelity Bonds

1. **Treasurer**
 - (a) Amount \$20,000.00.
 - (b) Name of surety company: Fireman Fund Indemnity Co.
2. **Tax Collector**
 - (a) Amount \$20,000.00.
 - (b) Name of surety company: The Fidelity and Casualty Company of New York.

Protected Reserve Funds—None.

Sinking Funds—None.

General

1. Were any discrepancies or irregularities discovered in any account? Corrections and adjustments were made through the weekly audits.
2. Have you made detailed schedules of unusual items, special funds, etc.? Yes.

February 2, 1951

Mr. Fred M. Berry, State Auditor
State Department of Audit
Augusta, Maine

Dear Sir:

I am enclosing a copy of my report of the Audit of the Town of Sanford, Maine, for the year ending December 30, 1950.

A copy of this Report is on file in the Office of the Selectmen of the Town of Sanford, Maine.

Respectfully submitted,

MARGARET M. SHAW,

Auditor.

Enclosure

Saturdays 9:00 to 12:00 Noon

SCHOOL SIGNALS

The "No School Signal" will be sounded only on those occasions when concern for the pupils' welfare makes it imperative.

Local travel conditions are variable, not only in stormy weather, but also in the late fall and early spring. Parents are urged to keep their children at home, even when school is in session, if road conditions in their locality are particularly hazardous.

SIGNALS

4 blasts blown at 6:45:

No school for the High School

4 blasts blown at 7:45:

No school for the grades for the forenoon session.

4 blasts blown at 11:30:

No school for the grades during the afternoon session.

EDUCATION

REPORT OF THE SUPERINTENDING SCHOOL COMMITTEE

Citizens of Sanford:

During the calendar year 1950 the Superintending School Committee met for eleven regular meetings and for three special meetings with a detailed list of agenda distributed to each member, usually several days in advance, showing what matters would be brought up. In addition to these, although the Committee can transact business only while in organized meeting, there were many informal conferences between the Superintendent and the various members from time to time. Reference to the records of these meetings, which are carefully kept and which, like the meetings themselves, are open to the public, reveals a variety of matters requiring action by the Committee.

The School Committee, having charge of the new Memorial Gymnasium, established, confirmed or modified, various policies as to the manner of use of the building with reference to food concessions, smoking, rental rates, etc. These policies must necessarily be flexible in some details for a few years until more experience has been acquired in the operation of the building. It is felt, however, that because the building is a memorial and because it is a part of the school system, its use at all times must be kept consistent with the highest standards. Other matters considered in connection with the Gymnasium relate to employment and duties of custodians, policing, street lighting, fire extinguishers, fire alarm box, grading, completion of rooms under the lobby, completing floor in basement and other completion and maintenance problems. Fire insurance on the Gymnasium was placed after several conferences with insurance company representatives. Among the improvements to the Gymnasium were stage curtains and folding chairs.

Another important matter to be reported is the proposed gift to the Town for the use of the School Department of a sizeable tract of land in the vicinity of the Edison School building, including most of the present playground, as soon as the surveying details are completed. The value to the Town of this generous proposal is tremendous.

The general policy which has been in effect for sometime of minimizing the financial subscription drives in the schools was continued. The restriction against hiring of married teachers was eliminated. On July 7, 1950 Superintendent Robert H. McCarn resigned to accept a position in Southbridge, Massachusetts, and the Committee proceeded to obtain and

EDUCATION

interview candidates for the position and elected Neil Sullivan from Wilson, Maine, who has been an extremely able administrator. The Committee has also had under consideration problems involving school cafeterias and school shops including the prospective use of the Roosevelt School as compared with the basement of the gymnasium.

A high light of public relations during the year was the educational supplement in the Sanford Tribune on November 2, 1950 during Education Week sponsored by merchants and other friends in which the innumerable aspects of school life were described and the objectives and recommendations of the Committee for future development were set forth. Included, for example, were improvement of school lighting, new school furniture, consolidation of vocational education at the high school, central cafeteria facilities, improved safety conditions, and continuous survey of the curriculum and administration of the schools generally. Some of the objectives are becoming realities. An extensive traffic survey was conducted and efforts made to assure the increased safety of school children going to and from school. A start has been made on the problems of lighting and improved furniture.

Although the function of a School Committee is to supervise generally the school system, necessarily the Superintendent and other administrative officers must take care of details and make many administrative decisions. The function of the Committee, as we have tried to carry it out, is to lay down broad policies and to delegates to the teachers and administrative personnel the tasks of carrying them out. It is necessary for the Committee to pay considerable attention to financial details and fiscal policies to the extent that this sometimes overshadows the most important function of the Committee, which is to be sure that there is a definite educational policy established for the Sanford schools and that the curriculum and personnel are adapted to effectuate this policy. To this end it is felt desirable that at least one regular meeting and possibly other meetings each year should be devoted exclusively to a consideration of broad educational policies and programs including a survey and report to the Committee by the Superintendent.

Respectfully submitted,

GEORGE S. WILLARD,
ROSARIO J. TREMBLAY,
FRANCIS A. PROULX,

EDUCATION

REPORT OF THE SUPERINTENDENT OF SCHOOLS

Citizens of Sanford:

It is a pleasure to make my first annual report since assuming the office of Superintendent of Schools in August, 1950.

The work of my predecessor, Mr. Robert H. McCarn, and the interest of the people of Sanford in education have been apparent in my initial contacts with the children and the program being carried on in our public schools.

I would like to take this opportunity of reporting on three phases of school work to you:

1. Curriculum development;
2. School maintenance;
3. School finance.

The task of curriculum development has at least four significant aspects: first, the determination of educational directions; second, the choice of principles and procedures for selecting and ordering the potential experiences comprising the instructional program; third, the selection of a pattern of curriculum organization; and, fourth, the determination of principles and procedures by which changes in the curriculum can be made, evaluated and sustained.

The work in our Sanford schools has followed this pattern and includes the following:

1. A monthly teachers' conference.
2. Monthly meetings of all principals and department heads.
3. Panel discussions with resource visitors.
4. Visiting other modern school systems.
5. Reading of current educational material on curriculum revision.

EDUCATION

6. Taking of extension courses provided by New England Universities.
7. Review of instructional materials and school records available today.
8. Distribution of a bi-monthly bulletin coordinating the work of the entire system.

Believing that the way to growth is in and through reading a "Curriculum Foundation" series of textbooks was adopted

in the first five grades, making it possible for the teacher to correlate the work being presented to the child in reading, health, science, and the social studies.

The principal and most challenging job confronting elementary schools continues to be the search for a reading program that will be so organized that all of the pupils will be taught to read successfully in the primary grades. The lack of ability to read with meaning and understanding at the High School and College levels can be traced back to the primary grades.

Along with the correlation of reading material in the primary grades has been a renewed emphasis on phonics and phonetic drill. Your children are now receiving daily instruction in recognizing significant details in words, to master letter form and sound, and to see likenesses and differences in words. This training is a valuable aid in promoting accuracy and independence in word recognition.

The work of curriculum revision in reading has indicated the following: That efforts to arouse interest in reading should be based on "the nature of the child", that teachers should start and build on the child's "present interests", that reading materials should be readily accessible, that situations should be provided in which books and magazines may be read profitably, and that adequate time provision should be made for their use.

The work of evaluating and revising our school curriculum will continue in our Sanford schools as it is only by constantly evaluating the material we are presenting, in terms of the needs of our students, that progress will be made.

School Maintenance:

The person directly responsible for school maintenance is the school janitor. The efficiency of any school program is closely related to how well this person is doing his job. It is necessary to carefully select men for this work, but it is most

EDUCATION

difficult to find qualified persons who have had experience as school janitors. Recognizing this fact, an in-service training school was held for our men during the Christmas vacation. This course consisted of training in all phases of housekeeping, heating and ventilation, maintenance, and operation.

The school provided the custodians with the necessary information but it was apparent that they needed more modern equipment if the schools were to be maintained properly. As a result many schools received equipment designed to do the work required of the men. At the same time the services of Mr. A. J. Sands, maintenance expert, was secured to work with the men in the school for a short period to demonstrate how to operate the new equipment and how to properly maintain the floors in our buildings.

The work day for the school janitor at the high school was changed so that more of his time could be spent in the building after 2:00 P. M. and on Saturday. The previous schedule had the custodians in the building from 8:00 A. M. until 2:00 P. M. and it was most difficult to complete the necessary work because of the interference of the school program.

The importance of the work being carried on by school custodians cannot be overemphasized because of its influence on health, discipline, good housing, ideals, learning conditions in the school building, protection of school property, and the community use of the school plant.

The physical condition of the schools of Sanford was studied and it was apparent that considerable improvement could be made in school lighting, school furniture and school sanitation.

The study of school lighting indicated that many of our rooms fell far below minimum standards suggested for classrooms and that the needs of the children were not being met. This means providing enough uniform, glare-free, well diffused light in pleasant, complementary surroundings to make studying as comfortable as possible.

A program to improve school lighting was inaugurated in December and at the present time five rooms have been equipped with modern fluorescent lights.

The same problem existed in some schools relative to school furniture and four rooms have been equipped with modern moveable units in a program that will in time bring all school furniture up to meet modern requirements.

Modern sanitary drinking fountains have also been pur-

EDUCATION

chased to replace the old upright fountain that was used in many buildings.

School Finance:

Two accompanying graphs illustrate the source of the school dollar and its disbursement.

The state and federal government provided 19% of our school revenue in 1950 and present indications are that Sanford will receive less than 19% in 1951 unless the State Legislature finds a way to raise additional funds for school support. At the present time the state is unable to meet its financial obligations as defined by law and Sanford did not receive in 1950 the subsidy provided for in state statutory requirements. It is obvious that our legislators, meeting in Augusta, are faced with a serious problem of finance and must decide on either rewriting present statutes or finding a new source of money to make certain that requirements indicated by law are fulfilled.

The town provided 76% of the cost of public education and raised \$249,043 to carry on its share of the program in 1950. Of this amount \$226,668 was spent on school maintenance which includes salaries, fuel, conveyance, textbooks and supplies for elementary and secondary schools. Dividing this amount by the state valuation for Sanford (1948) of \$12,029,000 a local school tax rate of .01884 is found. The average of 1950 tax rates of the town in Maine for school maintenance is .02630.

In reviewing the graph on disbursement it is obvious that a large share of our school dollar is spent on the salaries of our teachers. However, when one stops to consider that the average salary of our teachers in 1950 was but \$2,655.59 it becomes obvious that they are not being overpaid. When you stop to compare this average with that of the average salary earned in other professions, or even by unskilled labor, it becomes even more apparent that the Sanford salary schedule for teachers is justifiable.

The average salary of our school custodian in 1950 was \$2,253 and it was found difficult to secure competent young men to accept a position for the salary offered. This situation has been rectified, however, as the custodians received a 10% salary adjustment in January and also will benefit by being included under the Federal Social Security being provided other municipal employees.

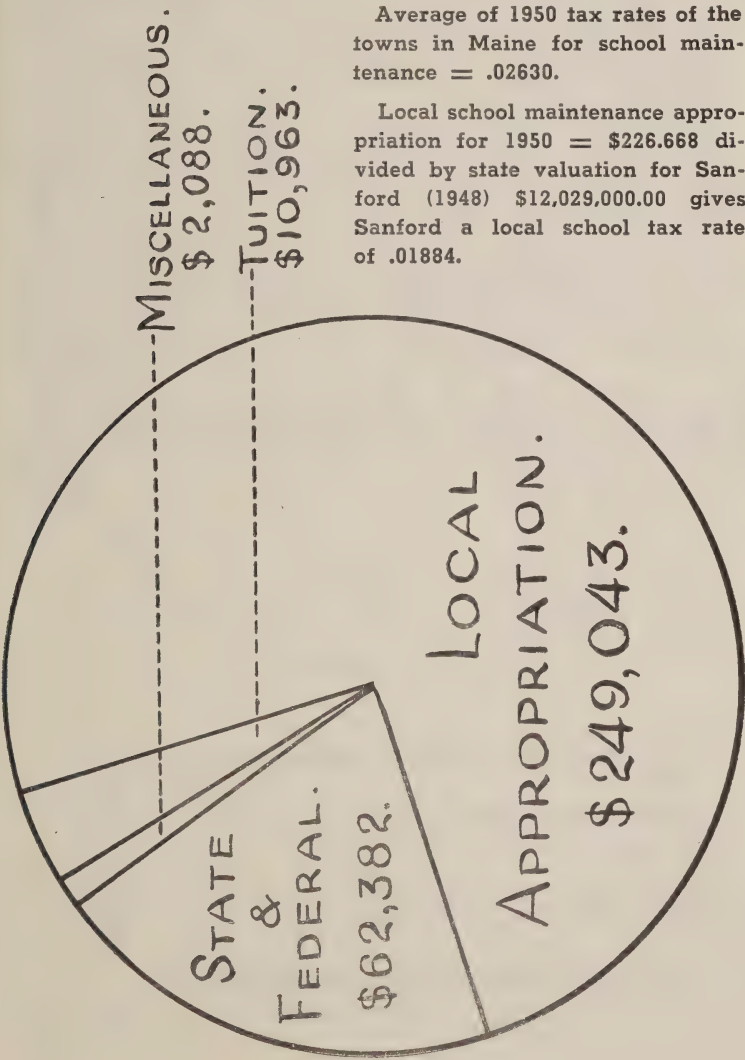

In dividing the school dollar 73% of it is spent on salaries while 27% is spent on fixed charges such as fuel, conveyance, insurance, textbooks and supplies.

The Sanford Dollar and Its Source

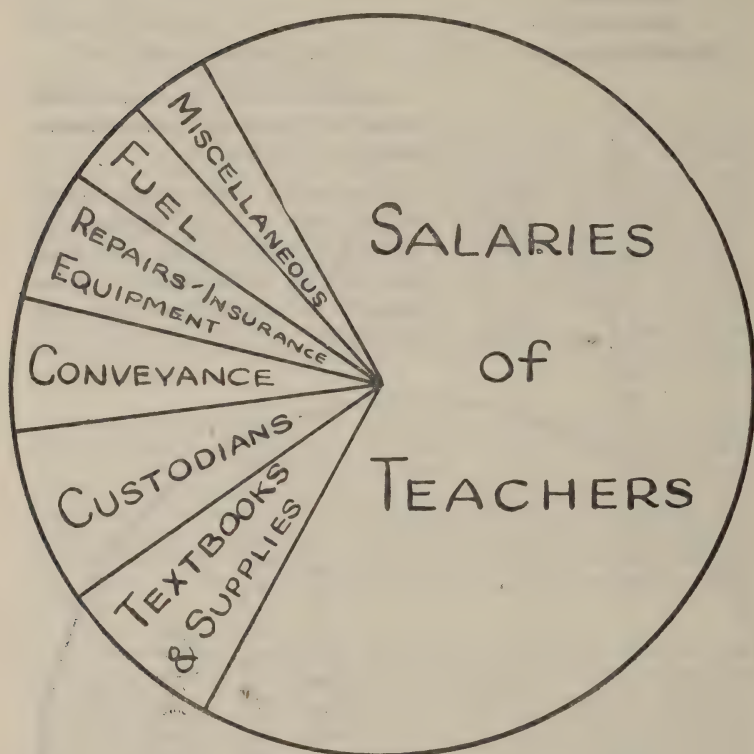

Local Appropriation	\$249,053.	76 + %
State and Federal Aid	\$ 62,382.	19 + %
Tuition	\$ 10,963.	03 + %
Secondary—		
Elementary—		
Miscellaneous	\$ 2,088.	.6%

Average of 1950 tax rates of the towns in Maine for school maintenance = .02630.

Local school maintenance appropriation for 1950 = \$226.668 divided by state valuation for Sanford (1948) \$12,029,000.00 gives Sanford a local school tax rate of .01884.

The Sanford School Dollar and Its Disbursements

Salaries of teachers (substitute teachers—summer school)	66%
Textbooks and Supplies	8%
Custodians	7%
Conveyance	6%
Repairs, Insurance, Equipment	6%
Fuel	4%
Miscellaneous (Supervision, Evening School, School Nurse)	3%

EDUCATION

In closing this report I would like to point out that the public schools belong to you, the people of Sanford, and that I would like to see the school the center of community life. Today, our Sanford School buildings are being opened for the use of the general public during evenings and at other times when the work of the regular pupils will not be hindered. Everywhere today adult education is being emphasized, because it is being more and more realized that only a beginning in education can be made in eight, twelve, or any other number of years of the institutional school. It was, therefore, a privilege to extend the use of the Memorial Gymnasium to our young adults throughout the entire year. I am anxious to cooperate with community organizations, especially those organizations interested in educational and welfare activities. This work helps to vitalize the work of the day-school pupils and contributes also to the improvement of the entire community, and it makes the public more willing to pay taxes for school support. The present efforts of interested citizens in our community to develop a community college in the Sanford area is most worthy of our support. The first aim of the school is the education of all the children of all the people of the community; the first duty of the community is to look after its children.

I would like to thank you, the citizens of Sanford, the School Committee, and the entire school family for the splendid support given me since assuming this administrative position.

Respectfully submitted,

NEIL V. SULLIVAN,

Superintendent of Schools.

REPORT OF THE PRINCIPAL OF HIGH SCHOOL

Dear Sir:

I hereby submit to you my report as principal of Sanford High School:

Enrollment as of October 1 was 565. Since that time the usual loss has taken place—24 students having left for various reasons including moving out of town, enlistment, working, etc. Ten students have entered—all transfers from other schools.

Scholarship is definitely improving as evidenced by the increased numbers of Sanford High graduates on Deans' Lists in various colleges during the past school year. Reports from colleges, so far this year, have been gratifying. A list of colleges and other institutions of higher learning which our graduates are attending at the present time are as follows:

Bowdoin, Boston University, Colby, University of Maine, Jackson, University of North Carolina, University of New Hampshire, Ohio State, Fordham, Colorado School of Mines, St. Anselm's, New Jersey College for Women, John Hopkins, Colby Junior College, Westbrook Junior College, Nichols Junior College, Gorham State Teachers' College, Wabash and Nasson College.

In addition, Sanford High students are attending Leland Powers, Chicago School of Music, Vesper George, Fay Fisher, Navy School of Music, New England Conservatory, Wilfred, Bentley, General Electric, Pace, Zion Bible Institute, Boston School of Dental Nursing, and various schools of nursing.

One of the most pleasing parts of any high school graduation is the awarding of scholarships and prizes. In the past two years, thanks to the generosity of many donors—clubs and individuals—nearly \$1,000 in the aggregate has been given each year to boys and girls of the graduating class who have planned to further their education. This has been of real benefit as often excellent student need only a helping hand to have the courage to undertake a difficult financial situation. Although the scholarships have been increasing in number each year there is still need for others.

The faculty is fully cognizant of the fact that times are changing rapidly and to keep up with these changing times, it is necessary to continually examine our curriculum. This year a philosophy of education is being worked out by each department and finally fused into a philosophy for the entire school—the first step in the current study and evaluation of the high school curriculum.

The auditorium-gymnasium has been in use now for a year and it is needless to state that it is filling a most vital need. School assemblies are contributing toward school morale.

EDUCATION

The building is in constant use both during the school day for physical education for all, dramatics, and music, and in the afternoon and evening for a variety of reasons. An adequate intramural basketball program is being carried on for both boys and girls. This program, added to varsity and junior varsity players, brings the total to approximately 300 active participants in basketball. This means that every student who wishes has the opportunity to play on an organized team.

It is still highly advisable that the basement of the gymnasium be finished at the earliest possible time. Two rooms have been finished over the lobby and health classes and music classes are held there—thereby freeing a classroom in the high school for Visual Aids.

The sports picture is varied. Football was successful from the standpoint of numbers participating and from intangible results. The record, while not as outstanding as a year ago when Coach Alvino had a team of championship caliber, was still quite satisfactory. Sanford High had its usual excellent baseball team coached by Justin Nunan. Track is, as usual, marking time until facilities can be developed in the new stadium.

Coach Keaney, having charge of boys' basketball for the first year, has worked hard to install his system of play. A resurgence of basketball this year in the grades is certain to be felt eventually in the high school. Miss Anne Flemming has organized excellent girls' teams in softball and basketball. Schedules have now been broadened to include the greater Portland Schools.

One of the finest contributions to the welfare of our youth in Sanford is that being made by the Stadium Club. One of the best football and track fields in this part of New England is in the process of construction and when completed will round out an outstanding athletic plant. Nowhere is citizen cooperation more evident than it is in this project.

Much credit should be given Mrs. Mary Goodwin and Mrs. Mary Boucher for the continued success of the cafeteria. At a time when food prices are rising very rapidly, Sanford High students are still able to buy an excellent lunch for 25¢. During the fall, cafeteria funds were invested in a deep freeze. Beef is purchased wholesale and frozen and surplus government turkeys and butter have been stored. The total result has been a menu of high quality.

The band, under the direction of Mr. Everett Firth, Mr. John Cella, and Mr. Earle Ramsdell, is progressing in a highly satisfactory manner. Mr. Firth reports that the general average of the band is higher than ever before. Sight reading is at its highest level. Mr. Lawrence Arnold has had remarkable success as drillmaster with the result that the Sanford High Band

EDUCATION

is rated among the top three bands in Maine and one of the finest in New England.

Credit is also due Mr. Clifford Moore, president of the Band Boosters, Mr. Roland Langley, vice-president, and the other members of this fine organization for their splendid efforts and also to the Board of Education and the townspeople of Sanford for their support of this very worthwhile activity.

The orchestra, at the present time, is an excellent musical group for a school of the size of Sanford High. However, unless violinists can be developed in the grades, the future of the orchestra is not bright. The reason, of course, is an understandable desire on the part of the grade school student to play a band instrument.

The glee club of seventy voices under Miss Abbie Harvey has shown definite improvement this year with a real desire to approach the rating accorded the band. Glee Club Boosters have been formed and are working to help finance festival trips to Portland and Boston. A talent show was sponsored and work is now going on in preparation for the first operetta in several years.

Our students and faculty of Sanford High School, in common with others throughout America, have a duty and a real desire to help meet the critical world situation in which we find ourselves. It is quite certain that, due to the present emergency, we shall be called upon to make contributions and sacrifices and to take on added responsibilities. This, I am certain, will be done with understanding and dispatch.

I should like to thank the Superintendent and the Board of Education for their cooperation, the citizens of Sanford for their active participation in the many projects beneficial to our high school youth and for their support of our teachers and myself in our work with them.

Respectfully submitted,

LAWRENCE L. PAGE,

Principal.

EDUCATION

SCHOOL NURSING REPORT FOR THE YEAR 1950

To the Superintendent of Schools:

The school nursing program was arranged so the greatest number of children could be considered for participation. The program was of a speciality type, because of the large group of children under the supervision of one nurse. Therefore, the work from necessity has to be classified as clinic work, assistance to parents in problems pertaining to their children, and early detection of a defective or contagious condition with resultant care as indicated. Interspersed through this plan was the continuous aid offered and given to teachers for help in care of an individual child.

Assistance was given the examining physician at time of physical examinations of children in the sub-primary, fourth and seventh grades of the public schools. These examinations discover defects and what is equally important, help make the individual child health conscious. Following recommendations were made to parents as a result of the doctor's findings.

- 18 children were advised to have further heart examinations
- 51 children were advised to have further throat examinations.
- 1 child advised to have care for an ear condition.
- 4 children advised to have a blood pressure re-check.
- 3 children advised to have care because of a crippled condition.
- 6 children advised to have an urinalysis.
- 1 child advised to have basal metabolism.
- 1 child advised to have a blood count.

The school nurse was available to help the parents in securing needed care for the above conditions.

The program for prevention of tuberculosis was correlated with the program that we have in the community for adults. It is not possible to give care to just one age group when considering a contagious disease such as tuberculosis. Fifty-three children who were contacts were tuberculin tested. Arrangements were made for 47 children to have chest X-rays. To comply with a state law a record of chest X-rays of all teachers was completed. Arrangements were made for one child to be admitted to the Sanatorium.

Clinics for prevention of smallpox were organized and assistance given the health officer. One hundred eighty-one school children were vaccinated.

EDUCATION

Two hundred twenty-eight children in the sub-primary and first grade were inoculated against whooping cough, diphtheria and tetanus.

Four children were referred to the state psychiatric clinic for assistance in adjustment to life. The school nurse attended a Mental Hygiene conference in Portland planned to help nurses understand behaviour. The parents of sixteen children who presented behavior problems were assisted in planning for care. One child was referred to the State school for mentally deficient.

Talks concerning the school nursing program were given to three organizations, three Parent-Teachers' Associations and to the grade school teachers.

A program for care of children's vision was arranged and assistance given the examining optometrist. Children in the sub-primary, fourth and seventh grades were examined and other children referred by teachers. Thirty-three referrals for further vision care were sent to the parents. Here, as with other programs, assistance in securing further care was given to parents of these children. A program for examination of the students in the sophomore year of High School is being planned for in the future.

Supervision of care was given at the Health Camp to 22 Sanford children for a seven-week period. These children have a physical defect and by constant education are taught how to live so they are able to continue in school. The 22 children were given special follow-up care during the school year.

The school nurse attended the clinic held once a month for innoculating pre-school children against contagious diseases. Also, a copy of suggestions for parents of children planning to enter school was given to parents at time of registration.

Assistance was given to service clubs for their Christmas work amongst children.

Six children were referred to the Chripped Children's Clinic in Portland and given follow-up care.

The teachers were acquainted with the state law for prevention of contagion. Thirty-one visits were made to parents and children to be sure the routine for prevention of contagion was being carried on.

The Searchlight Club of Sanford and Springvale's Women's Club arranged for milk distribution to 98 needy children. The Women's Board and Women's Auxiliary of the hospital in conjunction with the doctors made it possible for ten children to have tonsil operations. The local Red Cross Chapter assisted in supplying eye-glasses and clothing for needy children.

EDUCATION

During the past year 443 visits were made to the classrooms for consultation with teachers. Eighty-four home visits were made to ill children, 146 home visits were made for the purpose of health education. Three hundred twenty-four visits were made by parents and children to the nurse in her office.

The above program provided the children with help for their particular needs. Contribution to the success of such a program was extended to the nurse by teaching personnel, parents and community and through this cooperation the individual child was helped.

Respectfully submitted,

LAURA E. TABOR, R. N.,

School Nurse.

REPORT OF THE PRINCIPAL OF EVENING SCHOOL

To the Superintendent of Schools:

I herewith submit to you my report as principal of Sanford Evening School for the year 1950.

For the first time in over ten years we were able to offer a class in adult physical education for both women and men. Much benefit and pleasure was derived from these classes.

Evening School was not quite as large this year. From reports, evening schools all over the country were smaller, the two principal reasons being more people working and television.

We were unable to accommodate the large number desirous of taking business machines. We had a long waiting list. When anyone dropped out, we filled his place from this waiting list. I am sorry we were unable to satisfy the demand.

The fine spirit of cooperation among the teachers and students makes Evening School successful. This year that spirit was very noticeable.

The same subjects as in previous years, with the addition of adult physical education, were offered this year.

In conclusion, I wish to express my appreciation to you, to the teachers, to the Goodall-Sanford, Inc., to the students, and to all others who helped to make Sanford Evening School successful.

Respectfully submitted,

ITHEL E. PRESCOTT, Principal

Sanford Evening School.

EDUCATION

REPORT OF THE GUIDANCE DIRECTOR

To Superintendent of Schools

Neil V. Sullivan

Dear Sir:

It is with pleasure that I submit my second annual report as Director of Guidance in Sanford High School.

The need for improvement in guidance service to all our youth is increasing rapidly. In recent years our public schools have greatly expanded their course offerings to meet the varying needs of youth. The attendant problems of student selection of courses and adjustment to appropriate curricula are too important to be left to whim and chance.

At the present stage of development of educational thought most educators are in fairly complete agreement on some fundamental facts. Certain of these widely accepted truths furnish at once the justification and the foundation of the guidance concept. They are:

- (1) That young people vary widely in mental, physical and personality capacities and attributes, regardless of economic and environmental factors;
- (2) That the demands of society are dynamic and increasingly complex;
- (3) That public education must provide for all the children of all the people.

Growing out of these basic facts are certain broad principles which must be recognized if guidance is to play an effective role in meeting the diversified educational needs of modern society.

1. Guidance is the educational process that helps an individual make the best possible life adjustment.
2. Guidance is a continuous process.
3. Guidance must attain a balance between the provision of basic tools for earning a living and the development of those attitudes and character traits which will make for the highest type of vocational skill and well-adjusted social behaviour.
4. Guidance is the responsibility of the whole community including the home, the church, the school, and all social agencies dealing with young people.

EDUCATION

5. The ultimate objective of all worthwhile guidance is to develop in the individual the technique of self-guidance.

Various authorities in the field of guidance are agreed today that certain aspects of guidance are necessary to successful adjustment to living. All agree that educational, vocational, and social-civic guidance is indispensable; nearly all agree on including, in addition, personal and economic guidance and guidance in leisure time and recreational activities, health and home relationships.

Since guidance is a continuous process ultimately intended to prepare the individual to make the best possible life adjustments, an effective school guidance program becomes a tactical part of a life-long campaign. Consequently, certain activities are characteristic of all good guidance programs from sub-primary on through the school program. These are:

1. Study of the individual through observation, interviewing, and testing to determine:
 - a) Intellectual capacity
 - b) Achievement
 - c) Personal characteristics
 - d) Interests and aptitudes
 - e) Social adjustment
 - f) Home environment
2. Cumulative recording of pertinent data about the individual.
3. Maintenance of adequate health facilities.
4. Orienting the student to the activities and policies of the school.
5. Adequate educational and vocational guidance.
6. Provide an opportunity for help and advice on personal problems.
7. Instruct in occupational information.

The guidance services of the high school reach the student through two procedures—group counseling and individual counseling. The freshman class is given a series of orientation conferences to help them understand and appreciate the high school program. The sophomore class consists of students who are approaching sixteen years of age and may drop out of school. This is the group with which the need of long-time planning must be stressed.

Special conferences on social living, on choosing a college, and on vocational guidance are called for the junior and senior

EDUCATION

classes. Every year, through the cooperation of the guidance department and local business and professional men and women, opportunities and advantages of the different vocations represented by them in our local industrial, professional, and business fields are discussed, and each student is encouraged to attend conferences on many different vocational fields.

Interviewing individual students for one reason or another takes up the major part of the counselors' time. Some students are not progressing in their studies and want to drop out of school; some are emotional problems—everything is wrong and every one at home and at school is against them. Others want a part-time work program in order to stay in school.

In conclusion, I wish to thank Superintendent of Schools, Neil V. Sullivan, Principal of Sanford High School, Lawrence L. Page, Miss Kathryn B. Mahaney, Assistant Director of Guidance in charge of girls' work and Mrs. Elizabeth Conley, Office Assistant, for their cooperation and support of the program; also a word of thanks to the teachers for their splendid cooperation, without which, no guidance program is possible.

Respectfully submitted,

CHARLES H. TOWLE,

Guidance Director

EDUCATION

REPORT OF THE MUSIC SUPERVISOR

To Superintendent Neil V. Sullivan

Dear Sir:

I hereby submit to you my report of the music activities in the public schools of the town of Sanford.

Music—Physical, Emotional, Intellectual.

Music—the oldest of the arts, the first expression of primitive man.

Music does not belong to a profession, it belongs to everybody.

Music—the right music, taught in the spirit of one who lays his offering before a shrine—does convey something that is lofty, pure and grandly absorbing. It is a language understood by the spirit; and as such it belongs to the eternal verities—to the things unseen that do not pass away.

The fulfillment of "Music for All" is becoming nearer realization. All participate through singing which is undoubtedly the most universal approach to music; through rhythmic experiences; through creative experiences in which some classes have written both the words and music for songs, also creative experiences of interpretation and participation; through listening experiences which are a part of all musical activities as well as listening to records; through playing experiences in rhythm bands, tonette classes and Mr. Firth's instrumental program with his assistants, Mr. Cella and Mr. Ramsdell; and through music reading which is progressing very creditably.

We think of what music is worth to the child rather than of his ability to perform. If we are to develop the musical tastes and talents of the individual, we must begin, with each individual, at the spot where he is located in the musical plane.

Participation in the performance of music eliminates or minimizes the consciousness of differences in religious creed, political faith, economic status, social position or age. From the social standpoint music is an ideal common medium.

Ever since antiquity there have been references to the effects of music upon the emotions. Music provides an opportunity for relief of tension through bodily activity which is certainly germane to grade school education. One of the chief missions of any school is that of socialization or training the individual to work as a part of a group of people. Rhythm band—senior band—junior band—orchestra—vocal groups—class singing—all provide this training.

Music is essentially mathematical and scientific in its background although its greatest use is as one of the greatest of all the arts developed by the human race. Today few subjects

EDUCATION

in the total school curriculum, play as important a role, relatively as does music. It is the one universal language. It can cut across national boundaries and bring peoples into mutual understanding and good will. It can remove some of the barriers that separate us within our own country. Music has always been and still is man's best means of expressing the essence of his experience. In addition to affecting thinking and emotion, it affects the spirit. Education in the area of appreciation is education for something better.

It has long been held by music educators that a good music program readily lends itself to the development of the proper attitudes of living. Today all educators share this conviction for they recognize in music the unique opportunity to teach, and at the same time to see the results of the teaching expressed in a creative way. In his study of music the pupil himself recognizes the relationship between learning and its uses. Musical experiences on each level must be planned, organized and guided. Repetition is needed—the same thing done over in both the same way and with variations.

Music programs throughout all nations have perhaps more in common than do programs in any other areas of learning. Yet for its full realization music requires more background of understanding, more mutuality of feeling, more interest in cooperation and assistance. Because of these factors music provides the stimulus and the means for teaching, and promoting, world understanding. And in this aspect it helps to advance the cause of democracy world wide.

Civilization as we know it began not with the invention of the printing press, but when the average man learned to read. Reading is a skill taken for granted these days. If all the labor of the printing presses could be read by only a handful of scholars, then we would still be in the Middle Ages. Most people today cannot read music, but this condition does not worry them. People today just don't realize what they are missing. If John Doe could play with music, music with all its great therapeutic values might save him from himself and his dangerous, warped hatreds. If John Doe could read music, think of the singing we Americans could do!! We don't sing because we consider that singing is an art reserved for the favored few, just as reading and writing were for the "talented" few in the Middle Ages. If we could read music, we would be of the elect also. The problem is quite different in reading instrumental music as the note on the score tells you where to put your finger on the piano or other instrument. In reading vocal music, the note on the page must call to mind a sound, a tone relation from the preceding note, or the note above or below!!!! The method called Solfege, the "moveable do", our familiar do, re, mi, is perfectly adapted to classroom instruction whereby the steps in the reading of vocal music may be taught in class lessons. Properly taught, solfege benefits not only the singers but is of some help to the instrumentalists and

EDUCATION

may become an invaluable tool of the theorists and composers at the most advanced levels. We would develop richer music, deeper music, more varied music if we were a nation of performers.

The most important single factor in a successful music program in the nursery, kindergarten and elementary school is the classroom teacher. No matter how wise or how skilled the music supervisor may be, her efforts, in large measure, depend upon the musical attitude of the person who lives with the children day by day.

In closing, may I thank you, the Superintending School Committee, Principal Page of the High School, the principals of all the schools, all of the teachers, and all concerned, for the cooperation I receive and may I offer:

"A Creed for Music Education"

as adopted by the MENC at Detroit April 22, 1948.

"More Music in Education through Music for
Our Children, our teachers, our schools, our nation.

Children naturally love music; through it their spirit may be quickened, their feeling exalted and their wayward impulses disciplined for richer individual and social living. Education for our children should include guidance that will steadily develop their appreciations and skills, so that they may participate in music adapted to their expanding powers.

All teachers worthy of guiding the well rounded development of children must be sensitive to music and at least moderately skilled in its performance. They will focus upon what music can do for the child, rather than upon the entertainment the children can give with their musical accomplishments.

Schools must recognize that the emotional, aesthetic, and spiritual welfare of our children and teachers is as essential and demanding as are provisions for intellectual and physical advancement. Only when capable teachers are reinforced with adequate time allotments and generous budgets can the possibilities for growth of the widely varying musical powers of our population be reached.

A nation's musical standards and accomplishments will largely be determined by those of its schools. Music rightly presented to youth can be a vital force in developing that understanding and tolerance, that mutual respect and brotherhood, upon which the community of all human beings and the peace of the world must rest."

Respectfully submitted,

ABBIE HARVEY,

Supervisor of Music.

EDUCATION

REPORT OF THE ART SUPERVISOR

To the Superintendent of Schools:

I herewith submit my annual report as Supervisor of Art.

School Art reduced to a minimum of words by explanation might be summed up in two words, Impression — Expression. So has art ever been since the days of the cave man. Through the ages, as men has become what we choose to call civilized, we have traced his progress because he felt impelled to express himself graphically and so left a record that all might share. Art is sharing ideas, a noble human trait. By means of it man gains approval and the feeling of significance so vital to his well being.

But what happened to man as he progressed? Until the machine age he and his fellow men created and shared ships and shoes and all they needed to live. There were no psychiatrists, no psychologists. With machines came the prevalence of our frustrations. Mechanization sent men into the routine of offices, mills, and shops, and cut down creative activity to a minimum. Life became highly competitive and leisure a luxury. Now when a man's personality becomes disintegrated from too much mental strain or the distraction of war machinery, the psychiatrists recommends that he be rehabilitated by working with his hands, finger-painting and weaving baskets. Expressing frustrated emotions by coordinating head and hands brings the harassed mind to a semblance of order, clarifies ideas into unified experience, integrates the personality.

For this reason Art Education has assumed such an important function in the school curriculum. Child psychologists, sociologists, anthropologists, and other specialists of the human sciences are fostering the child development movement, making clear that the primary function of education is and must be the development of whole personalities. They join with art educators in trying to eradicate mechanistic pedagogy, which can be so emotionally destructive to children and to encourage that type of creative program which makes learning such a vital, happy experience.

We in Sanford are fortunate in having a progressive curriculum which allows for creative growth of teachers as well as of children. Individual teachers are encouraged to develop their own art programs in the same way that they seek art expression from their classrooms. No set program is imposed upon them; therefore they are able to make art experiences functional as well as creative to the extent that they have their roots in everyday happenings. Art educators believe that a generation of children building up a cumulative

EDUCATION

store of such unifying experiences will grow into a generation of adults of such maturity and integrity as the world has never known.

In conclusion, I wish to express to you, Mr. Sullivan, to members of the School Committee, to Mr. Page and to all school personnel, appreciation for your continued cooperation.

Respectfully submitted,

HAZEL M. HARRISON,

Art Supervisor.

REPORT OF THE DIRECTOR OF ATHLETICS

To the Superintendent of Schools:

The following is the Athletic Association report for the year beginning January 1, 1950 and ending December 31, 1950.

The cash on hand and receipts during the year amounted to \$6,966.73. This includes all monies received from guarantees, Student Activities Association, and gate receipts.

It might be of interest to you to know that the Athletic Association received nine cents per pupil per game. I do not know of any other school in this section that admits pupils for so small a sum.

Expenses for the year were as follows:

Cleaning and Repairing Equipment	\$ 507.71
First Aid Supplies	137.98
Transportation	543.84
Repairing and Painting Bleachers	161.24
Officials	687.70
Police	335.00
Guarantees	1,472.31
Rental of Gym	682.07
Advertising	97.75
Miscellaneous	39.14
Equipment	3,165.52
Ticket Takers and Sellers	226.00
	<hr/>
	\$8,056.26

EDUCATION

The difference between the receipts and expenditures is \$1,089.48. \$570.00 of this amount is a payment on the new bleachers bought two years ago. Subtracting this our operating expense was \$519.48 more than we received. The reasons for this are in part due to the following: First, the increase in cost of equipment, and operating expenses; second, the small amount we receive from students; and third, the decrease in attendance, especially at our football games this fall. The cost of equipment in a great many cases has tripled. It costs approximately one hundred dollars to outfit a boy in football today compared to thirty-five dollars a few years ago. We are unable to triple our price of admission.

Sanford High School pupils pay \$2.28 per year for twenty-five athletic contests. This figures approximately nine cents per game. Most schools charge pupils thirty or forty cents per game.

Weather conditions, especially for the Portsmouth game, were against us this past fall. One rainy Saturday can be the difference between a profit or loss for the season.

Because the gymnasium had not been completed, it was necessary to play all our home basketball games during the month of February. This called for two and three games per week, and people just could not afford that.

During the past year we had three basketball squads, varsity, junior varsity and freshman, numbering about thirty-five boys; three football squads, varsity, junior varsity and freshman; numbering about ninety boys; a track squad of twenty-five boys, a baseball squad of twenty-five. Each squad has its own individual schedule.

At the present time, the future does not look too bright for an increase in revenue in athletics.

We do not want to deprive any boy the right to go out for sports. We believe that athletics is a very important part of any high school curriculum; and every boy should have the privilege to take part and be properly equipped.

The Student Activities Association is a part of the High School. Whether we should drop the S. A. A. or increase the cost per pupil per game is a question. However, in order to carry on our present athletic program, our revenue must be increased.

Respectfully submitted,

ITHEL E. PRESCOTT,

Director of Athletics
Sanford High School

EDUCATION

REPORT OF THE SUPERVISOR OF PHYSICAL EDUCATION

To the Superintendent of Schools:

I deem it a privilege to have the opportunity of submitting the first annual report of the Supervisor of Physical Education of the Elementary Schools of Sanford.

The importance of providing instruction in health and physical education in public schools is evidenced by the fact that more than 40 states have some form of legislation requiring the teaching of health and physical education in public elementary and secondary schools. These laws vary in form from those including specific details to the simple declaration that the teaching physical education is mandatory. The intent of these state laws is clear, namely, that boys and girls must be given instruction in physical education.

The law of the State of Maine makes the teaching of physical education mandatory in all public schools, and further recommends a half hour period per day, five days per week. The elementary school system of Sanford is one of a very small number, if not the only one in the state that meets this maximum recommendation of the State Director of Physical Education. It is the belief of the legislators of the state that every boy and girl in Maine schools should receive instruction in activities which will have an influence on his life. The ability to dance, swim, skate, ski, or participate in sports activities should not be denied anyone who wants to take part. These are common or basic learnings which education in a democracy should provide for all children of all people in our schools, regardless of background or ability. There can be no disagreements on the contributions of physical education to the total growth and development of the individual. There may be some controversy as to the methods and techniques to be used, but there can be no question as to the results.

A program of physical education and how it functions must be intelligently understood by those participating in it, and also by the lay people of the community, or it will not be obtainable. There must be cooperative planning with all youth-serving agencies, and efficient use of all schools and community resources and facilities if a totally articulated program is to result. From this principle has developed the idea of the community schools for the use of all citizens.

THE SANFORD PROGRAM Organization and Administration

Time Allotment: A daily period of at least thirty minutes, exclusive of the noon hour is assigned to physical education in each grade. In the primary grades, this time is broken into two fifteen minute periods. This provides sufficient time for:

EDUCATION

1. The planning period in the classroom.
2. Proceeding to the playground or playroom.
3. Participation in the activities of the program as planned.
4. Discussion of any situations or problems which arise.
5. Return to the classroom at the close of the period.

In several situations either facilities, equipment, or both may be limited. In such cases, better utilization is secured by staggering the physical education periods of various grades or rooms.

Program: The program of physical education includes the following types of activity:

1. Directed play
2. Small group play
3. Large group play
4. Team games
5. Rhythmic activities
6. Stunts, pyramids, challenges
7. Classroom games

Responsibility for Teaching Physical Education: In the elementary schools, the classroom teacher is responsible for the conducting of the program for his particular group of pupils. There is a weekly supervisory-instructional visit by the supervisor. No teacher is expected to teach more than the normal classroom teaching load during the physical education period.

Planning the Program: The physical education class is considered as an instructional period and is utilized for the teaching of skills, understanding and attitudes. This implies that the supervisor plans the physical education program of each grade level in the same thorough manner as any of the other phases of the educational program. The daily and weekly plan tends to be definite and progressive, while the monthly and yearly program will necessarily be tentative.

Health and Safety of the Children: The health and safety of all children is the concern of every classroom teacher. The children have periodic health examinations by the school physician, as well as by their own family physicians to determine the desirability of their engaging in the regular program. As a means of preventing injuries, children are advised to remove glasses and to wear rubber-soled shoes during the physical education period whenever possible. Furthermore, all facilities are inspected carefully and frequently as a measure of safety and accident precaution.

Separation of Boys and Girls in the Program: In general, boys and girls are not separated in their physical education activities up to and including the first six grades. Beginning with the seventh grade, boys and girls do not ordinarily play together in team games or gymnastic phases of the program. However, some co-education is advisable, and this is secured

EDUCATION

through the rhythmic activities such as square and social dancing, and folk dancing.

Classification for Physical Education

Students are classified for instruction in physical education and for participation in athletics on several bases in the large school system. These include sex, health, physical fitness, ability, interests, and previous experience. However, in Sanford, we are at present classifying students in the lower six grades on the health status alone, and in the seventh and eighth grades on the bases of health and sex. The health classification is determined by the medical examination. As a result of this examination, students are assigned to one of the following classifications:

Classification A. Unrestricted—Students who may safely participate in the most strenuous physical activities including interschool athletics.

Classification B. Restricted—Students who can participate in supervised class activities and semi-active recreational activities, but who are not approved for competitive athletics, or the more strenuous activities.

Classification C. Rest—Students recommended for rest and abstinence from any sort of exercise.

Class Instruction in Physical Education. Physical education is that phase of the school program which is concerned largely with the development of physical fitness through the medium of big-muscle activities requiring strength, speed, agility, and endurance; with the acquisition of motor skills of interest to growing youth and on value in later life recreational activities; and with the development of socially desirable habits, knowledge, and attitudes which contribute to the aims of education. The class instruction program has been planned to provide progression from grade, intergration with other subject areas, to include basic instruction in a variety of activities designed to promote physical fitness, and to equip the student with such skills and attitudes as will bring enjoyment and success and at the same time to help him to maintain physical fitness.

All classroom teachers have been exceptionally cooperative and many of them have shown unusual ability in their conducting of the elementary physical education classes in their respective rooms.

Respectfully submitted,

DONALD W. BEALS,

Supervisor of Physical Education
